

WHY SUFFER FROM RHEUMATISM

"FRUIT-A-TIVES" HAVE HELPED THOUSANDS

Mrs. DAVISON If you are made miserable by this painful disease, read this encouraging letter from Mrs. Louis Davison of Eau Claire, Ont. "Some years ago, I had a severe attack of Rheumatism. I tried many remedies but received little benefit. A few months ago, I saw an advertisement of "Fruit-a-tives" and decided to try them. After taking four boxes, I am now able to do all my own work besides putting in a large garden. I take great pleasure in recommending "Fruit-a-tives" to anyone suffering from Rheumatism. "Fruit-a-tives is a genuine fruit medicine, made from fruit juices intensified and combined with tonics. It frees the system of poisonous waste matters and purifies the blood stream. Try "Fruit-a-tives" yourself and let them restore you to health and vigor. 25c. and 50c. a box - at all dealers.

THREE YEAR ROTATION FOR DESTROYING WEEDS.

(Experimental Farms Note)

In 1912 a three-acre plot of land was allotted at the Experimental Station, Charlottetown, for the purpose of demonstrating the efficacy of a short-time rotation in eliminating weeds.

This land was badly infested with golden rod (solidago sp.), yellow, orange, yellow daisy, or black-eyed Susan, couch grass, and had been in common for many years.

A three year rotation was outlined as follows:

First year: Hoed crop. This crop received 15 tons of manure per acre. Probably the most satisfactory method to apply this is on the clover stubble the previous autumn, and plough down.

Second year: Grain crop, seeded down with 10 pounds red clover, 2 pounds alsike and 6 pounds timothy per acre.

Third year: Clover hay. Immediately after the removal of the hay crop, the land was mowed and ploughed in preparation for the next season's crop. After ploughing, the land was rolled and then sown during the balance of the season. It is strongly recommended that the land be ridged up in the autumn.

This rotation was carried on at the Station until the season of 1920, when it was discontinued. In the meantime, it had been demonstrated to a marked degree that such treatment would suppress the various weeds mentioned. The solidago, yellow, orange daisy and black-eyed Susan had entirely disappeared. Traces of couch grass might be well to point out that the treatment will not prove effective unless the land is efficiently tilled after ploughing the clover seed for hoed crop.

It might not be amiss to point out also that where large areas of rough or permanent pasture lands are available this makes a fairly suitable rotation for stock raising.

As to disadvantages, it offers little or no opportunity for pasturing, and there is, relatively speaking, too much land under hoed crop for the average farmer, but in limited areas it may be strongly recommended as a satisfactory means of cleaning up land heavily infested with weeds.

Canada's exports in 1925 amounted to \$1,270,986,845, or at the rate of \$141 per capita on our 9,000,000 people. United States exports were \$4,908,783,259, or \$44.62 per capita on 110,000,000 population. United States favorable trade balance was \$438,517,297, while Canada's was \$392,831,447.

WILL BREAK RECORD AS HIGH STEPPER

Alfredo Fernando, the Berlin dancing master, has undertaken to break the world's record in dancing, and has agreed to dance 130 hours at a stretch on condition that he be allowed an interval of ten minutes at the end of each three hours' dancing.

He guarantees, apart from these intervals, to adapt his steps to any sort of dance music played by the band in the large Berlin Casino Hall, which has been engaged for the purpose. The only dances he rules out as too fatiguing are the waltz and the Charleston.

His only requisites for this endurance feat, he says, are six pairs of strong dancing shoes and two pairs of slippers, with a plentiful supply of eau de Cologne. He will not confine himself to professional dancers as partners, but will make choice from time to time of the onlookers who are anxious for the honor. Fernando also undertakes to shave and take his meals while dancing.

ENGAGED 34 TIMES IN THREE YEARS

A handsome Frenchwoman, named Mme. Josephine Lugin, aged 50, was arrested in her villa at Evian recently, on charges of numerous marriage frauds.

Documents seized indicate that Mme. Lugin, although her husband was living alone in Geneva, became engaged during the past three years to 34 different elderly—and mostly wealthy—men in Switzerland and France. Her plan, it is alleged, was simple. It would stage a violent quarrel of jealousy and break off relations, but refuse to return loans of money or gifts of jewels or other presents. A complaint lodged by a ruined Marseilles merchant led to the arrest of Mme. Lugin, who wore rich furs and drove her own motor car with two gendarmes to prison.
