OUR Fighting WORKERS
GIVE WINGS TO VICTORY

Production of modern war machines is Canada's duty and opportunity — serving now the cause of freedom and developing new giants of industry for Canada's future.

Under the stress of war's necessity our manufacturing facilities are multiplied, our production is manifolded. It is no military secret that Canada has become a major source of supply for planes, as well as tanks, guns and ammunition.

Workers and management, heroically speeding up the number of bombers, fighters and pursuit planes, are playing their part in the battle of production to bring victory.

May the flow of war machines keep ever mounting until the United Nations have achieved victory over international bandits.

Throughout the war, in many forms of special war service, the Bank of Montreal will continue to serve and, when victory comes, the Bank — through its hundreds of branches — will give Canada's workers and business its same dependable service... the outcome of 125 years' successful operation.
