### AGRICULTURAL SHORT COURSES

Local Department of Agricul-  
ture, assisted by members of the  
staff and other experts, in-  
stituting a series of Short Courses  
extended lectures and demon-  
strations to stimulate the produc-  
tion of field crops and animal pro-  
ducts suited to our conditions.  
Climatic and geographic con-  
ditions of animal products can be  
taught to the best British mark-  
et. The least possible cost of  
other handling charges, and  
reduction of animal products  
to the necessary amount of  
utility for the production of  
field crops. Dairying, hog rais-  
ing, poultry raising will be em-  
phasized with the addition of ad-  
vanced demonstrations of  
breeding, preparing and grad-  
ing wool for marketing, and oth-  
er of live stock husbandry  
and application of barnyard  
manure, mixing and application of  
fertilizers, cultivation,  
planting and grading of seed pota-  
toes and grain, and addresses in  
the farm management will be  
given by competent speakers.  
The meetings will embody a series  
of afternoon and evening lectures  
and demonstrations of five or more  
days, depending upon the inter-  
est. Two Short Courses will  
be given each week in different loca-  
lities so that the speakers can  
address each day and  
demonstrations may be carried on sim-  
ultaneously.  
Arrangements are now being  
made to hold these meetings at dif-  
ferent centres in the Province, con-  
sidering as large a number of  
places as possible. As it is impos-  
sible to cover the entire Province  
with one or other farmers' or  
settlers in any district not in-  
cluded in this series who wish to  
attend a lecture or demonstration on  
any special subject will have a lec-  
ture given. If dates can be  
arranged that do not conflict with a  
schedule already prepared.  
If a Province are to secure  
and maintain our position in the  
markets of the world, it is nec-  
essary for us to cooperate in our  
efforts to produce the highest qual-  
ity of product best suited to  
our conditions. To maintain our  
position, to hold our own, we must  
only produce the best quality  
animal products but a continuity  
supply as the best market  
under both rising and  
falling markets. What any district  
can do, we have already ac-  
complished others by following a  
plan we can do. Let us endeavor  
to improve conditions which are  
under our control, and  
earn to produce only that which  
will command the readiest sale and  
at the highest prices obtainable.
