Successful Year (Continued from Page 3) VALEDICTORY

Just as an Alpine climber feels a thrill of wonderment and fear as he perceives that the easy part of the mountain ascent is past and that the precipitous peak awaits him, so we perceive the end of college life and the day of graduation. Hitherto, our lives as students have been tranquil, with very few cares to worry our placid days of sport and study; but now we are at the commencement of our lives proper. For the last few years it has been our task to imbibe facts and to learn principles; from now on we must put our knowledge into practice. Our life at St. Dunstan's has been more than an automatic learning; for there is a spirit at our college which cannot be defined except that it has permeated our college life and made it pleasurable and unique. The lower slopes of a great mountain rise easily, green with grass and fragrant with the perfume of flowers. The one who essays the arduous climb loiters here enchanted with the beauty and grandeur of the scene which takes his mind from the laborious climb that lies before him. His esthetic sense is touched; his idea of the great and the infinite becomes more developed; that he is strengthened for the weary toil to come. During the years we have spent at St. Dunstan's we have considered our graduation as something vague and unreal because of its seemingly long futurity, but now we see how short that period has been. We have lingered in the study and sport; our foundation of erudition has been laid and developed, and we have also learned the true principles of Christianity which are so needed in the world today. Those who founded St. Dunstan's are actuated by the intention of building an institution where Catholic young men could assimilate both religious and a secular education as to be fully capable of attaining their aims and also the design had in view for them. The church primarily wishes her people to save their souls, but she wants them to gain temporal advantages so that they may help their neighbors. Our college has borne good fruit, the testimony of which is depicted by the success of her graduates in Church and State. Archbishops, bishops, a multitude of secular and secular priests, doctors, lawyers, statesmen, businessmen, and men in every path of life have come forth from her portals and have been able to stand in the world. They are proud of their success because it reflects upon old St. Dunstan's. These men have put to practice the ideals nourished in them by our college, and we must emulate both their success and the quality of the methods which they used in attaining it. "It is not in mortals to command success, But we'll do more; we'll deserve it." We stand upon the threshold of life today we are not a little fearful of the responsibilities which we must now bear. But as we look back in retrospect and view those who have gone before us, their perseverance, their success, their gain in courage and confidence, the world neither wants nor welcomes those who enter her lists unprepared and aliphod. She desires only those who have equipped themselves to meet the different problems which life engenders. If one is to presage concerning a man's future success there is no better way than apprehending what preparations have been made. At St. Dunstan's we have obtained an efficient general training, and now the rest lies chiefly in our own hands. We have had the instruction; we must apply the education which we have received at St. Dunstan's as clear and unclouded as possible, and we must strive in purity from the instruction in Godless colleges as much as the clear mountain spring is distinct from the slimy swamp. St. Dunstan's passes on an undefined tradition by the procurement of

such forces, according to these economic theorists, conspire to bring about results which we are helpless to prevent. The existence of such forces and economic cycles is readily admitted, but as rational beings we are reluctant to admit our inability to direct them, or at least to mitigate them. Despite the opinions of eminent economists such forces are by no means beyond our influence. We may and do modify them, neutralize them, and at times may direct them towards our own ends. Man's ability to command circumstances is one of his important characteristics which must be recognized regardless of whatever theories may be advanced. Man develops through his ability to adapt his environment to himself; economic causes, while they may play an important part, certainly do not control our destiny. Other writers, minimizing the importance of both economic laws and ideals in the development of a country, hold to a doctrine which is of a somewhat fatalistic nature. According to such men happiness and prosperity must characterize the future of a people whose past reveals evidence of a destiny mysteriously guiding them through such crises as wars and depressions. That there is a God who controls our destiny is certain. But we have been endowed with a free will, and whatever divine guidance there may be in the life of a nation, it works through human instruments. Our future is certainly not independent of our resourcefulness and character, on the contrary we find that our past progress has been due to the fact that in every generation there were men and women who believed in something higher than themselves. Only when strength of character and ideals triumph over self-interest and indifference can we recognize the theory that the success of the past is an indication of the success of the future. Although it is true that we cannot with certainty predict the future development of our country, nevertheless we can to a large extent promote the fulfillment of our desires. The student entering upon a university course cannot know with certainty whether or not he will successfully graduate. He should know, however, that if he sets for himself an ideal of a high average in all his examinations, if he is faithful in his work and constant in his efforts to realize this ideal, he will, under ordinary conditions of intellectual capacity, be successful in his course. Although he may not see the complete realization of his ideal percentage, he will at least succeed in making a higher average than is required for graduation. He should also know, and indeed many learn to their regret, that to be satisfied with a minimum, a mere pass, cannot be considered as a guarantee against failure. A high, should be the motto of every student, and in much the same way every Canadian citizen should aim high in the promotion of his country's welfare. Canadians must recognize the absolute necessity of having high ideals and of working diligently to make possible their realization. If the future Canada is to be to any considerable extent a nation commanding the respect and admiration of other countries, a nation inhabited by a prosperous and happy people whose individual rights are fully protected, a nation where morality, justice, and religion are regarded as sacred, her citizens of today must be guided by ideals. They must have a proper concept of public and private morality, they must respect the rights of the individual and of the state, they must be willing to sacrifice a personal for a common good, and above all must exercise religion and recognize religious liberty. The present world-wide economic crisis, if it has served no other good purpose, has at least given an incentive to a more serious consideration of the future. We have, as it were, been confronted with an important and difficult test and the results have been far from satisfactory. Canada so far has fared not too badly, not because of superior resources nor because of our destiny nor of economic laws, but chiefly because Canadian people have had high ideals set for them and have made noble efforts to live up to these ideals. Russia, Germany, Spain, Mexico, United States, and other nations are in particularly unfortunate circumstances, while the world in general is experiencing social, political, and economic disorganization. The Communist policy prevailing in Russia and gradually finding its way into the political institutions of other countries errs chiefly in its refusal to recognize the natural rights of the individual which are so essential to happiness and prosperity. The doctrine of Communism which exalts the policy of common ownership has manifestly arisen from the failure of its advocates to form ideals of individual rights, and until such ideals are

Stock Quotations Markets At A Glance

(Canadian Press) Toronto and Montreal—Stocks advanced to new high grounds. Toronto Mines—Base metal and silver shares close higher; golds irregular. New York—Stock commodity and money markets closed. (Holiday). Winnipeg—Wheat closed higher. (Canadian Press) MONTREAL, May 30.—Trading was light on the Montreal dairy and produce market today. In butter and cheese sales, dealers held back for Wednesday's auction, the first of the season. The egg market was steady at yesterday's prices as was the potato market. Eggs sold in carlots or less for 10 1/2 to 17 cents for extras, 14 1/2 to 15 cents for firsts and 12 1/2 to 13 cents a dozen for seconds. Receipts for the day amounted to 3,008 cases. The cheese market remained at Monday's advance, current Ontario colored selling for 10 cents to 10 1/2 cents a pound. Offerings were 3,105 boxes. Butter was generally quoted at 18 1/2 cents a pound for no 1 regraded in carlots or less, up a fraction. There were 1,100 boxes on sale. The potato market was unchanged from yesterday's levels. New Brunswick or Prince Edward Island green mountains, per 80 pound bag, being quoted at \$1 to \$1.10.

adopted by the individuals and governments who now support Communism neither Russia nor any other Communist nation can be assured of either a present or a future happiness and prosperity. The religious persecutions which have figured so prominently in the history of such countries as Spain and Mexico during the past few years have caused dissatisfaction, discontentment, bloodshed, and chaos throughout these countries. Here again we may trace the cause of such misery and unhappiness to the absence of ideals, the ideals of religious freedom. Our earnest hope is that such a record of persecutions will never blot the pages of Canadian history, but unless we remain steadfast in our determination to form high ideals of religious liberty and in our efforts to promote their realization, such atrocities may easily find their way into our country.

In Germany, the control of political authority recently acquired by Adolf Hitler and his National Socialist Labor party with their anti-Semitic policy has brought about a determined persecution of Jews and Jewish institutions. Where are Hitler's ideals of justice and racial independence? Obviously they are completely lacking to him with the result that we have more misery, more unhappiness, more discontentment. The recent disclosures in banking circles throughout the United States cannot but impress upon us the extent to which Capitalism is being abused not only in that country but in, we may say, every country of the world. When wealth comes to a few and poverty increases at an alarming rate there is something wrong, and it rests entirely with us as to whether such conditions will characterize our future Canada. If we lose sight of our ideals of justice, the common weal, and fair play, and succumb to the allurements of greed, fraud, and personal gain, we certainly cannot hope for happiness, peace, and prosperity.

The world in general has been ignoring to a great extent the ideals of morality and justice by which it should be guided with the inevitable result that it has gradually fallen into a state of irreligion, social disruption and suspicion. People everywhere are forgetting their God to whom they owe everything, are openly defying His laws, and are foolishly endeavoring to dissociate Him from their lives. Nations lock upon one another with distrust and suspicion, refuse to recognize the rights of each other, and engage in disastrous wars. Countries are disregarding the first principles of fair administration and this whole demoralization is spreading throughout the world. A few months ago the world applauded the decision of Great Britain to meet her obligations incurred during the Great War. Although Great Britain is to be highly commended for her action, why should the payment of just debts evoke such comment from other nations? Simply because the ideals of these nations have been so disregarded that people no longer consider such things as legal obligations and justice.

We have endeavored to visualize an ideal future Canada and to show that the present unhappy conditions prevailing throughout the world are due mainly to the lack of ideals among people. Other factors we admit, will play an important part in the future development of our country, but if the Canada of the future is to be a universally respected nation inhabited by a prosperous and happy people, if we are to avoid Communism, religious persecutions, social gre-

GRAIN

(Canadian Press) MONTREAL, May 30.—Offerings on the Montreal livestock market today totaled 1,910. Receipts were composed of 45 cattle, 401 calves, 1,257 hogs and 120 sheep and lambs. The cattle market was steady at \$2.25 to \$2.75 for common to just fair quality cows. One load of good cows was offered around 1100 pounds and sold for \$5.00. Calves were steady. Good calves brought up to \$5 with medium to good quality around \$4.00. Common light veals down to \$3. Common light drinkers were sold as low as \$2. Good lambs were weighed at \$12 with fair to medium kinds at \$10 and common light kinds as low as \$8. Hogs on sale included about 1,100 hogs held over from Monday. The market was unsettled and there were no early sales.
