In Memoriam

MRS. JANE GILLS

After a prolonged illness which she bore with splendid resignation, Mrs. Jane Gills, Hay River, Lot 44, relict of the late Angus A. Gills, passed away on May 20th surrounded by friends, neighbors and the holy ministrations of her beloved pastor. Her loving daughter, who several years ago returned home from the U. S. A. to nurse her mother, continued faithful to her trust up to the last moment, and lucky, indeed, was the mother of so affectionate and faithful a daughter. Mrs. Gills reached an advanced old age, being 87 years at the time of her death. She was a daughter of the late John McDonald of Hay River, prominent in the days of the agitation for responsible government and the freeing of the lands. The late Donald McDonald, for years colleague of Cooper and McIntosh in that great fight for democracy and ownership of the soil. Mrs. Gills was the last survivor of a large family of men and women, the other members of the family being Sarah, wife of Ronald McDonald and mother of Professor John A. McDonald of Saskatchewan University; Flora, wife of Alex. Chasson of Rollo Bay, but later of Boston; Nellie, Mrs. James A. McCormick, of Naufrage; Martha, wife of Ronald Rutland McDonald, South Lake; Christie, Mrs. Gill, Boston; Mary, wife of Donald Blue McDonald, Naufrage and of brothers, Herman McDonald, Hermanville; Donald McDonald, ex-M.L.A. Charlottetown; Ronald, of Chicago Lake Service; John, who resided and died in Shanghai, China; Michael, drowned at sea; Clement McDonald, well-known resident on the old homestead at Hay River and Roderick, who died many years ago. All of these brothers and sisters, including the subject of our notice, now sleep with God in peace we firmly hope. Of her own family, two daughters survive, Miss Maggie at home, and Eliza Annie, in Boston. Her surviving sons are John Alexander, building contractor, Boston; Michael and Clement for many years resident of the Western Pacific Slope. Her oldest son, Stephen, was drowned at Cape Traverse about twenty years ago, and her son, Leo, who occupied the old home died several years ago leaving a grandson, granddaughter, residing here. Her funeral took place Wednesday morning May 22, to St. Margaret's Church where a mass of requiem was sung by the pastor, Rev. Father McPherson, the attendance which was very large and representative, whence, amid the tears and heart-felt sorrow of a large number of the mourners her mortal remains were laid to rest in the adjoining cemetery. Scores and scores of sympathetic messages from far and near, mass cards, letters of condolence, spiritual offerings, etc. are pouring in to the bereaved household by the mails every day and still coming, for few women in the parish of St. Margaret's were so highly thought of and few had so many affectionate friends abroad. May her soul rest in peace. (Patriot please copy)

CLINIC FOR CRIPPLED CHILDREN conducted by Dr. Acker will be held at the Red Cross office, 59 Grafton Street, Tuesday, June 11th and Town Hall, Summerside, on Friday, June 14th. 5021-5-28-30-June-3 till 10th.

not a deep rooting plant so the fertilizer does not need to be turned under too deeply. The roots of corn radiate from the stalk in a more or less horizontal position and as it progresses in the world auxiliary rings of root start from the stem above ground to assist in anchoring it. The reason for hilling up corn is to encourage these auxiliary circles of roots and to give them a foothold. Hilling up corn is a useful practice although in the modern system of growing the dwarfing growing corn in rows instead of hills is not necessary. Get the corn started at once. Plant early midseason and late for a succession or plant the same variety at intervals of ten days. Give plenty of room between the rows, especially if the corn is grown in drills instead of hills. The stalks can stand a foot apart in the row if they have room to send the roots out on both side without coming into competition for the food supply.

Corn likes a moist soil and a well-drained one. Cultivation is needed but it should not be deep as the roots are near the surface. Merely enough to keep the soil stirred, the weeds down, and establish a dust mulch is the main requirement. Green corn is a luxury possible in its finest quality only in the home garden. It must be freshly picked to be at its best and therefore only those who have grown corn themselves or have had the privilege of gathering it in a neighboring garden knows what real sweet corn is.

Try a patch of sweet corn this year as a luxury if you don't care to bother with anything else.

Men of the Gold Coast of Africa are adding colored rayon to brighten their toga-like garments.

Nearly \$10,000,000 worth of American medicinal were sold in Latin America and the West Indies last year.

For Two Pieces of Silver

BABYLON, with its hundred gates of brass, its busy quays on the Euphrates and its ships and caravans outward bound to the ports of the ancient world!

Was there insurance in those days? Yes, such as it was, for it is recorded that by payment of two pieces of silver, a slave owner could protect himself for a fixed period against the loss of any slave through death or theft.

But the great humane institution of insurance was destined to play a nobler part in the civilization and needs of mankind.

To-day The Dominion Life Assurance Company, in its service to Canadians, is a demonstration of what modern life insurance means to the future happiness of men, women and children everywhere. Founded forty years ago, The Dominion Life ranks as one of Canada's strong financial institutions while, through able management and a careful investment policy, it has constantly maintained its established reputation for large profits to policyholders.

Speed and Balance

The Ford New Town Sedan is the last word in luxurious appointments. Three large windows provide a light, airy interior. The driver's seat is adjustable. An arm rest lies down in the centre of the rear seat and the floor is lowered to give added leg room.

SPEED to carry you along the wide, clear highway; road balance to give you unlimited confidence on the turns; brakes to slow as though by magic the flying landscape on either side—these are your passports to happy motoring with a Ford car.

Ford engineering has developed a new principle of weight distribution that gives the Ford car a tendency to hug the road when travelling rapidly. The engine, the heaviest part, acts in a sense like the barb to the arrow in flight. Torque tube drive transmits thrust to the front of the car. Unique transverse, semi-elliptic springs and the finest shock absorbers in the world, Houdailles, deliver balanced, smooth riding. Therefore, when speedy travel is required, the Ford car develops a road tenacity hitherto unknown in the light car field.

LOW UPKEEP—The maintenance of Ford performance is in keeping with Ford traditions; given care and proper attention, no other car on the road may be driven at less cost per mile. And the price of the Ford car spread over a number of years of motoring pleasure and satisfaction, reduces to an absolute economy this mode of comfortable, convenient transportation.

DEMONSTRATION—Ask your Ford dealer to let you drive a Ford car. He will be glad to take you out. Select the steepest hills, the heaviest going—you will be amazed at the power at your command. Head for the busiest streets. Drive alongside other cars. Try the quick getaway, the swift pickup in second, the easy gearshift. Feel the smooth, sure action of the six brake system.

A demonstration will convince you of the outstanding merit of the Ford car. Drive it yourself, there is no better test.

Also request your Ford dealer to show you the hidden, inbuilt quality features of the car which make it so enduring.

TIME PAYMENT—If you prefer to buy out of income you will find the authorized time payment plan offered by all Ford dealers most attractive.

Drive it Yourself—there is no Better Test

Ford Car Features

- Choice of colours
- 55 to 65 miles an hour
- 40-horse power engine
- Full balloon tires
