Members Of Dominion Champion Basketball Team

TWO KILLED, MANY HURT AS 'PEG PLAYERS CRASH

The pilot and one passenger, Mike Shea (fourth from left, above) were killed and ten or ten others seriously injured when the aeroplane in which the Winnipegpegg team, was returning from Tulsa, Okla., after a series with the local team, crashed near Neodesha, Kansas. At least ten members of the Winnipegpegg team were known to have made the trip. Eight of the team are shown above. The team (from LEFT TO RIGHT)—Joe Dods; the next two unidentified; Mike Shea, who was

Hard Hitting In Exhibition Tilt

(Associated Press) LOUISVILLE, Ky., April 5—Ben Chapman hit two successive home runs, Tony Lazzeri poked out a homer and triple and George Pipgras and Jimmy Deshong pitched five-hit ball as the New York Yankees blanked the Louisville Colonels of the American Association 9-0 today. Babe Ruth was suffering with a heavy cold and as the weather was bad he played only one inning.

County Line Hockey League

The final play-off game of this league was played in Bedeque Rink Monday, April 3rd between Emerald and Freetown. Emerald won by a score of 3-1, thus taking the series 4-3, thereby winning the Simmons and MacFarlane Trophy. The game was played on very heavy ice and was fairly fast in the 1st and 2nd periods, but the third period was a whirlwind. Freetown being the play from start to finish. Emerald had the edge of the play in the 1st period and scored 3 goals in succession and during the rest of the game played defensive hockey. Freetown's lone counter was scored from a mix-up in front of Emerald's net in the third period. Jim Allen, sturdy Emerald defenseman played an unusually clean game shooting the puck up to Freetown territory at every opportunity. At the close of the game the beautiful Silver Cup was presented to the winning team by the donors, Messrs. Simmons and MacFarlane. The Emerald boys are to be congratulated on winning this beautiful trophy. The line-up is as follows:— Emerald: Goal, W. Smith; Defence, Jas. Allen, Allan White; Forwards, "Bizz" Clow, "Flash" Deacon, Brigham Reeves, Cecil Reeves, Art DesRoches, Elmer Gauthier.

Emerald 3 Freetown 1

The final game of the two game series for the Simmons & MacFarlane Trophy took place at Bedeque Rink on Monday evening, April 3rd, between Emerald and Freetown. The game started at 8:30 p.m. with Referee Clarke in charge. The first period opened with Emerald on the offensive with fast combination play. After five minutes of play Ford scored for Emerald on a pass from Murphy. The Freetown team seemed nonplussed at the heady hockey which the Emerald team were playing and before many minutes had elapsed A. White scored on Ford's rebound. Before the period ended M. White scored the third goal for Emerald on a nice individual rush. On the resumption of play Emerald took things somewhat easier and were content with shooting from their opponents' blue line and breaking up Freetown's attempts to score by close backchecking. The feature of this period was the spectacular poke checking of Fyfe and the sterling work of Allen on the defence. During the third period Freetown made strenuous attempts to score and kept Emerald on the defensive. Freetown efforts were finally rewarded when C. Clow scored from close in after about eight minutes of play. From this stage on Freetown continued to press and had the best of the remaining play and but for stellar goal tending of Smith would have scored again. The final bell sounded with Emerald victorious by three goals to one making the total for the series: Emerald, four; Freetown, three. The cup was presented to Capt. Allen by Mr. Leslie Simmons on behalf of the donors whose generosity has done much to foster hockey in these communities. The lineups follow: Emerald—Goal, W. Smith; Defence, A. White and J. Allen; Centre, M. White; R. Wing, A. Fyfe and D. Murphy; L. Wing, L. Ford and E. Clow. Freetown—Goal, C. Burns; Defence, B. Taylor and J. Taylor; Centre, E. Gauthier and Deacon; R. Wing, A. Clow and C. Reeves; L. Wing, B. Reeves and A. DesRoches. NOTES In addition to his regular duties Goalie Smith kept track of the time by hanging his watch on the net. The Freetown squad were frantically urged to greater efforts by Coach Matheson from the side lines but in vain. Come again Cliff. Coach Ford must be congratulated on the splendid way he handled his team. Good sportsmanship characterized all the games played between these two teams. The Emerald team wishes to thank Hunter River Royals for the loan of their uniforms. Philippine sugar shipments to the United States in 1932 made an all-time record of 931,000 tons, compared with 728,000 in 1931. Before leaving this subject I

NEWSY NOTES BY AGRICOLA

A NEW CONTEST My esteemed friend, Mr. Ludlow Jenkins, of Marshfield, writes to remind me that there are still some books available as prizes in a children's contest such as was carried out last year. Our Editor, always willing to encourage good works, has kindly given permission to make use of The Guardian as before, and the stage is all set for a practical "Bird Box" competition, during spring and summer. Each competitor must put out at least three Bird Boxes, although he (or she) is not limited to that number. When a bird-box is occupied, the contestant must secure the signature of his public school teacher certifying the occupation. This certificate is to be retained till the close of the competition, due notice of which will appear in The Guardian. The contestant will also take observational notes, which together with the certificate, will form the basis for judgment. Such a competition will have several aspects. It will help to conserve our bird life, now sadly depleted. Our smaller birds are disappearing. If we compare the old records with what we see now. The only birds that are increasing are the grackles, starlings and "English" sparrows, and just here I may say that these birds are not eligible for purposes of the competition. Such a competition would interest the teacher as well as the scholar. A good teacher will encourage nature study, since nine out of ten of his or her scholars will spend their lives in the country. It is a meritorious work to help them to be in rapport with their environment. It teaches the scholar several desirable sentiments: kindness to the lower forms of life, and in this case, appreciation of their forms, plumage and song; and this is going to be a pleasure as long as the scholar lives. Now a word about the Boxes: If you have never made a bird-box before, write The Commissioner, Canadian National Parks Branch, Department of the Interior, Ottawa, for a copy of Dr. P. A. Taverner's bulletin on "Bird Houses and their occupants," an excellent little pamphlet with plans and specifications of all kinds of boxes. It, like so many good things, will cost you nothing. For two years I have put out a "Wellesley" box but never had a tenant! The box was regulation size for chickadees, 4 by 4 by 7 inches, with a round entrance one-and-a-half inches in diameter. This year I propose to take the (movable) top off, and to lay the box on its side, leaving the "4 by 4" for the entrance. It will face southwest, and have a slight inclination to keep out rain. One often reads of birds nesting in mail boxes, and perhaps the larger entrance attracts them. Before leaving this subject I must commend "those in authority over us" for putting the bounty on skunks. These animals are very destructive to the eggs and young of our ground-nesting birds, and one cannot begin to estimate the damage caused by the enormous total of 5,500 skunks, now happily defunct. Here we have one cause of the scarcity of our smaller birds. The Horned Owl is also getting the attention it deserves. But a word of warning is in order here. If we shoot off the other owls (excepting the Snowy Owls) we are killing birds of the greatest value to the farmer. Dr. Chas. W. Nash, one of the great authorities on bird life, states that (always excepting the Great Horned Owl) he had never found a trace of a game bird or domestic fowl in any of the many stomachs he had examined in the past fifty years. Dr. Fisher, of Washington, D. C., investigated the contents of several hundred owls' stomachs and found that they consisted mainly of mice, rats and other small mammals, frogs, lizards, and insects, with here and there a trace of small birds. His considered opinion was that owls should be protected. Our young gunners, who are out after the bounty, should make themselves acquainted with the distinctions, so as to avoid shooting the wrong owls. A NEWSY LETTER We are assured on good authority that it is more satisfactory to have a bouquet on one's desk than on one's casket, and I was reminded of this when I opened a letter which read: "Dear Agricola, your Newsy notes are most interesting to me, especially your notes on England. My grandparents were from Devon, and my highest ambition is to see the Old Country! Please give us some more about Stonehenge as I was quite interested in that." "Since a small child I have been very interested in bird life. Last June a pair of American Goldfinches came often to our garden. In the latter part of August and in September they were hourly visitors to my patches of Cosmos, —accompanied by their two children. At first the little ones were very clumsy and could scarcely cling to the branches. Father G. F. paid no attention whatever to the feeding process but sat aloofly by. We imagined that he was very much on guard. The youngsters grew rapidly and both appeared to be males. We could approach within three feet of them without any undue caution. I would urge you to tell the children, who are interested in bird feeding, to plant some of this seed (Cosmos) near the house on purpose for attracting the goldfinches, and they will get a great deal of pleasure out of those lovely little yellow thins! But they'd better strangle the cats, for the

SAINTS LOSE TO FALCONS

With both teams playing a rugged, close-checking game, the Falcons and Saint Dunstan's put on a good exhibition of basketball at the Holy Name Club gymnasium last evening with the "Birds" emerging on the long end of a 49 to 37 count. Lineups and scores: Falcons: Doyle 15, Power 6, Ayers 9, McKenna 6, Harley 9, McMahon 4. Guards: Desjardins 3, Kenney 2. Centre: McDonald 8. Forwards: Trites 12, Dunphy 10, Beaudet 2. Saints: Duffy, Desjardins 3, Kenney 2, McDonald 8, Trites 12, Dunphy 10, Beaudet 2. SECOND GAME In the second game of the evening the Merry Anns won from the Amazons by a score of 25-18 in a fast, closely contested set-to. The lineups: Merry Anns—Guards, Praught, Paquet, Campbell; Centre, Sherry; Forwards, Mallett, Johnson. Amazons—Guards, Clawson, Corbett; Centre, Ayers; Forwards, Bentley, Gay. Referee—Earl Goss.

Dentists... are proud of their own teeth

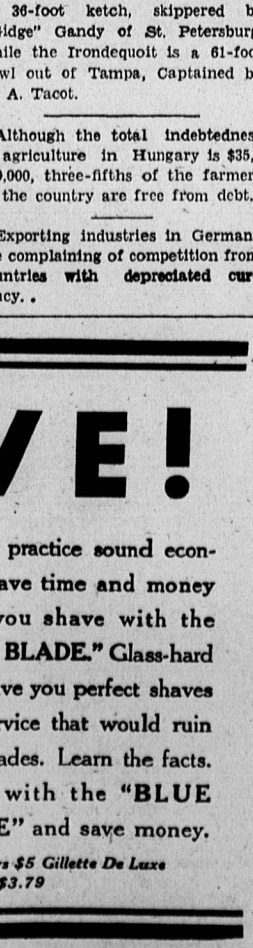

They don't want you to lose yours either. They warn you to care for your gums. To take a look at most dentists, you might be inclined to think that they had chosen the dental profession because they could boast fine, sound, perfect teeth themselves. Your dentist would laugh at such an idea. He knows that his teeth are good and yours will be good—if you start, as he did, to care for your gums in time. More than half of the adult teeth lost are due to that dread gum infection, pyorrhea. When it starts, you never know—and it may take five years, ten years and even longer before it causes the loss of even one tooth. The right time to watch your gums is now, right now. It doesn't pay to ignore pyorrhea. You simply must have professional dental advice about twice a year and when you take up seriously the home treatment of your teeth, it will pay to use a toothpaste perfected by a dentist. Dr. R. J. Forhan devoted a lifetime to pyorrhea treatment. His professional formula is embodied in Forhan's Toothpaste. It's the finest toothpaste money can buy, with an extra-protection feature in its special formula. Don't let pyorrhea get started. Use prevention. Use Forhan's. Use it twice a day—old and young. It's never too early to start the children on Forhan's, the double-duty toothpaste, at all drug stores.

U. S. AMBASSADOR

(Continued from Page 1) disarmament, and in this problem France and Germany are regarded at present as the key nations. Davila already has talked at some length with both Premier Daladier and Foreign Minister Paul-Boncour of France. The co-operation of Germany is regarded as vital if complete success is to be achieved in the move for what has been described as economic disarmament—the removal of obstructions to international trade—which will reach its climax in the World Economic Conference at London this summer. During the day, President Roosevelt received Joseph Connolly a Senator of the Irish Free State, who mentioned the possibility of reciprocal tariff agreements with the United States. The conversation was described as exploratory. Our country we commend; Be Thou her refuge and her trust, Her everlasting Friend. I recollect that we used to sing these words to a rather stately tune called St. Fubert, the production of Henry J. Gauntlett, a celebrated English composer. THAT POLAR BEAR Turned out to be a Sea-cow, and afterwards became a Harp-Seal! He was quite a "quick change artist!" However I am glad it turned out as it did. I do not hold any brief for the Polar Bear, for the bear family generally are a nuisance in many ways, but I should have lamented loudly if my friends at West River had shot a sea-cow (or walrus to be more correct) which is a very harmless critter. The last "sea-cow" to visit us was killed straightaway. That was in 1928, and as these animals are becoming rare in these latitudes (at least it is to be hoped that the next will be received in more kindly fashion. The walrus is easily recognized by the two long recurved tusks, with which it digs up the shell-fish which are its food. The real sea-cow was a native of the Pacific, with its head-quarters in the Behring Straits; but the last specimen was killed in 1768 and the animal is now extinct. Unlike our "sea-cow" this animal actually fed on sea-weeds, hence its name. The whales, dolphins, walrus, the sea-cows proper, the dugongs, manatees and seals, are all Mammalia and are therefore not correctly described as "fishes." By the older naturalists all these creatures were included in the Order Cetacea; but now the seals and seal-like animals are grouped in a new order, the Sirenia. An animal which appears so rarely, ought to receive legislative protection when it does come. There is a long list of extinct animals to man's discredit.
