The hall at Eldon was crowded Tuesday night at the well attended political meeting. The speakers were, in order, Messrs. Warburton, McLean, Prowse, Nicholson and K. J. Martin.

It is reported that Duncan Martin, a native of Eldon, has discovered a large deposit of magnetic iron ore of great value at Seymour Inlet, an arm of the Pacific about two hundred miles from Vancouver. The ore, it is said, can be easily obtained and the expense of bringing it into Vancouver will be only nominal.—Exe.

The residence of Benj. and Mrs. Newton, Kingston, was the scene of a pleasing event of more than usual interest on Wednesday, 23rd of July, the occasion being the marriage of their daughter Thankful Irene to the Rev. Lemuel E. Ackland, formerly of Hampshire but now the beloved pastor of the Bridgewater Baptist Church at Bridgewater, Mass.

Promptly at eight o'clock the bride, who was unattended, entered the parlor leaning on the arm of her father. The wedding march was played in excellent style by Mrs. T. Stretch of Long Creek her ability in that respect is unsurpassed. Rev. E. P. Calder of North River tied the nuptial knot after which the happy couple received the congratulations and best wishes of their many friends and relatives. A bounteous supper was partaken of shortly after the ceremony to which all present did ample justice. Both bride and groom received many beautiful and costly presents from friends, chums and classmates abroad who kindly remembered them. Supper being over games and music and pleasant conversation were indulged in by all present. The arrival of a chequer party company added variety to the enjoyment of the evening, although they were noisy they behaved in a ladylike and gentlemanly manner and after being kindly treated quietly dispersed. Mr. and Mrs. Ackland left the following Friday for their new home followed by the best wishes of many friends.

W. S., the P. E. I. correspondent of the Farmer's Advocate in a recent issue of that journal says: During a recent visit to the Experimental Farms at Charlottetown we noticed great improvements along all lines. A much extended number of experiments are being carried out this year in grains, vegetables, clovers and grasses. Superintendent Clark is getting things in shape this season. Quite a large piece of alfalfa was cut and cured for hay over four weeks ago. It was a good yield, and is now showing a splendid growth of second crop. Possibly farmers may learn from the success with this great forage plant on this farm that it will succeed anywhere on the Island. This farm is beginning to attract attention, and the number of farmers visiting it is increasing rapidly. Speaking on cheese he reports that "Cheese has touched the highest point ever reached here at this time of the season, 12 3-16 is a record for July cheese at our Cheese Board. Such prices as these will encourage the dairymen to do more intelligent effort into the profitable production of milk."
