OPERA HOUSE BURNED. PATERNON, N. J., November 2.—The opera house on Main street was destroyed by fire at an early hour. After the fire had been blazing half an hour a portion of the south wall fell in and crushed in the roof of an adjoining building occupied by Joseph Donahue, as a saloon and billiard room. No one was injured. The total loss is \$50,000, fully covered by insurance.

ADVANCE IN LINED OIL. MONTREAL, October 31.—Lined oil is again moving upwards having advanced 2c. a gallon this week. This advance is due to the strength of the English market and it is the opinion of dealers that the local market will go still higher some say even to \$1.00 a gallon. The demand for it is good and the supply is very scarce. Mixed paints will be the next thing to advance and putty will probably follow. The whole market for this line of goods is strong.

ITCHING PILES. Mr. O.P. St. John, Dominion Inspector of Steamboats, 246 Shaw street, Toronto, writes: "I suffered for nine years with itching piles. After trying many remedies in vain, I began to use Dr. Chase's Ointment and it has entirely cured me." More people have been cured of piles by using Dr. Chase's Ointment than by all other treatments combined. It never fails to cure piles.

THE ORINOCO ASHORE. A despatch from St. Thomas, D. W. I., says: "The British steamer Orinoco, Captain Lang, which sailed from Halifax, October 8, via Bermuda, for West India ports, struck a reef on a bar at Grenada, one of the British West Indies Islands, to-day and remains aground. The vessel is reported to be seriously damaged. The passengers have been landed. The Orinoco is of 1,200 tons and is owned by the Quebec steamship company."

FIGMIES IN EUROPE.

It seems to be tolerably certain that there was once a race of pigmies living in Europe. Discoveries pointing in that direction have been made in three places. Some skeletons were found near Schaffhausen, which measures only 4 1/2 feet. Another skeleton of about the same dimensions found in the same neighborhood has been lately examined after lying neglected in a drawer in a museum for more than 60 years. Similar finds have been made also in the Pyrenees. So long as the first of these discoveries stood by itself the theory that it represented remains of the primitive population carried but little weight. The fresh evidence is tantamount to proof.
