

# Profits On Coal

Profits on coal depend entirely upon the cost of mining it. Most mines are so deep that it is impossible to mine at a reasonable profit. Some mines are so much on the surface that coal will not bring price enough to make a profit. Many mines are so far away from their market that freight rates make it impossible to make a profit. Many mines have so many competitors that it is impossible to make a profit. None of these disadvantages apply to the INTERPROVINCIAL COAL COMPANY, LIMITED.

Our mine is placed so as to be able to laugh at its competitors as regards freight rates. The coal is just 20 feet from the surface, thereby insuring cheap mining, and still not near enough to the surface to weaken the quality of the coal.

When buying this mine, all of these advantages were taken into consideration. The mine was bought by three men who expected to be able to pay for it all, and hold it to their own personal benefit, but changed circumstances made this impossible, and, today, they are asking for \$20,000 to assist them in the last payment on the mine. In doing this, they realize that under present conditions they must make sacrifices. To get the money, they are, therefore, offering you people who have money to spare five shares of stock absolutely free with every ten shares you pay for, and in addition to that a guarantee of 25 p. c. each year for four years, which gives you all your money back.

The greatest authority on coal mining, namely, "The Coal Age," of New York, says, in September, "that the small mine, raising from one hundred to two hundred tons per day, with a correspondingly small acreage, is the only one showing a reasonable profit." "That's us, exactly."

The coming year, we expect to show a profit on our total capitalization of from 40 p. c. to 60 p. c., or let us cut this in two, and still you have an investment paying above all other that we know of. With 35 years at least of coal to draw from, and 160 acres extra, which means 15 years more, we believe the permanency of this investment to be as perfect as human foresight can provide. Get your spare money into this at once. If you wish to know more about it, call in and let us talk it over. We have yet to meet the man who says this is not a good investment. Stock is selling every day. Do not be too late. After the \$20,000 is secured, not one concession of any kind will be given to anybody. You will simply have to pay for your stock, and very little of that will be sold. Do it today.

# Statements We Make

We have 260 acres of coal lands. In it there are 2,000,000 tons of coal. The quality is better than any soft coal sold in Prince Edward Island.

The coal is only twenty feet from the surface.

We are 90c a ton, freight, nearer our market than our nearest competitor.

We mine our coal at \$1.00 to \$2.00 per ton less cost than any of our competitors.

We have no competition from wood fuel, as there is absolutely none.

Our capitalization is lower than it should be.

We have cut drifts through thousands of feet of our coal, and have already blocked out 30,000 tons.

By this time we ought to know what we are talking about—and we do.

We have placed our coal in small lots in every part of our market; we have not had one complaint; we have had many commendations.

We have the mine within 700 feet of the Canadian Pacific Railway.

We have everything we want, except \$20,000 more capital; we will soon have that. Our offer of 5 shares bonus stock with every 10 shares bought, besides our guarantee of 25 p. c. for four years, will certainly provide the money.

—WEDDING BELLS.—A very pretty wedding took place at the home of Mr. and Mrs. Chester Bowness, North Bedouin, on Wednesday evening, when their daughter, Clara Louise, was married to Mr. Elmer C. Acorn, of St. Eleanors. The bride was given away by her father, and the ceremony, which took place under an arch of maple leaves, was performed by Rev. A. McKay. The wedding march was played by Miss Lillian Huestis, of Wilmot Valley. The bride, who looked very charming in a gown of white satin and wedding veil, carried a bouquet of white and pink carnations. The wedding presents were both numerous and costly, the bride's father presenting her with a handsome Mason & Risch piano. Upwards of one hundred guests partook of the wedding banquet, and after an evening spent with speeches, music and games, Mr. and Mrs. Acorn left for their home in St. Eleanors, followed by the good wishes of all their friends for a happy journey through life.—X.

MacFarlane, who is a splendid machinist, volunteered for the front from Nova Scotia, and in a letter home he stated that he had passed successfully the "armour" examination, which means that instead of going into the firing line he will be busy engaged in the repairing of rifles, flying machines, automobiles, etc.

The annual prize shooting will be held in conjunction with the competition on Oct. 31. It is important that every member be present.

INTERESTING.—A Thanksgiving Service was held in the Pownal Methodist Church on Sunday evening. The church had been previously beautifully and artistically decorated with flowers and vines from the garden, sheaves of golden grain and the various kinds of roots from the field, fruit from the orchard, and beautifully tinted branches from the forest, each and all, as silent witnesses of God's goodness. The Rev. Mr. Weeks preached a most appropriate sermon from Heb. 13th, 15th and 16th verses. There are two kinds of thanksgiving, tangible and intangible. Praise to God as in the text, "The fruit of the lips," when sincere is acceptable to God. But the tangible "to do good" was far more acceptable. The large congregation listened with evident appreciation. Appropriate hymns and "Thanksgiving Anthems by the choir contributed to an enjoyable Thanksgiving Service.

POTATO DIGGER.—Mr. Charles MacFarlane, of Water Street, whose ability as a machinist is well known, has invented a potato digger which farmers would do well to examine. It took him two years to perfect the machine, and in its construction Mr. MacFarlane has spent altogether fully a thousand dollars. Mr. MacFarlane claims that it turned out a machine as good as any other, and it is his intention to have it tested next week in some field near the city. The mechanism may be described as follows:—There is an adjustable cutter attached to the front of the machine, which removes the tops and sod, leaving clear soil for the digger to work in. Underneath a wide wheel is placed a shovel, which can be adjusted to any depth up to 7 inches by means of a lever. The potatoes are transferred from the shovel to a shaker, composed of steel bars. The potatoes are shaken clear of stones and clay and deposited in a bin at the rear. Mr. MacFarlane is confident of the practicability of his invention, and certainly the machine looks feasible enough. A good many farmers have seen it and expressed a high opinion of it.

PATRIOTIC MEETING AT STANHOPE.—A large gathering attended the meeting held in Stanhope Hall, last week, for the purpose of giving a helping hand towards the antiretreat Patriotic Funds. Col. Allan presided. Messrs. Judge Fitzgerald, A. A. Bartlett, Rev. E. A. Westmorland and C. H. B. Longworth addressed the meeting. They impressed upon the minds of the people the need of coming to the assistance of those who are left homeless, and of the men who are laying down their lives that we may be free. A solo, "The Call of the Motherland," sung by Mr. Ira Carr, brought forth much applause. A list was passed around and the people responded with the following donations: Belgian Relief Fund, \$44.00; Red Cross Society, \$19.50, and a list for oats to the amount of 369 bus. A branch of the Red Cross Society was organized by the ladies, for which they wish to convey thanks to Mr. C. H. B. Longworth for the donation of \$10.00 to their organization. A vote of thanks was tendered the speakers by the chairman, after which the meeting was brought to a close by singing "God Save the King."

MONT CARMEL.—Mr. and Mrs. John J. Gallant and family have effected a change of residence by moving into their new dwelling. Mr. Gallant, who is a resident of Mont Carmel, has made a change worthy of note. He has moved into a residence in every way desirable, both in comfort and for the beauty of its appearance. The location is also one of the most desirable. Mr. Albin Perry, son of Mr. Philip Perry, of Mont Carmel, who has been bedfast with rheumatic fever of the worst type, is not improving as fast as his friends would desire. The teachers of Mont Carmel School, No. 59, have been relieved of their task by the closing of the school for the fall vacation, which will be for two weeks. Besides this being a relief to the teachers, it will also be of great convenience to the farmers in potato digging time.—Mr. Stanislaus J. Gallant of St. Raphael is the happy owner of a sow that brought him thirty-nine pigs in two litters, a spring litter of nineteen and a fall litter of twenty. Mr. Gallant challenges the farmers of Prince County to compete with him in this line.—Mr. and Mrs. Jerome Gallant, of Mont Carmel,

were in Summerside recently visiting their many friends there.—Mr. Tanis Perry, of Mont Carmel, is dangerously ill, so much so that his medical advisor and friends entertain little hopes of his recovery.—Mr. Cyrus Perry, of Mont Carmel, now residing in Charlottetown, returned to Charlottetown from Wellington on Friday last and came back to Wellington and thence to Mont Carmel, accompanied by his wife. Mr. and Mrs. Perry will be the guests of Mr. and Mrs. Leon J. S. Gallant.—Mr. Leon J. D. Gallant, of Mont Carmel, has invented a reliable stock, having bought two milch cows of rare quality, both as milkers and beef producers.—I.

This is the kind of letters we receive daily from people who have been cured of these distressing skin diseases by the use of Dr. Chase's Ointment.
