An addition to his establishment, that in several cases already has proven its worth, has been the purchase of an E. & J. Resuscitator Inhalator and aspirator by Mr. A. B. Cutcliffe of the Cutcliffe Funeral Home.

The merit of this machine has already been established by its successful application in thousands of desperate cases and since coming to the island has been used to a great extent at the P. E. I. Hospital with good results. It can be used for adults, children or tiny, new-born babies.

Designed for use in emergencies where natural respiration has failed such as drowning, electric shock, carbon monoxide poisoning, asthma, apnoea of the newborn, heart attacks and like, it produces respiration mechanically at normal rhythm and pressure as it automatically adjusts itself to the lung capacity of adult or infant. And it can perform three functions in the twinkling of an eye for by merely turning a lever it can be converted from a breathing machine to an aspirator or an inhalator.

Many of the finest hospitals throughout the United States are today using this machine and members of their staffs know well the worth of it. In addition rescue squads in a large number of important industries, fire and police departments have availed themselves of its use and many lives have been saved because of the vital advantages this apparatus offers.

Mr. Cutcliffe deserves special commendation for his foresight in purchasing this machine. As said before it already, in the short space of time it has been on the island, has proved its worth, and it certainly adds a great deal to the already fine undertaking establishment which Mr. Cutcliffe manages.

This machine, in a portable case, weighs 110 lbs. and can be rushed to the scene of an accident. It is available at any time by calling Telephone No. 633.
