-THE MARKETING DEPARTMENT of the Canadian National Silver Fox Breeders' Association is apparently heading for another very successful year. To date a slightly greater number of pelts than last year have been received at the Association's headquarters and the officials report a great deal better average quality in the pelts coming in. Evidently one of the few good results of the depression is the bettering of the quality of the foxes being kept over by the ranchers. During the last few years it has been driven home to the breeders that it was poor economy to keep anything but the best foxes. The spread in prices between low grade pelts and good skins was not as great as in former years and, consequently, a great deal of weeding out has been done with the result above mentioned. Prince Edward Island fox breeders are to be congratulated on their foresight

The Fox Breeders' Association is Holding Its Annual Meeting in TORONTO, JANUARY 17th, 1933

Steps are being taken in the endeavour to procure special railway rates for those attending the Annual Meeting, and, in order to do so it is necessary that a rough idea may be had of the numbers of members who will probably be attending from the various parts of Canada.

Will the Island members who are considering taking this trip kindly communicate with the Head Office at Summerside advising of same?

If sufficient numbers should be leaving Prince Edward Island, an endeavour will be made to have a pullman run through direct to Toronto which will cut out the necessity of changing at Montreal.

Anyone wishing to be advised as to the rates and so on, will be able to get this information from the Head Office as soon as arrangements have been completed with the Railway.

It is to be hoped that a number of Island breeders will see fit to attend the meeting as, apart from the fact that the Island should be well represented at such a time, it will doubtless be a very pleasant journey for all who wish to spend a few days in Toronto.

NEW YORK, Dec. 13.—One canary is a splendid companion, two canaries are fine—but 15,000 canaries, all singing at once, are something else again. So say passengers just arrived from Germany on the liner Hamburg. On the ship were 15,000 birds, the largest Christmas shipment ever made to this port.
