Edward ("Eddie") Coleman may well be called Nova Scotia's unluckiest child. Only seven, he has been the victim of 22 accidents. He has had a double fracture of the right leg, a fractured skull and a number of other less serious injuries. His twenty-second accident was the most tragic of his life. A car ran him down on June 30 and his leg was in a cast for months. Now the leg is almost back to normal, but his eyesight was affected and to-day he is totally blind.

Cattle hides used by the leather industry in Canada during 1933 weighed 69,867,012 pounds; calf and kip skins, 12,510,117 pounds; and pickled sheep skins, 3,621,305 pounds. The cattle hides were 72 percent of Canadian origin.

U.S. Rich In Forest Resources

By Howard W. Blakeslee, Associated Press Science Editor (By Guardian's Special Wire)

SAVANNAH, Ga., Nov. 28.—The dreams of richness in the forest resources of the United States South more than come true in a government report just received here. The report indicates, according to paper experts here, that there is enough pulpwood in the discarded pine of the naval stores industry in Southeast Georgia alone to supply two-thirds of the annual newsprint needs of the United States.

The report is made by the southern forest survey staff, under charge of regional director L. F. Eldredge of the Southern Forest Experiment Station, New Orleans. It covers the supply of pulpwood in unit No. one, which embraces 35 counties of Georgia.

This is part of a national survey authorized by Congress. The report states indications are for 29,703,000 cords of pulpwood from pine in unit No. one and 16,263,000 cords of pining hardwood.

Believing that naval stores will continue to lay first claim to the trees producing turpentine, the survey further estimates the amount of pulpwood left in these trees for commercial use after they have been worked out for naval stores. This figure is 11,094,000 cords.

That is enough, together with the trees discarded each year by the naval stores industry, for two-thirds of the annual newsprint needs of the United States, says Dr. Charles H. Herty, director of the pulp and paper laboratory of the Industrial Committee of Savannah. It was the Savannah laboratory which announced recently that southern pines can make sulphite newsprint as well as other grades of white paper.

"All of this source of supply," Dr. Herty stated, "is within 100 miles of the seacoast. Not one tract there is more than five miles from an improved highway or trucking."

The New Orleans report is printed on white paper made from southern pines by the sulphite process. It is bound in kraft paper made from southern pines by the sulphite process.

Micmac Chief's Final Word

(C. P. by Guardian's Special Wire)

TRURO, N. S., Nov. 27.—Micmac Indians may resort to white men's courts for litigation but they still reserve the right of dispensing justice in their own way. Mike Paul,

an interloper at the Truro reservation, today prosecuted John Abram a regular tribesman and won case before Stipendiary Magistrate Harold Putnam. Abram was fined \$1 and costs for assault.

But it was pyrrhic victory. Paul. As soon as the court formalities were out tribe chieftain Geo. Julien curtly told him to leave Truro reserve and go back to his date with the Pictou Indians, whence he came.
