NECK KISSES URGED TO AVOID DISEASE

WORCESTER, Mass., Jan. 19.—(A. P.)—If people must kiss, a kiss on the back of the neck is preferable, the Board of Health declared today. In a list of timely suggestions for the prevention of colds and gripple the board's statement says: "If you must, show your affection, kiss on the back of the neck; the thrill will be just as great and you will probably avoid disease."

—SIGNS AND PORTENTS—Forecasting and prognosticating a mild winter at the present moment may be likened some what to the epithet of Sir Arthur Moehan as applied to the political gyrations and impulses of a certain Canadian statesman "always bursting through an open door". In those times of stress and strain comparatively few people hearkened to the dictum of the soothsayer and the weather prophet, nevertheless according to the seers and close observers there have been many signs of a mild winter. The Indians report that feathered and fur animals were careless in the preparation of their winter habitat. We all know that the domestic animals are loath to go to their stables. Mr. John Cann, veteran seer of Kensington read the goosebone, and sees as a "crystal gazer" would see that we will have no hard winter weather till February. Mr. George Riley of Baltic has a goose which laid a second setting of eggs in the late fall and hatched nine goslings. With the prevailing winds from over the Gulf of Mexico (as up to the present) and the "Gods of the upper air" propitious the present winter should be memorable in the meteorological annals of this province.—K.
