**Central Guardian**  
HOT MEALS SERVED, Wednesday, Thursday and Friday of this week. League of Cross Hall. 31.

**POLICE COURT.**—At the Police Court yesterday morning one drunk had his bail bond estimated and another was fined \$20.00 or thirty days.

**BUYING POULTRY.**—F. J. Holman will commence buying live poultry next Monday Warehouse 224 Great George Street. See ad in this issue. 1612-2-21-11.

**MEETING OF HORSEMEN.**—A meeting of all horsemen will be held in the Charlotte-town Driving Club rooms on Queen Street at 8 o'clock tonight.

**CHICKENS.**—The display of spring chickens shown Saturday and yesterday at Roop's Meat Market received many complimentary remarks. They weighed from four to six pounds each and were raised by Mr. Foster, Marshallfield.

**ROGERS AMUSEMENT COMPANY ARRIVES.**—The Rogers Amusement Company with the largest and best collection of amusement devices ever brought to this province, arrived last night and immediately commenced to set up their apparatus. This afternoon it will be in full working order. It is certainly worth a trip to the exhibition grounds to see.

**LOW ADMISSION FOR CHILDREN.**—In order to encourage the children to come to the big exhibition opening and to attend at night, the management have placed the admission for children under 12 years, at night at 15 cents. Cheap transportation will be provided by motor buses operating every 15 minutes on the return trip during the evenings.

**ENGLISH SETTLERS.**—Another family of English settlers have received their land at Prince Edward Island. They are William Everson, wife and two children of Lowestoft, England. Mr. Everson is an ex-Serviceman and was engaged in farming and fishing. They have taken the 67 acre farm of Benjamin Sensabaugh, Cambridge Road, Murray Harbor North. They came to Nova Scotia a month ago and the Department granted their request for a transfer to Prince Edward Island. This makes eighteen families from the Old Country who have located on the Island since 1925.

**78th BAND WILL ARRIVE TODAY.**—The 78th Regimental Band, which is being engaged to play here afternoons and evenings at the Exhibition grounds, will arrive by the S. S. Hochelaga today. Their repertoire has been received and shows a wonderful selection of music. You are interested in hearing a high class band of trained musicians, listen to the 78th.

**JOHNNY MILES IS COMING!**—Johnny Miles, world Champion Marathon runner and record holder, and James Hawbold, who will take part in a 5-mile championship match race at Exhibition grounds Friday afternoon, will arrive by the S. S. Hochelaga today with their trainers. Great interest is being taken in Miles appearance here, and there is no doubt that a record will be set here on Friday. Everywhere he has performed enormous crowds have turned out, for instance at Sydney two weeks ago where 12,000 people went well over him.

**FOREIGN HORSES ARRIVE.**—The last of the foreign horses for our Exhibition races arrived in the city last night. The 1926 entries for the various competitions, for which are now being received by the Show Secretaries, are in former years the finest of live stock along with farm produce of the best quality will be exhibited by the Provincial farmers. In addition numerous entries have been received from the sister provinces, thus adding greatly to the keenness of the competition. Horse racing has long been an outstanding feature of this Exhibition and it is to be expected that the splendid record of the Association kept for conducting meets in the past. It is a unique fact that the managers have managed to balance its classes year after year in such a manner as to bring out the keenest competition. This year it is stated that one of the best entries ever secured is already in the hands of the Secretary.

**MITCHELL — McDONALD WEDDING.**—A very pretty wedding took place at St. Bonaventure's Church on Wednesday morning, September 21st, when Miss Helen Mitchell, daughter of Mr. and Mrs. Ambrose Mitchell of Riverside, was united in holy bonds of matrimony to Mr. Elton McDonald, only son of Mr. and Mrs. Daniel A. McDonald, Scotchfort, the ceremony being performed by Rev. J. B. McIntyre, P. P. The bride looked charming in a gown of navy blue crepe de chine and black hat. She was attended by her sister, Miss Mary Mitchell who wore a georgette dress of ashes of roses. The groom was supported by Mr. W. B. Fitzpatrick. After the ceremony the happy couple motored to the home of the bride where a sumptuous breakfast was served to all the relatives and friends. They received many useful and beautiful presents which testifies to the popularity of the young couple. A host of friends wish Mr. and Mrs. McDonald every happiness and success in married life.

**ANTIGONISH, Sept. 17.**—Mrs. Sarah MacLean, of Ohio, Antigonish County, aged 98 years, passed her first vote on Tuesday, for Hon. John C. Douglas, former Attorney General of Nova Scotia, who was the successful Conservative candidate in Antigonish-Guysborough. Mrs. MacLean is a sister of the late Senator Miller, and it is doubtful if in all Canada any elector ever advanced in years exercised the franchise in the recent Federal General election.

**TO QUEEN'S CO. ELECTORS**  
Ladies and Gentlemen: We take this opportunity to thank you for the splendid support you gave us on the 14th inst. Our thanks are especially due to the Ladies to whose exertions we are indebted for the large vote given us. We failed to secure the majority we had expected but we are confident that in the future we will win and we accept the situation with gratitude for the many evidences of good will and the active support tendered us.  
Yours respectfully,  
J. H. MYERS,  
J. A. MESSERVEY

**Friends Exchange Jokes 9,000 Miles By Radio**  
NEW YORK, Sept. 19.—The sharpest of the world through the use of radio and telegraph has permitted two Pathé News cameramen to maintain an intimate friendship for seven years. Though their work often kept them actually "a world apart," this practice of the "buddies" only came to light recently when they were so far separated that their messages, words and jokes had to be relayed through their home office. In Tropics and Arctic. The men are Charles Charlton, Expedition in Tanganyika Territory, East Africa, and Maurice Kellerman, with the George Putnam Expedition on the schooner Morrissy off Ellerslie Island, near the Arctic Ocean, hunting the walrus. The most recent message sent from Charlton to Kellerman follows in parenthetical form but otherwise as it appeared on the cable: "Greetings Kelly. Hope you have your walrus and are 100 in temperature here around 100 in the blue. Have just returned from 32 days safari. Charged four times rhinos. Get corking stuff, also horns in leg. Mann (Dr. Williams) lions also herd buffaloes, Okeh, except native bearers hunt, also one Boer hunter recovering in hospital. Leaving now, re fill five day distant for elephant, rhino, hippo. Mann joins me regards Putnam and bunch." Kellerman's Reply. Soon after this message was relayed Kellerman answered with the following one: "Your wire great stuff but will back hard of wild walrus against me. Check pole bear, caribou seals all plentiful up here. No eskimo wives yet but Inuyghit offers let me adopt four children. Temperature twenty-eight. Hope to be home next month and thaw out." The men will meet each other in a temperate climate in the Fall, remaining until their difficult as-

**Sandringham Is Much Changed**

LONDON, Sept. 15.—While the King has been spending his holiday in the North of England the Queen has been busy at Sandringham with a housemaid's duster.

Queen Alexandra's old home is undergoing extensive renovations than have ever been carried out since King Edward purchased it in 1862, a year before his marriage. Queen Mary has been staying at York Cottage for charity, while she has been personally superintending the work of an army of cleaners and decorators who are transforming Sandringham from a Victorian to a modern mansion. "The Queen cannot stand idly by while others work" said a Sandringham household servant. "Each day she has been at work, duster in hand, dealing with the painters and other ornaments as they are taken from the walls."

**MANY CHANGES**  
The transformation of Sandringham began a month ago, and will be finished in time for the King's visit for the shooting in October. Queen Alexandra, during the last years of her life would have nothing changed at Sandringham. She wished the house to remain as it was when King Edward made it for her.

The apartments of King Edward and the Duke of Clarence remained until her death exactly as they had left them; to her they preserved memories too precious to be violated. Even the silver and coppers that the Duke of Clarence carried in his pocket at the time of his last illness, more than thirty years ago, lay on the dressing-table of his bedroom. Queen Alexandra believed that people after her death would value them and that they would provide money for charity.

The whole interior will be brighter for the sombre colorings of six years ago will be replaced by hangings that will let in more air and sunshine. The carpet and the furniture have been cleared out, and there have been considerable alterations in the library. When King Edward married, one of his first acts was to pay a pretty tribute to his beautiful bride by decorating the ceilings of some of the rooms at Sandringham with Danish wood carving. All this is now being taken away and replaced by more modern decorations.

**BRIGHTER ROOMS**

All this is now being taken away and replaced by more modern decorations.

**Uncle Tom's Cabin Now Being Filmed**

UNIVERSAL CITY, Cal., Sept. 17.—Film producers have begun making pictures to be viewed by posterity and posterity is not to escape "Uncle Tom's Cabin." The company now engaged in filming Harriet Beecher Stowe's classic, will shoot one negative of the picture for the Smithsonian Institution at Washington. This is to be sealed away in an airtight vault years from the date of its deposit there. The film is to be used in the Smithsonian's new museum which will be opened in the early days of September.

**Many International Meetings**

GENEVA, Sept. 18.—How steadily Geneva is increasing in importance as the centre of international activities is shown by the large number of conferences which will be held in the early days of September.

As far back as 1867 the first World Congress of Peace was held in Geneva on the suggestion of Victor Hugo whilst the great French writer was under exile by Napoleon III. Great figures in the liberal life of European participated at this great Congress, and the people of Geneva acclaimed enthusiastically the Italian patriot Garibaldi as he arrived at the railroad station. So delicious indeed was the welcome that the multi-tude unthatched the horses from his carriage and themselves triumphantly conducted Garibaldi down Rue du Mont Blanc to his hotel.

It is regarded as significant by many people that this year's congress will concentrate upon economic problems, thus giving the impression that international peace is more in danger from economic conflicts than from direct political dissensions. Customs tariff questions, fluctuations in exchange rates, more in the agenda, while both figures on the agenda, while in a broad way will be discussed the question of the sovereignty of states, believed by many to present a widely different aspect in modern days, when people of various nations are more dependent one upon another, than they were when Garibaldi came to Geneva.

**Why millions of women look for this Gold Seal—**

More than a trade mark! More than a guarantee! The Gold Seal pasted on every Congoleum Gold Seal Art-Rug stands today in the minds of millions of women for floor-covering of proved satisfaction.

These women realize that it is utterly impossible to tell the quality of felt-base floor-covering simply by looking at it. But with the Gold Seal as an un-failing guide, even the most inexperienced buyer can easily and confidently select the brand whose service record has been winning and holding the confidence of housewives for many years.

**New Medical Science Forecast**

NEW YORK, N. Y., Sept. 14.—Wars of the future may bring about the development of an entirely new medical science in the operation of a veteran army surgeon of seven campaigns.

Former Major Louis Livingston Seaman, who has served in every American campaign since the Spanish American war and in the armies of Japan and Belgium, sees in the development of chemical warfare a new enemy for the medical world to tackle. Soldiers' wounds in future wars, said the 76-year-old veteran probably will be of a nature little known today.

Major Seaman who recently returned to his home in New York after a tour of Europe as president of the American Surgeons Travel Club, traced the development of army medical science as he observed it.

The greater knowledge of antiseptics today was cited as medical science's greatest stride in saving the lives of those brought down in battle.

"Where raw carbolic acid, available on rare occasions, formerly was the best that medical science could use in mortifying gunshot and sword wounds," he said, "today a whole gamut of antiseptics can be brought to the aid of nature in keeping a wound clean."

"Though wounds are worse now than formerly, they are in many ways more merciful. Unless man is torn to pieces by the cruel new inventions of war and killed instantly, the newer knowledge of medical treatment may hope to save him."

Better feeding of modern soldiers has been a principal factor in reducing mortality among armies, he said. "Good rationing has cut down the deaths from preventable war-time diseases almost to nothing."

anese soldiers besieging Port Arthur on an insufficient diet of polished rice alone, were dying in the most horrible torment of beriberi. Within the town the sieged Russians, living on canned meat and dried foods, starved, and died of scurvy. Almost overnight the lesson was brought home, when the siege at an end the two armies exchanged food-stuffs, and the death rate dropped to a negligible point."

**DEPARTMENT OF AGRICULTURE OFFICE OF SEED COMMISSIONER**

**REPORT OF FIELD INSPECTION OF TURF GRASS SEED CROPS**  
For the information of Canadian and U. S. Seed Merchants.

Brown-top (Agrostis tenuis Sibth.) Agrostis vulgaris (Wth.) is prevalent in Prince Edward Island, Nova Scotia and New Brunswick. In some localities it grows naturally almost to the exclusion of other grasses. Field inspection is necessary because on some farms turf weeds are so plentiful as to destroy the utility value of the seed crop, and in some districts American-grown timothy seed has carried Redtop as an impurity.

The report of seed crop inspection includes a statement of the kinds and prevalence generally of especially those with seeds difficult of separation also the percentage purity of the Brown-top and the varieties of other grasses present. All fields are condemned if they contain over five per cent Redtop, which is readily distinguishable after heading and during the blooming period.

The quantity of Brown-top seed produced in 1925 was 200 lbs., in 1924 about 3,000 lbs., in 1925 over 17,000 lbs. The field inspection returns for this year indicate that the 1924 about 1925 was generally well, and the quality generally good, and the quantity per acre will not exceed 30 lbs. of cleaned seed.

All the growers are members of the Grass Seed Growers' Association. The National Herbarium, has supervised the identification of species and there is probably a source of supply of fine turf grass seed available in any part of the world that is as dependable in respect of kind and quality as the 1924 about 1925 was generally well, and the quality generally good, and the quantity per acre will not exceed 30 lbs. of cleaned seed.

All the growers are members of the Grass Seed Growers' Association. The National Herbarium, has supervised the identification of species and there is probably a source of supply of fine turf grass seed available in any part of the world that is as dependable in respect of kind and quality as the 1924 about 1925 was generally well, and the quality generally good, and the quantity per acre will not exceed 30 lbs. of cleaned seed.

ation, which owns and operates at Charlottetown. Prince Edward Island, a central cleaning plant specially equipped and organized for receiving, cleaning, sacking, storing and marketing turf grass seeds. The Dominion Seed Branch assumes full responsibility for the inspection of the seed crops and for the grading and sealing of the cleaned seed, but have no control over and are in no way responsible for the business affairs of the association. The growers are, however, well experienced in the sale of their products on a co-operative basis and we believe their business methods proved quite satisfactory to the seed trade last year.

The Brown-top crop is now being harvested but the cleaning plant will not be in operation before October. Each seed lot is received separately with a declaration from the grower inspected by our officers. Samples of the cleaned seed are finally drawn by the inspector, analyzed and graded at the Ottawa Seed Laboratory, and sealed in the sack with a metal seal behind which is placed an inspection tag certifying as to the grade and the field inspection. The grade is, however, omitted when the seed is sold for export on actual sample.

A few hundred pounds of Velvet (Agrostis canina) will be available to the trade this year, also small lots of true Creeping Bent (Agrostis stolonifera var. compacta) and of Seaside Bent (Agrostis maritima). Dr. M. O. Malte, Chief Botanist of the National Herbarium, has supervised the identification of species and there is probably a source of supply of fine turf grass seed available in any part of the world that is as dependable in respect of kind and quality as the 1924 about 1925 was generally well, and the quality generally good, and the quantity per acre will not exceed 30 lbs. of cleaned seed.

**TWICE-A-DAY**  
REMOVE FILM FROM TEETH IS PRESENT-DAY DENTAL ADVICE

The FILM ON TEETH to which Most "Off-Color" Teeth and Many Serious Tooth and Gum Disorders are Ascribed

BECAUSE tooth and gum disorders are now scientifically traced largely to a film that forms off-teeth, which ordinary brushing fails to remove successfully, a radically different way in tooth cleaning is being widely adopted. Run your tongue across your teeth and you will feel a film—a slippery, viscous coating. Film absorbs discolorations from food, smoking, etc. That is why, according to leading dental opinion, teeth look dingy and "off color." Film clings to teeth, gets into crevices and stays. It invites and breeds the germs of decay. And that is why it is judged so grave a danger to the teeth by authorities. Film is the basis of tartar. And tartar, with germs, is the chief cause of pyorrhea. That is why regular film removal is urged as probably the first in correct gum protection. Most dental authorities urgently advise thorough film removal at least twice each day. That is, every morning and every night. For that purpose, obtain Pepsodent, the special film-removing dentifrice which leading dental authorities favor. Different from any other tooth paste. Pepsodent curdles the film, then removes it; then polishes the teeth in gentle safety to enamel. It combats the acids of decay and scientifically firms the gums. It multiplies the alkalinity of the saliva. And meets, thus, in all ways, the exactments of modern dental science. On dental advice, people are adopting this new way of tooth cleansing. Obtain Pepsodent, the quality dentifrice, at drug stores. Two months' supply at a moderate price—or send coupon for 10-day trial. Use twice every day. See your dentist twice each year. Make both a habit.
