A Dollar Can't See Through a Telescope

When it comes to a long distance venture like saving for the future, dollars alone can't see very far ahead.

Left alone, dollars are lazy by nature. They just lie around in people's pockets until they are spent.

But the moment a dollar is paid on a life insurance policy, it starts to work.

The hundreds of millions of policyholders' dollars invested in Canada today are performing a three-fold service:-

- 1. They are setting up financial protection for the policyholders' old age or the future security of their families.
2. They are backing Canadian fighting men wherever our forces are in action.
3. Their investments now for future use, are, meantime, as a brake on consumer spending and so helps to fight inflation which would menace our fighting men and civilians alike.

Actually life insurance dollars are among the busiest dollars in the world.

Such dollars are never idle. They are always circulating for the benefit of all.

It is good citizenship to own LIFE INSURANCE
