

AIR-SHIP A SUCCESS.

FRIEDRICHSHAVEN, Oct. 20.—Count Zeppelin's air ship ascended this afternoon, was steered against the wind, and put successfully through various evolutions and manoeuvres.

A Well-Known Toronto Traveller Cured of Catarrh After Eight Years' Suffering.

JAPANESE CATARRH CURE CURES.

Mr. R. E. Fleming, the well-known and popular Toronto representative of Messrs. Kwing & Co. Manufacturers, Montreal, writes: "I have been a constant sufferer from catarrh of a severe and most disagreeable type for eight years, which became worse and worse."

CURE ALL YOUR PAINS WITH Pain-Killer. A Medicine Chest in Itself. Simple, Safe and Quick Cure for CRAMPS, DIARRHOEA, COUGHS, COLDS, RHEUMATISM, NEURALGIA.

Do you desire perfect satisfaction with your corsets? Of course you do! Then try a pair like those shown above. You can get a pair to fit you just as snugly and which will almost tire you with the long wear they will give.

PURE GOLD JELLY POWDERS. Are made from the VERY FINEST QUALITY of calves-foot gelatine that money can buy.

Up-to-Date Methods. Together with the use of the finest materials in manufacturing have combined to make our Ginger Ale the most popular of summer drinks.

CAUSE OF CHICKEN "PIP."

STRACUSE, N. Y., Oct. 19.—Poultry raisers will rise up and call Miss Grace Norris blessed. She has discovered the cause of the disease called "pip" or "gaps," which of late years has killed more than half of all the poultry hatched.

Miss Norris is a second-year student in the Syracuse Medical College, where she has distinguished herself by her work in biology and her skill in analytical dissection.

"I always liked fowls and animals," said Miss Norris to a World correspondent today. "I lived on a farm part of each year, and they were my chief companions. One winter, when I was a child, I trained a pair of geese to draw my hand sled. They drove well together, and I was the envy of the neighborhood."

"I also had a collection of field mice, which I caught one by one, by chasing them in the fields and putting my foot down on them lightly and grabbing them in my hands. I kept them in a box in the barn and fed them there, and I got very much attached to them."

"One cold night I was afraid they would freeze in the barn, and I got up after the family had gone to bed and brought the box into the kitchen. There were four mice in it, and in the morning three were left to eat in the house."

"They had got into the pantry and cleaned everything up. The next night Grandma set traps all over the place and caught thirty of them. I don't confess to her about them."

"I never knew them to come in such swarms before," said Grandma, as she drowned my mice.

"Last spring I spent my vacation on a farm at Richfield Springs, where large numbers of fowls were raised. I noticed that some of the young chickens turkeys and goslings would open their mouths, gasp for breath and at the end of a few days die, apparently from the lack of air. Practically this was all the chicken farmers knew about it."

"For the next four months I did nothing but study and experiment with the disease. The results of the investigation showed a parasite hitherto unknown. It is bright pink in color, about a half inch long and twisted in shape. It has an appendage near one end, which gives it a forked appearance like the letter 'Y.' This appendage fastens itself firmly to the mucous membrane of the chicken's trachea, forming in masses which close the air passage and cause death."

"The worm, or parasite is pointed at the single end, where the mouth is located. When it has reached maturity the parasite, which I have named Habita trachea emerges from the nostrils of the fowl drops to the ground deposits its ova and dies. The fowls, by scratching in the soil, cause these eggs to float in the air, they are breathed into the trachea, and the cycle of generation begins anew."

"I found an average of twenty parasites in each fowl I examined."

"Authorities have never agreed as to the cause of the disease and a successful remedy has therefore never been found. A hooked wire apparatus is frequently used. The wire is run down the trachea, and since this method never always kills the fowl it can't be called successful."

"In my experience the only effective treatment was to prevent the disease by keeping the fowl on fresh soil where poultry has never been kept before. Of course there were no eggs to be inhaled and they did not contract the disease."

A LIFE SAVING COMPETITION

Heirs of Anthony Pollok a Victim of Bourgne Disaster. Offer \$20,000 Prizes.

The heirs of Anthony Pollok a victim of the Bourgne disaster offered soon after that event prizes amounting altogether to 100,000 francs (\$20,000) for improved devices for life-saving at sea. The result is a collection of over five hundred appliances which is now on exhibition in the Palace of Navigation and Commerce in the Paris exposition. All these devices, we learn from an article in La Science Francaise are not life-saving appliances properly so called. These are, of course, in the majority; but there are also safety devices for vessels and even whole ships—unsinkable ones. The writer of the article remarks with justice that he would rather have one of these—provided they work properly—than any of the others. To quote part of the article:—

"The English inventors are very numerous, and some exhibit devices that should be commended. Such is the system for closing water-tight doors invented by Montgomery Moore, which provides for the instant closing of all such doors in the ship by simply pressing a button."

"Many of the contestants present improved plans for launching life-boats (and) the boats themselves are offered in an infinity of forms which are all original if not all very practical." Among these are cited the James folding-boat, made of sail cloth; the Morgan

THE TAILORS.

Who made the tailor-maids' tailor-made suits that we are getting in day by day didn't make any mistakes. They're by far the handsomest suits we have seen, and the variety is something wonderful. There is no possible manner in which we can describe these suits to you so that you can "see them"; and we can only invite you to come to the store through THE GUARDIAN (that don't sound just right, either)—but come any way, through THE GUARDIAN or the door, and you'll be glad you came. Our women's Suit Room is full to-day of new things for women to wear—Jackets, Suits, Capes, Skirts, Furs, Flannel and Silk Waists, Wrappers and Petticoats, and we intend during this season to show you that there's not only a better class of clothes coming to this unusual "Everybody's Clothing Store" than the usual stores carry, but that we can absolutely save you money—plenty of it—if you buy "clothing-store clothes for women" of us. See our woollen shirt waists, worth \$2.50 for \$1.50.—Jas. Paton & Co.

WHAT PEOPLE SAY.

Is No. What Makes a Remedy Valuable.

Testimonials are good things and we are always glad to get them, but they don't make our remedy any better.

Stuart's Dyspepsia Tablets are good because they do good—because they cure.

Testimonials simply prove that the tablets have helped other people, but it's yourself you are most interested in, and whether they will cure you is the question.

It is very easy to find out—try them. A full package costs but fifty cents at your druggist's. They are worth that if they only help you a little bit. The chance is worth taking at the price.

We put it on that basis because you don't know about the tablets. If you knew as much about them as we do you would have complete confidence; this advertising would be unnecessary. We have seen them cure the worst cases of stomach trouble. Cases of long standing and obstinacy, cases that other medicines and even high priced doctors had failed to subdue.

Here are some testimonials. If you care to read them we have thousands of them:

Rev. J. R. Hoag, of Wymore, Nebraska, writes: For six years I have been troubled with dyspepsia. Last fall I became very much alarmed at some symptoms of heart trouble and came to believe there was a sympathetic relation between the two diseases, or rather, that the stomach trouble was the cause of the heart disturbance. I hit upon Stuart's Dyspepsia Tablets for a remedy and invested a dollar and a half for three boxes which lasted me three months and I can eat any kind of food I want and have a good vigorous appetite. Although I am seventy-seven years old, I now feel perfectly well and without being requested by anyone I make this statement as a compliment to the virtues of Stuart's Dyspepsia Tablets.

Mrs. Lydia Bartram, of Assaria, Mich., writes: I have suffered from stomach troubles for ten years and five different doctors gave me only temporary relief. A Mr. E. R. Page advised me to try Stuart's Dyspepsia Tablets and four boxes did me more permanent benefit than all the doctors' medicines that I have ever taken.

We honestly believe that Stuart's Dyspepsia Tablets are the best medicine ever made for the cure of stomach troubles.

Don't mistake our meaning. We don't claim them to cure anything but dyspepsia and stomachic disorders. Just the one thing is what they are made for, but that one thing is the cause—the starting point of nearly all the sickness in the world.

Use Stuart's Tablets regularly. Keep your stomach right, and you can never sick.

submersible boat, the Maine closed boat the Prim boat, with a huge supplementary keel, and Captain Anceles boat, which can take all sorts of dangerous positions without troubling its inmates. There are also rafts without number; pontoons, mattresses, cylinders bolted together, and systems of buoys, some of them launching themselves automatically in case of accident, and some lighted by electricity. To quote again:—"As for safety garments . . . they are innumerable in form and color; the inventors have had recourse to all sorts of substances, solid and gaseous, to make up their apparatus. Even acetylene figures in this section of the exposition, use being made of the ease with which carbide of calcium develops the gas in contact with water."

The Franckenberg costume includes an entire system of garments, which can be

Free samples of pasteurized milk delivered in the city to any address left at the Factory, Water St. Call, send or telephone.

Fine Furs. For Ladies, Fine Furs for Children Fine Furs for Gentlemen. A very large stock bought low for cash and lower because of buying for two large stores. . . . Now Then. Get a Ruff .50c. to 12.50 Get a Muff 2.50 to 12.50 Get a Collar 3.50 to 18.00 Get a Cape 8.50 to 28.00 Get a Coat 25.00 to 56.00

put on in thirty seconds, and allows absolute freedom of motion. "The Salvator belt, patented by Laine, deserves special mention. It is formed of four rubber pouches that may be worn constantly on the person, under the clothes when the wearer blows into the tube, the is inflated and may then support two persons. If one of the pouches is torn, the others remain inflated." Only a small part of the devices are described in M. Fournier's article, and the collection seems to be of the highest interest and value.—Translation made for The Literary Digest.

STOVES. FENNEL & CHANDLER. SEVEN YEARS. Of suffering relieved is as many days. Corns cause in the aggregate as much suffering as any single disease. It is the magic solvent power of Putnam's Corn Extractor that makes it so successful in removing corns. Take no substitute, however highly recommended. Putnam's Painless Corn Extractor is the best. Sure, safe, and painless.

LAST CHANCE.. Big Clearance Sale of W. H. STEWART & Co's stock of Boots must close in a few days as we have to give up the store. Everything Must go, Boots! Boots! Galore for old and young must go. A lot of Boots in the window at [half price. The balance will be sold at discounts of 30 per cent, 40 per cent and half price for cash only. Sale conducted by GOFF BROTHERS.
