Geo. Bernard Shaw Still Going Strong

(Special to The Guardian) LONDON, July 26.—George Bernard Shaw was astir early today, his 74th birthday anniversary, while most Londoners were fighting the need to arise from bed. The famous Irish dramatist stepped briskly from his home in Whitehall Court, and walked to the Royal Automobile Club for a swim. On his way here he passed under a ladder, proving that he is not superstitious even on his birthday. At the Duke of York's monument, Mr. Shaw spiritedly bounded up the steps leading from the hall, two at a time and shortly after this was enjoying his swim. He remained in the water half an hour.

BENNETT'S POLICY MY POLICY, STATES SIR ROBERT BORDEN

And, He Adds, "I Am Content to Leave the Record of My Devotion to the Empire to the Judgment of My Fellow-Countrymen"—Ringing Declaration by Canada's Wartime Prime Minister on Empire Trade—Refutes Unworthy Canvasses of Liberal Party.

OTTAWA, Ont., July 25.—In a statement issued today Sir Robert Borden, Canada's war time Prime Minister, defines his position in relation to the present general election issues. The statement which Sir Robert has handed the Canadian Press follows: "Since retiring from public life about eight years ago, I have deliberately refrained from taking an active part in political discussion, nor did I intend to do so on this occasion, but, as my name has been dragged into the controversy by prominent supporters of the Government, and even by the Prime Minister himself, it becomes my right as well as my duty to make my position clear."

"WHOLEHEARTEDLY IN ACCORD" "I am wholeheartedly, in accord with the fiscal policy which Mr. Bennett has eloquently proclaimed in every part of Canada. Twenty five years ago I took substantially the same ground. The British Empire first and, within the British Empire, Canada first; the preservation of our home market for our own producers, the maintenance of our industries to give employment to our people, Canada's complete control over her tariff. Subject to these considerations, a system of reciprocal trade preferences within the Empire. "Briefly stated, such was the policy as I advocated and to which I still adhere.

On March 18, 1902, I declared in the House of Commons that manufacturers in Canada were as much value to the Empire as manufacturers in Great Britain and on the public platform I declared that a mill or a factory in Canada was worth as much to the Empire as a mill or a factory in Great Britain. No Canadian would desire a British government to adopt a policy regarded as unfair or oppressive by the British people. On the other hand, a Canadian government is derelict to its duty, unless it safeguards the interests of the Canadian people. SIR ROBERT SUMS UP

Any policy that sends abroad raw materials which can be economically utilized in our own industries, any policy that drives our laboring population to seek employment in foreign countries, any policy which sends abroad good Canadian money to pay for articles that can be economically and usefully produced by the labor of our own people and the employment of our own raw materials is economically unsound and destructive of our country's welfare. "Any policy that has the effect of driving people out of our country is a most disastrous remedy for unemployment."

Russian Pulpwood Barred From U.S.

(Special to The Guardian) WASHINGTON, July 26.—Large consignments of Russian pulpwood purchased by the International Paper Company today were barred from entry into this country by the treasury because convict labor entered into their production. Acting on information that poorly fed groups of Russian convicts had been used in loading the wood at Archangel, Assistant Secretary Lowman issued general instructions to customs collectors along the Atlantic seaboard to deny its admittance. He said the International Paper Company had purchased a large amount of Russian pulpwood from the Amtorg Corporation, the official Russian commercial organization, and added, the orders would apply to all specimens of pulpwood from Russia.

Eight Year Search Proves Successful

Oath of Wealthy Grain Trader Satisfied—Pledged Himself to Corral Gang Who Robbed Him. (Special to The Guardian) WHEATON, Ill., July 26.—The last of the Cutten bandits has surrendered, and the oath that Arthur W. Cutten, wealthy grain trader swore eight years ago has been satisfied. Cutten's home, a show place of Downers Grove was invaded by nine bandits in 1922 and \$20,000 in jewelry was stolen, and Cutten was locked in a vault. Aid came to Cutten before he succumbed, but because the invaders had left him in the vault, to die the wheat speculator pledged his entire fortune if necessary to bring them to justice. Two by two and one by one Cutten's agents rounded up eight of the bandits. Some went to jail, some turned State's witnesses and some evaded punishment. One man sought, Gasper Rosenberg, was near to capture many times. Three months ago his brother Simon was caught and pleaded guilty. Cutten was unrelenting and the search went on, it was estimated that he spent a small fortune. Since Sim Rosenberg's arrest Cutten has harried the brother, keeping him always on the move. Distracted at his nerves jumpy, Gasper Rosenberg walked into State's Attorney W. Reeds office yesterday, identified himself and surrendered. "I've been hunted long enough," he said, "I am innocent and prepared to prove it." "I can't

Tied For Open Golf Ch'Ship States Fail To Lift Davis Cup

(Canadian Press) LANCASTER, Ont., July 26.—Shooting a sensational 64, two strokes below the course record, and six below par, Tommy Armour totalled 277 in the 72 holes of the Canadian Open Golf Championship today. Leo Diegel, the title holder and four times winner of the event, went around the last 18 holes in a remarkable 67 to tie with Armour. Johnny Farrell, who had been leading for some time with 278 was in third place. Diegel and Armour must play off for the title. (Canadian Press) AUTEUIL, France, July 27.—The third attempt of the United States as many years to regain the Davis Cup from the tennis musketeers of France, founded today upon the granite-like defenses of these veteran French ace, Henri Cochet and Jean Borotra. Capturing both of the final days singles matches, France retained the Cup and first won in 1927 by the decisive margin of four victories to one leading, two to one. After the first two days of play in the challenge round, France clinched the Cup, when Borotra conquered George Loti, youthful star from Chicago, 5-7, 6-3, 2-6, 5-2, 8-6. Cochet put the finishing touches on France's third successful defense of the Cup by whipping his old rival, Big Bill Tilden, in easy fashion, 4-6, 6-3, 6-1, 7-5. Tilden recorded the only United States victory of the challenge round on Friday, when he defeated Borotra in four sets.

NEW YORK, July 27.—(By The Canadian Press)—Plans for a public observation gallery atop the Empire State Building, 1,222 feet above the intersection of Fifth Avenue and Thirty-fourth Street, where the building is being constructed, were revealed by former Governor Alfred E. Smith, President of Empire State, Inc.

The addition will extend the height of the building with the Zeppelin mooring mast to the equivalent of 102 stories, or 1,248 feet from the street level, he said. The building will thus become one-fifth higher than anything ever built by man. It will be seventy-two feet less than a quarter of a mile above the street. Mr. Smith states that the alteration in the building plans had been made in order that the Empire State building should be "a monumental structure." It will be opened for occupation on May 1, 1931.

While the young suitor was waiting to take out his young lady, the latter's little sister entered the room. "Did you know my sister's got three other boy friends?" said the child. "The suitor pricked up his ears at this piece of news. Really!" he said in surprise. "I haven't seen any of them. Neither have I, replied the child, but she gave me a shilling to tell you. This unusual gallery, raised above the roof level, will be sheathed with nickel and steel and glass. There will be a large observation gallery will be built on the eighty-sixth floor, which can be reached by two elevators connecting with the main elevators of the building at the eightieth floor, 200 feet high.
