CHANTICLEER CAUSES UNIQUE CAR ACCIDENT—On Friday a unique car accident occurred which might have proved serious, when a rooster in flight, came in contact with the windshield of one of our city doctors when proceeding along one of our Island thoroughfares. The windshield was badly shattered and the rooster landed on the back seat of the car accompanied by more than half of the glass—fortunately the physician escaped injury from the flying fragments. The rooster, recovering later from the shock of collision, again proceeded to navigate with his wings and when flying around the car came in contact with the doctor's hand causing a severe laceration to this part of his anatomy. Filled with righteous indignation the physician stopped his car and after some futile attempts succeeded in capturing this unlicensed navigator of the air and performed a hasty operation which resulted in its death. The owner of this wild bird will be recompensed in full by proving ownership of same after paying for damages to car and bodily injuries sustained by the physician.
