**Grandmothers Fly To Washington**

OMAHA, Neb. Jan. 24.—Mrs. H. Wheeler, of Lincoln and Mrs. Draper Smith of Omaha, electoral college delegate and alternate, respectively, left here this afternoon on an airplane flight to Washington to deliver the state's eight Republican electoral votes at the national capitol. Mrs. Wheeler is 55 and Mrs. Smith is 66 years old. Both are grandmothers.

**Jews Walking To Palestine**

LONDON, Jan. 24.—So eager are certain classes of European Jews to get to Palestine, their new national home, that many are actually walking there from the Ukraine, drifting into the country via Constantinople, said Sir Alfred Mond, the first Commissioner of Works in the British Cabinet, who has just left London for a visit to Palestine.

"There is," he continued, "an immense amount of work to do. The housing shortage is worse than here, and the country has practically to be rebuilt from the beginning. If plans are properly worked out we could provide for three to four million people. Preparations have to be made for those Jews who want to go and, in fact, we have to make Palestine fit to be the home of the Jewish race."

Sir Alfred said that he did not anticipate religious difficulties. There was already a good deal of co-operation in commercial matters between the Arabs and the Jews and the population would improve with the advance of the country.

**ABBIES ADD ANOTHER TO THEIR LIST OF TRIUMPHS**

Defeated the Sackville Team Last Night by Six Goals to Four, Finishing Like Racehorses.

**THE ABBIES IN ACTION**

The Abegweits of Charlottetown wound up their trip abroad in a blaze of glory when they met and defeated last night in the rink at Sackville the swift hockey septette of that town by the substantial score of six goals to four.

It was a tip-top demonstration of the art of playing the game ably and playing it to win.

The first period was very close—one all.

In the second things looked decidedly rosy for Sackville who piled in three tallies to the Abbies one, making that chapter of the story read 4-1.

In the third period the Abbies decided it was about time to let their good brethren from beyond the straits see that they still retained a knowledge of the rudiments of the game. They aroused themselves like giants refreshed with wine—or excuse us—ginger beer—and then things began to happen. The scores began to fall thick and heavy. It was this way—

Two minutes—Score by Whacky McEachern.

Nine minutes—Ditto by L. Campbell.

Ten minutes—More ditto by Ditto.

Fifteen minutes, Ditto by Gordon—he with the sweet sounding handle to his cognomen.

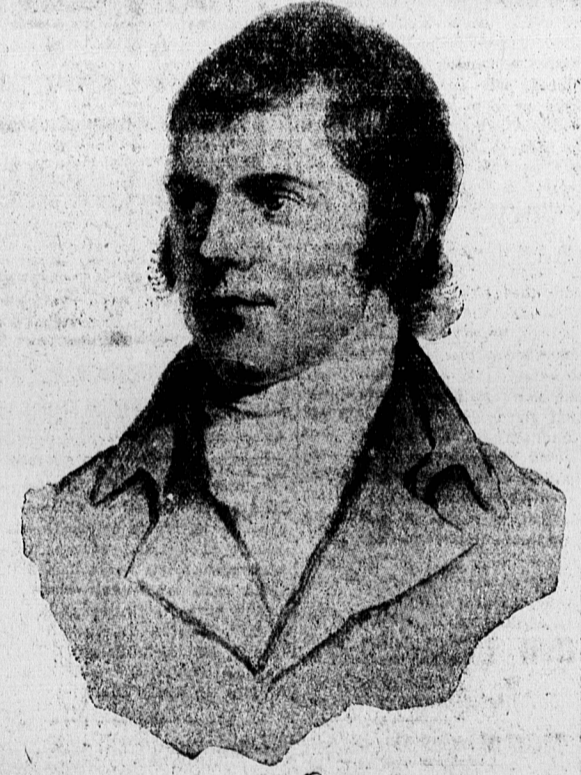

Nineteen and a half minutes—Grand finale touch by Chick Williams.

According to our best authority the Abbies finished like young race horses and skated everything off their feet.

This the score ran—6 to 4. Welcome home, fellows!

**Robert Burns**

On the 25th of this month 100 more universal celebration will take place than that of the anniversary of the birth of the immortal Robert Burns. On that day in the year 1759 "a blast of Januar win" blew tansel, in on Robin, in a small cottage near Ayr, Scotland. His father, William Burnes or Burns was a small farmer and a man of considerable force of character. Burns' youth was passed in poverty and hardship which left traces in a premature stoop and weakened constitution. His father, constantly unfortunate, migrated with his large family from

married) combined with the want of success in farming led him to think of going to Jamaica as book keeper on a plantation. From this he was dissuaded by a letter from Dr. Blacklock; and at the suggestion of his brother, published his poems. The volume was printed at Kilmarnock in June 1786, and contained much of his best work such as "The Two Dogs," "The Address to the Deil," "The Cottar's Saturday Night," "The Mouse," and "The Dug," many of which had been written at Mossgell.

The success of the work was immediate, the poet's name rang over Scotland, and he was induced to go to Edinburgh to superintend the issue of a new edition. There he was received as an equal by the

**A Kidney Remedy**

Kidney troubles are frequently caused by badly digested food which overtaxes these organs to eliminate the irritant acids formed. Help your stomach to properly digest the food by taking 15 to 30 drops of Extract of Roots, sold as Mother Selig's Curative Syrup, and your kidney disorder will promptly disappear. Get the genuine.

**Exposure Aches—Rheumatic Pains**

**SLOAN'S LINIMENT, KEPT HANDY, TAKES THE FIGHT OUT OF THEM**

Shaking around in the wet and then—the dreaded rheumatic twinge! But not for long when Sloan's Liniment is put on the job! Pains, strains, sprains—how soon this old family friend penetrates without rubbing and helps to drive away. And how cleanly, too—no muss, no bother, no stained skin or clogged pores. Muscles, lumber, lumbago, sciatica, neuralgia, backache are promptly relieved. Keep a bottle handy. Get one today if you've run out of Sloan's Liniment. 35c, 70c, \$1.40. The largest bottle holds six times as much as the smallest. Made in Canada.

**President Wilson Sends a Note**

WASHINGTON, Jan. 24.—President Wilson has despatched to the Allied nations a note in connection with the request to him to fix the boundaries of Armenia, it was learned today. The President, in his communication, is understood to have requested co-operation in the task he has accepted.

When the Allies asked President Wilson to fix the Armenian frontiers they agreed thoroughly to cooperate. With this assurance the President proceeded by appointing Henry Morgenthau as his representative. He then asked the Allies to suggest how the subject should be approached.

No suggestions from the Allies have been received in response to this request practically for instructions, except one from Lloyd George that the President might discuss the matter with the Allied commissioners at Constantinople. This method was not regarded by the Government as conducive to results.

The best opinion is that the President already has indicated to the Allies that he may take up the boundary question with Turkey. This Government previously has advised the Allies that, as the United States assisted in the defeat of Turkey, it has the right to be heard on any treaty settlement by the Allies with Turkey which involves partition or rearrangement of territory. That includes Armenia.

the farm suffered and he gave it up in 1791. At this time he was writing of his best, "Tam O' Shanter" which some consider his masterpiece, being written in 1790.

He was offered and declined an appointment in London on the staff of the "Star" newspaper. After giving up his farm he removed to Dumfries. Being requested about this time to furnish words for the "Melodies of Scotland" he responded by contributing over 100 songs on which perhaps his claim to immortality rests. His worldly prospects were now perhaps better than they had ever been; but he was entering upon the last and darkest period of his career. He had become sour and disappointed, and by his habits and temperance had alienated many of his best friends. By too freely expressing sympathy with the French Revolution and the then unpopular advocates of reform, he was suspected by the Excise authorities. His health began to give way; he became prematurely old and fell into fits of despondency. He came to a sad end "a poor plucked pigeon" as he said. He died on the 21st July, 1796, aged 37 years and nearly six months.

"And thus he passed" says Carlyle "so softly, yet speedily to that still country where the hall curtains and fresheners do not reach, and the heaviest laden warfarer at length lays down his load."

To Burns' own life and to all betterer lives let us apply his own generous words. They ought not only to be read and admired, but to be remembered in our hearts and practiced in our lives. "Who made the heart," 'tis He alone. Definitely can try us.

He knows each chord—'tis various tones.

Each spring, its various bias; Then at the balance let's be mute, We never can adjust it. What's done we partly may compute But know not what's resisted."

It is rather interesting to note that two of Burns' poems "Hear, Land O' Cakes" and "To Mary in Heaven" realised 645 pounds (over \$3,000) in London, England last month.

**ISLAND DAIRYMEN IN ANNUAL CONVENTION**

Continued from Page One.

Mr. F. T. Morrow, Provincial Dairy Inspector then submitted his report in which he referred to his having inspected the Creameries that were in operation during the Winter, the annual meeting of Dairy Companies and the various Short Courses where he discussed Milk production from the standpoint of individual records, the care of milk and cream and the storing of ice for cooling purposes during the summer months. He stated that there was not likely to be a dairy course at Truro this year as the different Departments of Agriculture have seemed to be so busy with the close of which course it is intended to have a convention of Cheese and Butter makers and a show of cheese and butter for which prizes have already been donated.

He reported that the past year had not been as favorable for milk production as the previous year, the season being somewhat dry and a shortage in green feed was noted. The general quality of the large cheese was good, the fat was not so satisfactory. The finish of the cheese in general was much below the requirements. The shortages of circles in finishing without these caused a loss of fat and considerable mould found its way into the cheese and spoiled the appearance so that a lot was returned as unfit for the trade. He emphasized the need of thoroughly cleaning the curing shelves before the cheese are placed on them and thought there should be cooler curing rooms particularly in the larger factories.

In regard to the milk supply it was always sweet enough in the cool weather, but not enough of it. Two of the factories that formerly made cheese are now making butter. There was some improvement in the general quality in the butter last season, with two exceptions, but except three creameries had moisture some butter fat up to the requirements. Those that did not have this test would run about 6 per cent short in over run. The creameries that graded cream had the highest quality of butter. In concluding Mr. Morrow stated that on the breeding, feeding and keeping of dairy records depended the future success of dairymen. The Department last year rendered the assistance by offering prizes to those who kept records of their cows. Prizes are also to be awarded the cheese or butter makers who have the largest increase in make in 1920 over 1919.

Some discussion followed the reading of the Inspector's report participated in by Mr. A. Brown, New Glasgow; Mr. D. J. Thompson, North Truro; Mr. W. H. Dennis, M. L. A. O'Leary; Mr. Cain, New Perth; Mr. J. P. Proffitt, Kensington and others.

Mr. J. A. Ruddick, Director of the Dairy Branch, Ottawa, was called on and expressed great pleasure at being once more present with the dairymen of P. E. I. It was, he said, a good many years since he had been here in his duties of late years were more or less of an executive nature which kept him at his office. He congratulated the Secretary and the Inspector on their excellent reports and submitted some interesting figures in regard to the export trade of Canada. He showed that for the eight months ending November 30, 1919, the total exports amounted to 123,428,738 as compared with 126,835,967 lbs. for the same period in 1918. The total value of milk and milk products exported up to Nov. 30, 1920, amounted to \$42,822,924 as against \$40,568,236 the previous year. He also submitted statistics covering the importation of oleomargarine into Canada and the amount manufactured in Canada and showed that the importation and manufacture of this article has been greatly reduced and that after next August no further importation or manufacture of this product will be permitted in Canada.

Mr. Ruddick said he was pleased to note that there had been an increase in the production of milk. There should be no alarm as long as this continued as increased milk

production was the most important of all. With the newer knowledge of nutrition he said that there was going to be a large increase in the consumption of milk. He dwelt on the subject of cow testing and said that to note that in the test made by P. E. Island was only exceeded by British Columbia and Ontario being only 200 lbs. under the average of Ontario.

He also dwelt on the importance of having cool curing rooms and that no new cheese factories should be built today without such.

Mr. D. J. Thompson reporting for the Tryon Factory said that he represented a butter district and that they had every reason to be optimistic. They had been greatly handicapped by the loss of their most efficient manager, Mr. Lang, who was perhaps the only manager in Canada who looked after both the making and the selling ends. The factory had built up a good business and had over run some 100,000 lbs. which considering that they had less than 200 patrons was an excellent showing and their aim was to increase this. They were intending to put in all their best machinery and to turn out the best commands a good place in the markets in Canada and they are doing all they can to back up their new manager. He said no reason to look on the Dairy Industry pessimistically as they were producing an article which the country required. He emphasized the need of dairymen grading their cream and milk all through and to eliminate altogether the poor milk.

Mr. W. H. Dennis of O'Leary said they had opened their butter factory last year. They had purchased a pasteurizer last year also a churn and this year had got a second pasteurizer. They had also established a system of grading in the factory.

Mr. Cain, reporting for the New Perth factor said this was their first year's work in butter making and they were hopeful with the chance they hoped to be able to make the butter business a success. They were neither neutralizing or pasteurizing but just trying to get the cream in good shape. They were turning out good butter and had every reason to believe they would make a success in butter making.

Mr. W. A. McKay, Dairy Superintendent for Nova Scotia was then called on and gave a very interesting and informative address on "Creamery Work." He expressed his pleasure at being once more with the dairymen of P. E. Island. It was four or five years since he attended one of their meetings but had kept in touch with the quality of the butter and cheese here having made a success in butter making.

Mr. McKay said that in the past, in dwelling on some of the essentials to make creamery butter a success the first important thing is the local organization. A "well-manned" creamery is necessary. The factory not well-manned and equipped will be "up against it." Other essentials are to get good cream and the right type of maker. Efficiency is the keynote of success. He was glad to learn it was the intention to open a short course for cheese makers here.

Mr. Proffitt, the Secretary at the close of Mr. McKay's address submitted the financial report showing receipts of \$315.83 and expenditure of \$190.98 leaving a balance on hand of \$124.85.

**EVENING MEETING**

The Provincial Dairy Association held its second evening last evening in the Prince of Wales College hall. Vice-President J. A. Dewar, M. L. A., occupied the chair.

The first speaker was Mr. C. J. Cook of Kensington, who dwelt upon the necessity of improving the quality of the herd and of proper care of the herd. During that season there has been about twelve hundred cows treated, the approximate number of cows on the Island being forty-five thousand. The average tested cow yields from 3500 to 4000 lbs of milk. All the cows under test are being paid but the idea is to gradually weed out those which are not giving returns.

Considerable discussion followed in which a number of members took part. The chairman read a telegram from Mr. D'Arcy Scott regretting that he had missed train connections on the other side, the train being three hours late.

Mr. H. R. Brown, of New Glasgow, N. S., keeper of the official records, spoke briefly upon dairy work in Nova Scotia. The conditions there are rather different from those in this province, and personally the speaker believed it was believed it was better to get

**SPEAKS VERY FRANKLY**

I wouldn't take all the money in the world for the good Phosphonol has done me. It has enriched my blood, chased away that "tired feeling," restored those vital forces that had wasted away faster than Nature restored them. This is a characteristic testimonial. Stop wasting your youth. To-day get a box of Phosphonol. Price, \$3, at all druggists or if not obtainable direct from us, The Scobell Drug Co., Ltd., 91, Youville St., Montreal.

For sale by E. A. Foster and Victor Corley.

entire communities to co-operate along the lines of herd improvement. Nova Scotia herds, as a general thing, are small, and for this reason co-operative selection was essential.

Speaking of the value of accurate records of cow tests the speaker stated that in Nova Scotia they have secured and tabulated the figures of the creameries for a period of four years and found that record keepers were producing from 20 to 80 per cent more butter fat cows than the others.

The full text of Mr. J. A. Ruddick's speech on Dairymen is crowded out of this issue and will appear later.

Further discussion followed, at the close of which some interesting motion pictures were exhibited. A vote of thanks to Mr. Ruddick for the comprehensive manner in which he had dealt with his subject, moved by Mr. Walter Jones and seconded by Mr. John Anderson, was heartily passed.

Among those present were the following gentlemen: James O'Connor Kensington; D. J. Thompson, Tryon; James Williams, Tyne Valley; D. J. Montgomery, Fort Hill; Adam Brown, New Glasgow; C. J. Cook, Kensington; J. W. Calbeck, Bedouque; Miller Fyfe Stanley; Alfred Simpson, Lot 16.

**THE MARKETS**

MONTREAL, Jan. 22.—It appears a strong feeding prevails in the local egg situation, and prices have scored a sharp advance, which is attributed to the steadily increasing scarcity of supplies on spot, and the fact that dealers generally are now giving their attention to other markets in order to secure sufficient stock to meet their requirements. The demand continues good for home consumption, and sales of selected cold storage eggs were made today at 73c to 80c per dozen. The receipts today were 320 cases, as against 419 for the same day last week, and 122 for the corresponding day a year ago.

We quote wholesale jobbing prices as follows:

New laid eggs . . . . . 85c to 90c  
Fall fresh eggs . . . . . 80c to 82c  
Selected C.S. eggs . . . . . 78c to 80c  
No. 1 C.S. eggs . . . . . 75c to 78c  
No. 2 C.S. eggs . . . . . 58c to 60c

There was no important change in the condition of the market for dressed poultry today, but the undertone of the market was firm and prices for all lines were fully maintained owing to the continued steady demand for supplies, and the fact that receipts for the season of the year are comparatively few.

We quote wholesale jobbing prices as follows:

Turkeys, choice . . . . . 52c to 53c  
Good turkeys . . . . . 50c to 51c  
Geese . . . . . 30c to 35c  
Chickens . . . . . 30c to 32c  
Ducks . . . . . 36c to 42c  
Fowls . . . . . 29c to 32c

A fair trade was done in potatoes today, and the tone of the market was steady with sales of car lots of Green Mountains at \$1.55 to \$1.60, and Quebec stock at \$1.45 to \$1.50 per bag of 90 lbs. —ex-truck, while in a wholesale jobbing way trade was fairly active at \$1.75 to \$1.80 per bag of 80 lbs., ex-stork.

Chicago, January 20.—Eggs lower. Receipts 7,554 cases. At mark, cases included, 57c to 59c.

New York, January 20.—Eggs weak. Receipts 2,118 cases. Fresh gathered extra firsts, 71c; do, firsts, 68c to 70c; State, Pennsylvania and nearby western hen-paries, whites, firsts to extra, 71c to 76c; do, brown, extras, 74c to 75c; do, gathered browns, and mixed colors, firsts to extras, 69c to 73c; refrigerator firsts, 63c.

**New York Fur Sales**

NEW YORK, Jan. 24.—Squirrel was the star performer at the concluding sessions of the fur sale in the Masonic Hall here Saturday. These pelts brought prices which surprised most of the buyers present, which showed the smallest average decline from spring sale levels of any of the important collections sold during the entire week. The drop in squirrel was only 25 per cent, racoon, which declined 100 per cent, came second in the interest of buyers today. Compared with the average prices paid at the April sale of the New York Fur Auction Sales Corporation here the other offerings showed these percentage declines, black bear 25, brown bear 25, polar bear 35, German and Russian fitch 60. Total realized during the week place it at \$1,925,000.

**Smoke T&B**
