SUMMERSIDE ELECTION

In the civic election at Summerside on Tuesday there was a fairly large vote cast, 626 voters exercising their franchise, the total vote for councillors being divided into some 33 combinations.

The other ticket composed of Clark, Manson and Monkley; 121 selected this ticket, the vote for commissioner on this combination being even 53 each.

The other combinations of ballots are as follows: Boates, Carruthers and Manson 8; Boates, Carruthers and Monkley 13; Boates, McLellan and Monkley 5; Boates, Manson and Monkley 15; Boates, Clark and McLellan 11; Boates, Clark and Manson 12; Boates, McLellan and Manson 2; Boates, Clark and Monkley 13; Clark, McLellan and Manson 17; Carruthers, Manson and Monkley 14; Carruthers, McLellan and Monkley 9; Carruthers, Clark and McLellan 21; Carruthers, Clark and Monkley 4; Clark, McLellan and Monkley 6; Carruthers, Clark and Manson 24; Carruthers, McLellan and Manson 11; McLellan, Manson and Monkley 11.

45 voters voted for only two councillors, as follows: Clark and McLellan 3; Carruthers and Clark 1; Carruthers and McLellan 7; Boates and Carruthers 15; Boates and Manson 4; Clark and Monkley 2; Boates and McLellan 7; Boates and Clark 1; McLellan and Manson 2; McLellan and Monkley 1; Manson and Monkley 2.

24 voters voted for only one candidate, which were distributed as follows: McLellan 12; Carruthers 7; Boates 2; Clark, Manson and Monkley one each; while two voters voted only for water commissioner only, each candidate securing one.

The vote on the whole was a large one and was with the exception of the two tickets well split up. Boates and Carruthers picking up the votes dropped by Manson and Monkley.—C.

The Western Guardian

—IT PAYS to buy in this Province. —THE MORNING DAILY Guardian can be obtained at Lafferty's Tonsorial Parlors, Summerside.

—SHOES.—Are you wearing Regals. See the new stock at old prices. Sinclair & Stewart, Ltd. 4599-3-1M2IE11.

—BUTTERICK PATTERNS.—The new Spring designs now on sale at our pattern counter. Sinclair & Stewart, Ltd. 4599-3-1M2IE11.

—CHURCH OF SCOTLAND.—Rev. Jas. MacDougall will preach on Sabbath the 4th at Summerside at 11 and 7.

—GOOD ROADS.—The public roads are in good condition for hauling. Some produce moving with a few slight changes in markets. White oats being worth 70c and black 73c per bush. Eggs 35 cents per doz. pork, or organs attached 15 1/2 to 18c per lb.—H.

DAIRYMEN'S ASSOCIATION

(Continued from Page One.)

are demands from other provinces for their services. Ask Dr. Gauthier, said Mr. McKinnon, if they are of any benefit. If the dairy branch is not getting any benefit from their services he would like to know the reason.

Mr. Doble stated that too much attention is being paid to the year before. That was one reason why there were fewer men present at this meeting.

There were other reasons also for the lack of interest in the dairy branch. The raising of beef is a very great inducement at the present time, and he said he did not agree with the President in his opening remarks saying that in going in for beef cattle the farmers were making a great mistake.

There was every cause for encouragement in their doing so. In reference to the statement of Mr. Hughes throwing out doubts as to the value of the instructors from abroad Mr. Doble maintained that these men are a very great help to the farmer.

Our duty, said he, is to help the instructor, stand by him and not be too arbitrary in reference to the Truro Convention, said Mr. Doble, any body of people unwilling to pay out \$10 as board for a representative whose way there is paid, is short-sighted to their interests.

Mr. A. Brown said the cheese industry was not going ahead as much as he would like to see. There was a falling off in the milk supply of some factories. He thought the cheese, however, as good this year as last. He thought island products would compare well with those of the other provinces.

Mr. C. E. McKenzie took exception to the remarks of Mr. Hughes in regard to himself in which he stated that Mr. McKenzie had no experience in cheese-making. Mr. McKenzie stated he had been a dairyman all his life, and he had several years' experience with testing in reference to the statement that there was a falling off in the milk supply Mr. McKenzie said that more milk than ever is being produced in some sections, while others are going back.

Mr. C. J. Cook also made reply to the statement regarding non-promotion for cheese-makers. He said he had made cheese for seventeen years before he started making records and had never cleared \$900 at cow-testing. Any desiring promotion should go out and look for it. He had brothers out West making far more money than he could at taking records.

Other speakers at the afternoon session were Messrs. W. N. Lea, W. J. Reid, B. R. Brown, Mr. Doble, Rev. Dr. Gauthier, A. McKay and H. H. Acorn, who spoke along general lines.

EVENING SESSION.

The first item on the evening programme was a paper by Prof. Theodore Ross who dealt with the Agricultural situation and how much depends on it. Can Canada and the other Dominions, beyond the seas and the neutral powers produce sufficient supplies for themselves and for the needs of the Allies? The principal food supplies imported by the United Kingdom are wheat, next poultry, and eggs dairy products and fruit. Of wheat in normal years she imports in round numbers 200,000 bushels. The chief sources of supply are the United States, Canada, India and Argentina. Of all these countries Canada is the nearest at hand and two bushels of wheat can be brought from Canada as quickly as one from Argentina.

So far as we are concerned, said Mr. Ross, we can do very little to prevent the destruction of wheat, but perhaps we can also a little more wheat ourselves so that there will be that much more to send across to supply the Allies in Europe. We are now at that stage of the great war that we must not consider first and foremost what crop will bring the most money, but we must consider what crop can be grown that will be of the greatest service to the Allies.

The next item was an excellent paper by Mr. W. M. Lea on Home Treatment of the Ailments of Dairy Cattle, which created considerable discussion.

Mr. Fred Wooley, Tryon, spoke on the advantages of the cow and the dairymen's business in general.

Mr. W. M. Lea pointed out the advantage to be derived from getting started in some definite line of stock-raising.

Dr. Gauthier declared that the selling of heads of cattle in Prince County to feed foxes was getting to be a serious matter. "Talk about selling the soil and robbing it of its fertility," said he, "it can be done very quickly in this way. Something should be done to make these people see that they are making a very serious mistake."

Mr. C. F. Ferguson spoke of the need of help on the farm. "It seems to me," said Mr. Ferguson, "that there has been an enormous inducement for our young men to go out West and grow wheat. He maintained that they could do as well in other lines at home just as important. Mr. Ferguson said his experiences with cattle coincided exactly with those of Mr. Lea.

The only way to solve the dairy industry of this province, continued Mr. Ferguson, is by increasing the individual cow and keeping records of each.

Prof. Ross stated that the Live Stock Branch, Dominion Department of Agriculture was willing to supply pure bred bulls for the sections of country that cannot afford to purchase pure bred sires.

Prof. W. J. Reid spoke of pure-bred sires and said that in the sections where they had been used co-operatively good results had followed. He showed where men had made over one hundred per cent, on rough cattle which had been taken in hand and finished off properly. He advised that as many farmers as possible should get together in order to improve their stock.

It had been stated, said Prof. Reid, that abortion in cattle is not known in this province. He declared that it was known, and gave advice as to the treatment of various ailments among animals.

Mr. C. E. McKenzie followed with some statistics of records made by the Association this year than form only that it might not be well to recommend the prize money. The men who get this money, said Mr. McKenzie, are not the ones who need encouragement, but the owners of those cows which are giving five or six thousand pounds each. The money would be more useful to those that to the men who are making the highest records. Where a man doubles his herd record he doesn't get any prize at all. These men should get encouragement.

It has been said that dairymen is not making the progress here that it should. Mr. McKenzie agreed with this. Some sections look up some years ago and let it go down. He believed many more could be prevailed on to send milk to the factories, and still have enough for their calves.

Mr. John Anderson said it was unfortunate the dairymen business was going behind. There were four thousand boxes of cheese less this year than last year. This means 3,000,000 pounds of cheese. We have the finest climate and grass. He thought that after the war when settlers are coming to Canada good dairymen of the best Old Country type should be induced to come here.

When the farmers are getting such prices the quality cannot be too bad—in fact, said Mr. Anderson, it is good.

Mr. W. J. Gibson regarded Mr. Anderson's remarks as being of a very pessimistic nature. What we want, said he, is boosters—a little more of the spirit of the fox men.

Dairymen, continued Mr. Gibson, is not deteriorating in every part of this province. In King's County they have got to start to give feed to cows. The importance of feeding has not been realized.

Mr. Lea pointed out that wherever a factory has run for a year steadily dairy has prospered. Dunstaffnage has 361 patrons and Kensington running only five months had done as well in proportion. Have the patrons in Marshfield, he asked, been doubling their supply?

It was decided to accept the offer submitted by Mr. H. H. Acorn, of Souris, for the supplying of cheese boxes.

The President, Mr. J. A. Dewar, spoke briefly in defence of King's County, declaring that New Perth compared favorably with Marshfield. He said that a great many in his county produce at home.

In conclusion Mr. Dewar said, "I am as I can to best Prince Edward Island, as a dairymen country, good for any kind of agriculture."

The following resolutions were passed unanimously: Moved by Rev. P. C. Gauthier, seconded by Mr. W. J. Gibson:—

The Dairymen of P. E. Island in convention assembled do hereby commend the Provincial Department of Agriculture for faithful efforts to pro-

ty to feed foxes was getting to be a serious matter. "Talk about selling the soil and robbing it of its fertility," said he, "it can be done very quickly in this way. Something should be done to make these people see that they are making a very serious mistake."
