STEAMERS AND DREDGES AFOUL

Serious Mixup in Montreal's Crowded Port—Two Costly Dredges Damaged, One Being Sunk—The Harbor Commission's Property.

MONTREAL, Sept. 29. (Special)—Dredges No. 2 and 3 of the Harbor Commissioners anchored off the Hamburg American Company's sheds, were seriously injured this morning, the latter being sunk.

EXHIBITION OF 1905 HAS DRAWN TO CLOSE

The Provincial Exhibition of 1905 came to a close yesterday. Though the weather was disagreeable during Monday, Tuesday and Wednesday and cold throughout the entire week the paid attendance on Wednesday and Thursday, 3922 and 4089 respectively, was fairly good and though not up to that of past years was quite satisfactory.

THE EXHIBITION PRIZE WINNERS

SHEEP.

CLASS XXX.—LEICESTERS. With Certificate of Registration in Recognized Flock Book. Ram, 2 shears and over—1, Albert Boswell; 2, S. L. Boswell; 3, Samuel C. Lane.

WHEN YOU GROW OLD

The body needs patching—wasted tissues must be rebuilt, played-out organs restored—blood needs extra nourishment. Elderly people need Ferrone.

GAYNOR & GREEN ARE EXTRADITED

MONTREAL, Sept. 29.—(Special)—Gaynor and Greene now see their finish. United States Marshall White and Doy's hearing warrants signed by President Roosevelt arrived here to escort the criminals to their own country.

CLASS XXXIII.—SOUTHDOWN

With certificate of registration in Recognized Flock Book. Ram, 2 shears and over—1, Robt Furness; 2, Robt Furness; 3, Robt Furness; 4, Robt Furness; 5, Robt Furness.

CLASS XXXIV.—SHROPSHIRE DOWNS

With Certificate of Registration in Recognized Flock Book. Ram, 2 shears and over—1, Cephus Nunn; 2, L. H. D. Foster; 3, Louis Bennett.

CLASS XXXV.—OXFORD DOWNS

With Certificate of Registration in Recognized Flock Book. Ram, 2 shears and over—1, Silas R. Lane; 2, Philip H. Lane.

CLASS XXXVI.—SUFFOLKS

With Certificate of Registration in Recognized Flock Book. Ram, 2 shears and over—1, Philip Lane; 2, I. L. Lane.

CLASS XXXVII.—HAMPSHIRE DOWNS

With certificate of registration in recognized flock book. Ram, 2 shears and over—1, Cephus Nunn.

CLASS XXXVIII.—LONG WOOL GRADES

No sheep allowed in this class with black or grey faces. Pair of ewes, 2 shears and over, having each reared a lamb this season—1, A. H. Boswell; 2, Samuel Lane.

HAS CONFESSED STORY WAS FALSE

ST. JOHN, Sept. 29.—(Special)—Ada Williams who a week ago reported that she had been assaulted, tied up and left lying in a barn all night today confessed that her whole story was a falsehood.

CLASS XL.—SHEEP SPECIALS

Donated by the Hewson Woolen Mills (Limited), Amherst, N. S., H. L. Hewson, President and General Manager, for the best collection of Shropshire Down Sheep, carrying fleeces best adapted for manufacturing the fine Hewson Tweeds—1, Geo. Boswell.

MISS SADIE FRASER

Kingston took first prize at the Exhibition in any material, hooked mat.

WEATHER TODAY

TORONTO, 30 Sept. —(Special)—Light to moderate winds, fine, stationary or little higher temperature.

IT'S IN THE BLOOD.

Dr. Williams' Pink Pills Drive Out Rheumatic Poison.

Rheumatism is rooted in the blood—any doctor will tell you that. Nothing can cure it that does not reach the blood. It is a foolish waste of time and money to try to cure rheumatism with liniments, poultices or anything else that only goes on the skin.

NEWSPAPER REVIEW NOTICE OF OCTOBER MAGAZINE.

The October number of Keith's Magazine on Home Building is full of interesting and suggestive articles for the prospective builder. This is one of the choicest numbers issued, the opening article being "An Entrance and Within" fully illustrated, followed by the publisher's own Building Experience giving a photo view of his new house with interiors; Hints for the Fall Garden; An Attractive Group of Typical American Homes; a Chapter on Oriental Rugs; and Problem No. 6 in Series "The Designer Problem," which is skillfully handled by Arthur C. Clanson with diagrams of various styles of dormers.

A LARGE HOUSE MOVED BY WATER

DALHOUSIE, Sept. 29.—(Special)—A novel building moving contract was completed here today.

Some time ago W. S. Montgomery built a fine residence some distance out of town, but desired to have it moved into town, a distance of a mile and a half. It was taken in the ordinary way to the shore and there loaded on two large lighters which carried it a thousand yards by water to the location provided for it.

LAST OF HORSE RACES.

The 228 class unfinished from Thursday was called about two o'clock. The sun was shining brightly but the wind was still cold. There were about two hundred spectators on the Grand Stand and along the fences. The finish of the 228 class and the doctors race proved very interesting and were watched with considerable pleasure.

228 CLASS, SECOND HEAT.

The horses got away on the fourth score Leewood some distance behind. Jewel soon pulled out and was never headed winning in 2.25. Betsy held second place till the 2 broke there and was passed by Jean that finished third, Betsy was put back to fourth place for breaking and Bertha T took third. Leewood was distanced and finished at a galop.

228 CLASS (THIRD HEAT).

The horses got away after considerable scoring. They were well bunched to the quarter where Jewel pushed ahead closely followed by Betsy. The latter broke badly at the half and Jean went to second. Bertha also broke badly here but was a good fourth with Leewood again considerable distance behind. This ended the race. Jewel took first money, Bertha T second, Jean third, Betsy Cameron fourth and Leewood fifth.

TWO-TWENTY-EIGHT CLASS

The following is summary:—Bertha T, bay m, by Israel, Peter Carroll, Halifax (Carroll) 2 3 3; Jean, bay m, 2.20, by Executioner, A. A. Leckie, Charlottetown (Hooper) 5 2 2; Leewood, 2.27, br g by Parkwood, S. N. Dawson, North Tryon (Dawson) 3 5 5; Jewel, black m, 2.20, by Black Pilot, J. P. Irving, Cape Traverse (Irving) 1 1 1; Betsy Cameron, br m, 2.20, by Bronze Chief, John Cameron, Charlottetown (Cameron) 4 4 4; Time 2.28, 2.25, 2.27.

DOCTORS RACE (FIRST HEAT).

The entries were as follows:—Dreadnought II by Dr. F. Kelly; Indefatigable by Dr. R. J. Ledwell, and Star of the East by Dr. F. McDonald, Souris. Much regret was expressed at the absence of Dr. Conroy with his Invincible. The heats were half mile best two in three. Dr. McDonald took the lead at the start and trotted from start to finish without a break. He was pushed hard at times by both others but each broke at critical points. Dr. Ledwell passed Dr. Kelly at the quarter and made a determined effort to win but was not fast enough.

DOCTORS RACE (SECOND HEAT).

In this heat Dr. Ledwell who had previously driven with an ordinary wagon, exchanged for a pneumatic carriage such as the others drove. The change proved effective and though he broke badly won the race closely pushed by Dr. McDonald. Dr. Kelly's Dreadnought II broke badly after passing the quarter.

DOCTORS RACE (THIRD HEAT).

This was again closely contested. Dr. Ledwell's mare broke badly but was neck to neck at the wire with Dr. McDonald. Dr. Kelly was leading at the quarter but his horse also made a bad break. Dr. McDonald won heat and race. Dr. Ledwell second and Dr. Kelly third.

DR. CHASE'S OINTMENT.

Swell patterns and shapes in new fall neckwear for men at Jas Paton & Co's. 30 dl.

GRAND TRUNK PACIFIC WORK

Contracts West of Portage to be Finished Early Next Spring—Two Year's Building in Winnipeg Shows Big Figures.

WINNIPEG, Sept. 29.—(Special)—About one hundred and thirty miles of the G. T. P. road west of Portage LaPrairie is now under sub contract and work is being pushed forward with all possible speed.

All these contracts will be completed early next spring and the grading will reach Touchwood Hills easily by mid-summer. Winnipeg's building record is greater than ever. In last year's record several millions were represented by the new G. T. P. R. terminals the Eaton Block and Gas works improvements.

ISLAND TEACHERS IN ANNUAL SESSION

Thursday morning the members of the Teachers' Association, upwards of 200 in number, visited the McDonald Consolidated School at Hillsboro. Crossing the ferry at 9 o'clock the excursionists walked to the Southport station. After a delay of about half an hour the train started for Hillsboro.

When the association reached the school they found the several classes engaged in their usual work. A hasty inspection was made of the several classes. Interest and application were the noticeable features of each class. The presence of visitors did not in the least disconcert the pupils. The centre of attraction for the visitors was the Domestic Science department. After a brief explanation of the work by Miss Ross, the teacher, several articles of food were prepared and partaken of by the visitors.

Following the inspection of the school the convention met in the Assembly hall, where Dr. Brittain, of Fredericton, N. B. gave a lesson to a class of grade VI pupils. The subject was leaves and buds. With specimens of the spotted alder, and spruce in the hands of the pupils, they were led on step by step until they discovered for themselves the development of the bud into the branch. Foliage and carpel leaves were distinguished. This was, in very truth, a model lesson,—an example of teaching not telling.

The grounds, luxuriant in flowers and vegetables, were visited and admired. The inspection concluded the school was dismissed and the visitors had the pleasure of witnessing the orderly procession of the pupils to the vans—of which there were six—and their departure for home. Principal Jones was most assiduous in his efforts to make the visit a pleasant one and to enable all to see the entire school and equipment.

At 12 o'clock the party left by train for Charlottetown. They were brought across the new bridge. Superintendent Sharp was present and to his kindness the excursionists were indebted for many attentions. His thoughtfulness in announcing every charge necessary in crossing the bridge, and his care that every one avoided any danger made it exceedingly comfortable for the party.

The evening session of the Teachers' Association met at 8 o'clock Thursday in the Y. M. C. A. Hall, Vice President Gillis in the chair. J. A. McPhee, B. A. of Souris read a carefully prepared and thoughtful paper. His subject was "The Teaching Process." The aim of education he said, was the moral and intellectual development of the child. A means of moral development was the study of the biographies of the good and great. Earlier education should be from the child's environment not from books. Learning by rote was condemned, but the child should be led to discover the facts for himself. The contrast between the observing and unobserving man was noted. Galileo and Columbus were cited as examples.

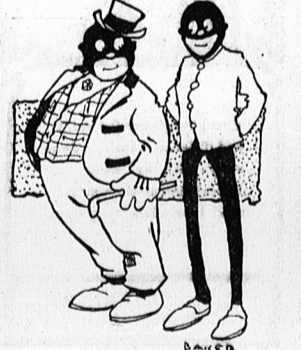

Dr. Robertson, Principal of P. W. College, Mr. Hughes, John McSwain discussed the paper commentary on the excellency of the suggestions contained in the paper. Dr. Brittain of Fredericton followed. His subject was Nature Study. In opening he spoke of the fertile fields that he observed in the province; the numerous unadorned homes by trees and gardens. He also noted that many of the school houses were not models of beauty in architecture or surroundings. He commended strongly the efforts now being made for the establishment of Consolidated Schools, and hoped that the number would be speedily increased. In contrast the method of paying teachers in P. E. I. and N. B. he pointed out the fact that while part of the support of the schools in N. B. comes from the Provincial Government, another part from the County fund, yet the district frequently pays more than is received from the other two sources combined, while in P. E. I. almost all the pay comes from the Provincial Government.

He then proceeded to illustrate the methods adopted in the schools for the teaching of nature; in the lower grades single plants are studied either in the

school garden or in the school room. From the study of annuals proceed to biennials then to perennials. Following the life history of the plant should come the study of flowers. In this study the children could be led to discover that the flower was really a modified branch. The pollination—relation of insects to plant—relation of leaves to light, moisture and air, this study leads naturally to the study of chemistry.

He showed an extremely simple and inexpensive method of producing oxygen, the entire cost of making the experiment not being more than the cost of two postage stamps. Chemical union was then described and illustrated. The speaker concluded with the hope that we would not be contented with either the present or the past. We are sure that the children of today are being better taught than those of the past. Believed that there was time for the study of the subject of the new education and not neglect the old. Theo. Ross, Dr. F. P. Taylor, and J. D. Seaman discussed the subject. Convention closed to meet in the morning at nine o'clock.

GET MORE VIM! If you are tired, nervous, sleepless, have headaches and languor, you need Dr. Hamilton's Pills; they tone the stomach, assist digestion, brace you up at once. Taken at night, you're well by morning. Sickness and tired feeling disappear instantly. Vim, spirits, happy health, all the joys of life comes to everyone that uses Dr. Hamilton's Pills.
