YORK PERSONALS. The condition of Mr. L. H. D. Foster, March 27th, shows no improvement. Mrs. Alfred Morrison and Mrs. James Curran, Pleasant Grove, are convalescing nicely after being seriously ill. The crew who placed an electric bell at York R. crossing left Thursday morning for Montserrat. They speak highly of the very pleasant reception at York. Mrs. Archibald Robert Veseley, York, completely recovered from her recent indisposition.

Cough Colds Often Dangerous

People are beginning to recognize the fact that a cough cold is a serious ailment, and when you contract a cold or cough the first question you ask yourself should be, "How am I going to get rid of it with the least possible delay and expense?" The answer is, "Use Dr. Wood's Norway Pine Syrup." This cough medicine is composed of the well known properties of the Norway pine tree, wild cherry bark, and other soothing, absorbent, healing and expectorant properties of other excellent herbs, barks and balsams. A few doses should convince you it is just the remedy you have been looking for.

Mrs. H. HALLIGAN, Camborne, Ont., writes: "My father had a terrible cough, and we thought he was never going to get rid of it, as he had tried so many remedies without getting any relief. A neighbour told us about Dr. Wood's Norway Pine Syrup, and it was the only medicine that helped to give him relief." Put up by The T. Milburn Co., Ltd.

STRAIN ON YOUR EYES

Eyes used for close work - particularly if lighting is not correct - are subject to a greater than normal strain. This brings the patient discomfort if there is present any appreciable refractive error and shows itself in headaches, sore eyes, etc. A person has no way of knowing the degree of strain on the eyes until they are examined.

BRINGING UP FATHER

IN MEMORIAM

ROBERT RANDOLPH MACMILLAN

On January 31, death entered the home of Mr. and Mrs. Claude MacMillan, Mt. Edward Road, and claimed for his own, their darling child, Robert Randolph, aged one month. He had been ill but a few days, when pneumonia set in, and in spite of medical skill, his little soul winged its flight heavenward. To God who saveth suffer little children to come unto Me, for of such is the Kingdom of Heaven. There are left to mourn the loss, besides the sorrowing parents, two brothers and one sister, namely John, Maynard and Ann. Services at the home and graveside were conducted by the Rev. Hugh Miller, Trinity United Church, Interment to the People's Cemetery.

SHEILA'S NEW JOB

(By The Canadian Press) LONDON - Always interested in social work, Miss Sheila MacDonal, youngest daughter of the late James MacDonal, former prime minister, is going into training for police court probation officer. Engagement of her sister Isabel was recently announced.

Oil Industry Shows Advancement

The biggest improvement in oil industry transportation has come since the war, as yet not 20 years ago.

In that time there has been a great abandonment of railroad transportation, partly because the railroad refused to see the demand of the times for better and more efficient transportation. While under force of government orders and war circumstances they adopted some of the oil industry's ideas, the oil men paid the price of the transportation facilities. The oil business came to go on without the railroads and the latter have since paid a tremendous penalty.

In these last 20 years the motor truck has become a low cost, high speed, carrier for long and short hauls. The gasoline pipeline has developed. And in the last dozen years there has developed a third big transportation facility, namely, by water, in tanker and barge, for the most part a big company development.

All of this was without government aid of interference. On the other hand the railroad stood by, helpless under government control, and confident, seemingly, that somehow the all-embracing government regulations would protect them. High rates and old fashioned methods so that today it is pretty much off the rails and is running its own privately owned and operated transportation system.

Appreciation

Mr. Charles Paul, Clyde River, P. E. I. has received the following letter which speaks for itself. Stony Beach, Sask., January 31, 1938.

Dear Mr. Paul: -Your name was in two sacks of potatoes received by my son G. W. Read out of a carload of vegetable from your province. He handed the names to me, to convey thanks for your kindness and generosity. Also he received one sack from Mr. and Mrs. Wm. H. Paul, and I will write them also.

We do thank you very much, and can assure you that your help is very much appreciated, because the whole province of Sask. is in very bad shape, and is receiving help from all over Canada, that means a great deal to us, and all that all us is too much for me.

Our main crop is wheat, and we depend largely on fall moisture for next season crop. It may seem incredible to you, but from early in Sept. 1936 until May 1937 the water never ran off our house roof, more than 8 months. The ground absolutely dry. A little snow save moisture to start the grain in the spring, and the water was blown clear. Crops looked fine June 1st, but nearly all dead by June 15th, and largely plowed up. Of course pastures suffered also. My son and I see patterns from my 75th year, and not quite as active as I used to be (a trifle disabled, but still in the ring). We put in a good match of potatoes, they looked good, but the weather was so bad, they should have given us 150 sacks or more. We got ten, from size of hens' egg to marbles and then some. I see the same size of seeds planted with corn, melons, melons never came up at all, just a few sprouts that did not live.

We sowed about 750 bus of grain, wheat, oats and barley. Had no crop worth threshing. Plowed up most of it and put the best of it through the thrasher to break up the Russian thistles, and blow feed into the barn.

Farming here is more of a gamble than in other provinces. You may hit it right, and on the whole we have done well in the 32 years we have been here. We are from Ontario. By 1925 we were well off. Since then gone back, 1926 and 1927 hailed out 100 per cent both years, 1928 good crop, and not a paying crop since, after buying both feed and seed - 1931 a complete failure - threshed nothing, and went 150 miles for feed, 1932-1933 - 1, just a little crop, buying feed each year, - and then in 1937 had rain and a lovely crop, wheat looked like 25 to 30 bus per acre or more, - but in a few days, rust took the whole crop and wheat, thousands of acres not cut, and thousands of that did not make \$1.00 per acre.

Oats and barley good, though - 10 bus per acre quite common 1936 a dry year again, wheat 8 to 10 bus per acre, oats are very poor, and the 1937 the worst of the lot, over nearly all of the province. In 1927 Sask. had 220 millions of dollars of wheat, in 1937 10 millions, that tells the story, - 500,000 head of horses and cattle to ship out, or fee, to be brought in to feed them. My son has 10 children, from 16 years old down to two, and it takes a lot of money to keep them in bread, shoes and clothes, so you may know he and his wife are thankful for your vegetables, and more thankful still for the good will shown by your gifts to those

unfortunate people all over the province. We have all lost plenty of money those past nine years, taxes keep piling up, horses and machinery worn out, schools, telephones, churches all haru up. - But on the other hand, we have the finest people in the work for neighbors, you

hardly ever hear a growl out of any of them. They take their knocks and stand up, and a few normal years would make it a different country again. If it will only rain! I cannot tell you all of it in a letter, but I will write some more of it in a P. S. - Your potatoes were lovely, after, will write some more of it in a letter, and you can some of them.
