STOCK QUOTATIONS

Slight Gains Registered On N. Y. Market

NEW YORK, March 14 — Light buying in so-called armament stocks gave the market a recovery tinge today and, despite a little profit selling, leaders closed with gains running to a point or more.

The Associated Press average of 60 issues was up .4 of a point at 42.7. Transfers totalled 427,950 shares against 769,950 last Friday.

War talk subsided in the boardrooms, following Germany's absorption of Austria but attention was turned to stocks of companies manufacturing arms materials on the theory recent European moves, although hardly likely to bring an immediate outbreak of hostilities, would result in expansion in military preparations.

Steels, aircrafts, coppers, rubbers and specialties were prominent throughout, but rails, oils and utilities were content to jog along with moderate advances.

Gains outweighed losses on a generally inactive Canadian list. International Nickel advanced a point to 49. Fractions ahead were Distillers-Seagram, Dome, Marconi, and Imperial Oil. Lake Shore, Hollinger and Walkers were easy.

Helpful was an upturn of 2.2 points in this week's steel mill operating rate, the best showing in some six weeks. Signs of improvement in the automotive field were discernible. Carriers were inclined to go easy pending tomorrow's White House transportation conference.

TORONTO, March 14 —(CP)—As the annual meeting of the Canadian institute of mining and metallurgy got under way today, Hon. Michael Dwyer, Nova Scotia's minister of mines and institute president, told interviewers Nova Scotians are convinced there is gold in the mines of that province that can be taken out at a profit.

"The modern methods allow profitable working of ore that was too lean for earlier wasteful methods," Mr. Dwyer said. At the same time he said Nova Scotia's gold production has increased 5,000 per cent in the past four years.

Last year the province turned out 20,000 ounces of gold and production this year will be still bigger, said Mr. Dwyer. At the convention here he is interested in new cyanide and flotation processes which may make it possible to work mins that otherwise would be unprofitable.

"We gave the rest of Canada some good business men, and now we're giving you some good miners." he chuckled as he told of the Nova Scotia mining-training courses for young men.

"We are convinced there is gold in Nova Scotia that can be taken out at a profit. The modern methods allow profitable working of ore that was too lean for earlier wasteful methods."

In his presidential address Mr. Dwyer reviewed progress in the mining industry. He particularly was impressed, he said, with "the growing awareness of mining engineers of that liability known as depletion."

THE WRONG SORT OF CREASE

So often when a suit comes home from the tailor, the trousers are hung over the bar of the coat hanger and a crease cross-wise of the trousers is formed. If you haven't sufficient trouser hangers so they may hang straight down, place a cardboard from a laundered shirt over this bar and then slip the trousers through. They will stay in the correct press with no evidence of a cross crease.
