Bought Poached Tignish Lobsters On Breakwater

Commission To Adjourn Tonight. Will Reopen Investigation 3rd Week Of May.

Six persons were buying illegally caught lobsters on the breakwater at Tignish last Fall it was revealed before a Royal Commission at Alberton yesterday probing the illegal fishing of lobsters and smelts during 1936 by Frank Peters, Tignish fisherman. Mr. Peters stated that lobsters were purchased both during the day time and at night last Fall during the closed season.

It was announced last night that the Commission which had been sitting here since Tuesday of last week would adjourn this evening for ten days or more in order that Mr. Justice A. T. LeBlanc, the Commission might hold a Court Session at Dalhousie, N. B. starting on Tuesday next. The Commission will return to Alberton probably the 3rd week in May and in addition to further sessions there will also be sittings at Tignish, O'Leary, Summerside and Borden.

Eight witnesses, placing the total number heard here to 53 and the total since the Commission started at Newcastle, January 7th to 314, were heard yesterday.

The first witness called yesterday morning was Hubert Gaudet, Tignish fisherman who stated he had been fishing for the past 25 years. He poached last year in partnership with Ferdinand Gaudet, and the pair had sold their catch to John McInnis. Four years ago witness told Commission Counsel, H. F. G. Bridges, that he had canned in the vicinity of 28 cases of lobsters illegally but had not canned any since that time.

"How many boats have you seen fishing in Tignish last Fall?" "I have seen ten or fifteen boats but I do not know that they were fishing lobsters."

He stated his catch was usually landed at the Tignish breakwater at night.

Frank Peters another Tignish fisherman followed to the stand and stated during the past 15 years he had poached lobsters and smelts. He had fished illegally with Wm. Peters in 1936 and their total catch of approximately 4000 lbs was sold to C. F. Morrissey.

"Where did you land your lobsters?" "The Tignish breakwater."

"Did you know C. F. Morrissey was operating a cannery during the closed season last year?" "I had an idea he was."

"How many buyers were there on the breakwater at Tignish last Fall?" "There were six."

"Who were they?" "C. F. Morrissey, John Gavin, John McInnis, R. McRae, Osborne Lefurgey and Emmerson Matthews. These men were not there all the time but I know that number bought there at intervals."

"Do you know Frank Doucette from Rexton, N. B.?" "Yes."

"He told us in Buctouche that he had seen you selling lobsters to Geo. McRae on the breakwater at Tignish last Fall; is that correct?" "Well George McRae weighed lobsters for me there for John Gavin."

"Is it true that you and other fishermen at Tignish took up a collection for Doucette?" "Yes."

"Was that to keep him quiet so that he would not tell all he saw?" "No it was to get him something to eat."

The witness said he had never heard Capt. Arsene Gallant a patrol boat Captain state he would go back poaching if he lost his job and he did not think Capt. Gallant poached lobsters last Fall.

Jerome Doucette, Pleasant View lobster packer was the third witness this morning and he told of catching 80 boxes of illegally caught lobsters in 1936 in an empty house and of handling in addition some 168 boxes of illegally canned lobsters which he bought from different persons. The entire number were sold to J. H. Myrick Company at Tignish. Mr. Doucette said he felt the shifting of the line separating districts 7 and 8 would be beneficial to the fishermen on the West side and expressed the opinion it would stop illegal fishing in that territory.

"Did you ever hear of Edmund Melanson's boat having been over here buying lobsters?" "No but there was a boat over here from New Brunswick three or four years ago trying to trade run for lobsters."

Joseph Doucette, brother of the previous witness and himself a lobster packer at Pleasant View, stated he had men poaching lobsters for him for the past several years. Last Fall his pack was between 25 and 30 cases. This year it was one half that number. The lobsters had been sold to J. H. Myrick Company at Tignish and a few cases to H. W. Tidmarsh, Charlottetown. They were transported without permit.

"It there more poaching now than years ago?" "Yes more during the last five or six years."

The first witness in the afternoon was Hector Richards, Tignish, who stated he had never poached or canned lobsters illegally in his life.

LABORER LEADS CROWNING PARTY FROM ANTIPODES

LONDON, April 20—(OP)—Heading New Zealand's delegation to the Coronation and the Imperial Conference in May is the Labor prime minister, Michael Joseph Savage, known generally as "Joe" Savage.

Regarded even by his political opponents as one of the most brilliant men in New Zealand politics today, Prime Minister Savage is 65 years of age. He was born in Benalla, Victoria, Australia.

First becoming prominent as deputy leader of the parliamentary Labor party, he followed a famous New Zealand statesman, Harry Holland, in the leadership in 1933. For 17 years he has been M. P. for Auckland West.

Since 1935 Mr. Savage has been prime minister, minister of external affairs, native minister, minister for Cook Islands and minister in charge of Native Trust, Legislative, Electoral, Audit and High Commissioner's Departments, which should give him plenty to do.

His experiences in the rough and tumble of political life have left him somewhat reserved in disposition, but with a quiet charm and engaging humor, most of which is the fruit of companionship of common men engaged in the humbler tasks of his early days.

Walter Nash, New Zealand's minister of finance, also of the delegation, is well known in world conferences at Geneva and elsewhere. He has had a good deal to do with the growth of the chain-store business in New Zealand. Born in England, he has lived in the Dominion "down under" for more than 25 years. He is a devout Anglican, vice-president of the Church of England's Men's Society. His leisure is devoted almost entirely to the study of International affairs.

William Joseph Jordan, high commissioner for New Zealand in London, third member of New Zealand's delegation, was born in the London postal and police services. His career in New Zealand was almost as varied until he became first secretary of the Labor Party in 1907 and president in 1932. He served with the New Zealand

X-Ray Machine Sees Around Bones

By STEPHEN J. McDONOUGH
Associated Press Science Writer
ST. LOUIS, April 21—(AP)—A new x-ray machine, which "sees around" bones and takes accurate cross-sections of any tissue of the body at any depth, was demonstrated today for the first time to members of the American College of Physicians.

The machine "makes possible what has hitherto been impossible," Dr. Sherwood Moore of the Edward Mallinckrodt Institute of Radiology of Barnes Hospital said, since pictures can be made of a layer of tissue to an accuracy of about one-third of an inch.

X-Ray pictures now made are a mass shadow of all the organs of the body of of an entire arm or leg, with many parts partially or wholly obscured.

To demonstrate the delicate focus of the machine, called a "lamina-graph," Dr. Moore showed the first picture ever made of the breast bone of a person. Formerly it was impossible to obtain such a picture because the spine obscured the rays. The device also will take an accurate photograph of the marrow through the solid part of a bone or of the spine without interference from the internal organs.

It is theoretically possible, although no such attempts have been made yet because the machine is so new, to photograph any section of the brain, to look at the inside of the liver, stomach, gall bladder or other organ and to locate accurately and determine the condition of tumors, cancers and other growths.

Some of the group hailed the device as the greatest single step since the discovery of x-rays by Wilhelm Conrad Roentgen in Germany more than 40 years ago.

Jean Kieffer, 37-year-old superintendent of the mechanical laboratories of the Connecticut State Tuberculosis Hospital at Norwich, Conn., invented the apparatus.
