Los Gatos Citizens Pay Signal Tribute To Former Islander

A signal tribute to a former Prince Edward Islander, the late Judge Richard R. Bell, of Los Gatos, Santa Clara County, California, is paid by the Los Gatos Mail-News and Saratoga Star, which in a front page editorial comment says: "An honest judge, and a public-spirited citizen, the late Judge R. R. Bell is a man who will not soon be forgotten in Los Gatos. He served out the Biblical span of life in dignity and usefulness, and he was blessed with friends who appreciated his virtues, although he himself would have been the last man to lay claim to those virtues."

Presbyterian Union, 1875 Held Great Achievement

Recalling "the union of 1875 as a great achievement" in Presbyterianism, Rev. Dr. T. Wardlaw Taylor tells the story of that union in a special article which in view of this year's Presbyterian diamond jubilee, adds interest to "The Presbyterian Record" in which it appears. He pays tribute to the men "whose wisdom and moderation" contributed largely to the success of that union when "serious dissensions might easily have arisen," and adds that "the four churches entering into negotiation were the Presbyterian Church of the Maritime Provinces (both in connection with the Church of Scotland) the Canada Presbyterian Church, and the Presbyterian Church of the Upper Provinces. The last two had been formed by union of the so-called Free Kirk with the United Presbyterians, and each on a basis giving careful definition of the relationship of Christ and the place of civil power. There were then three lines of cleavage, one territorial, the other ecclesiastical. In joint meetings, the committees were grouped "sometimes east and west, sometimes 'k' Kirk and 'U.P.' Free. Always 'her' discussions were marked by courtesy and mutual consideration," Dr. Taylor recalls.

Advises Beauty In New Bridges

(By The Canadian Press) TORONTO, Feb. 7.—A plea for more aesthetic treatment in steel bridge construction was made by F. P. Shearwood, Montreal, retiring president of the Engineering Institute of Canada, in his presidential address delivered at the opening of its annual convention today. Price was generally the only consideration when bridge designs were made in the future, Mr. Shearwood contended. "Even in the present day more beautiful outlines are being used and evidence is not wanting to prove that the designers are departing from the angular and over-braced frames of the last half-century. They are now adopting the more pleasing forms of the arch, the suspension and the continuous span."
