THERE is no reason why there should be any controversy or delay over the question of how and where the Senior hockey play off matches be contested. In all well regulated sporting circles the holders of the championship cup have their opponents meet them on their own ground and why would it not be the fair play for the two Charlottetown teams to contest each other in their own rink, and there decide as to which of them shall come to Summerside to take the trophy from the Crystals? The Crystals hold the trophy and why in the event of a play off at least should they be asked to take it to Charlottetown and offer it to any other club?

Corticelli Skirt Protector should not be used as a binding—it is a physical impossibility for any kind of a binding to outwear a skirt.

Corticelli Protector Braid should be sewed on flat—not turned over—one or two rows of stitching—one at upper edge of braid and the second near the bottom of the skirt.

Put on thus it is a real "protector"—its perfect shade match makes a desirable bottom finish for any skirt.

## FOR PROFITABLE AND SAFE INVESTMENT

BUY ROB ROY (.15) OR COMSTOCK (10) SHARES.

### SCOTTISH-CANADIAN.

This Company owns the "Rob Roy" and a prominent English Mining Engineer has just written the Company for a second copy of Report on these "Rob Roy Mines." His principals are trying to get an interest in them and he had sent the first copy to them in England. The second copy was for one of England's leading financial men who had asked to see the Report. Hence the request. Gentlemen of this stamp do not ask these things for fun! They are men of money and knowledge and the report must have value beyond the ordinary to cause this fuss!

It has and I know it! My exploration of the Rob Roy leads me to believe that proper development will prove it a Bonanza and I can heartily recommend it as an investment.

### COMSTOCK.

This lies very close to Rob Roy and I know it almost as well as the Rob Roy, having been over it half a score of times. Comstock lies partly within the limits of Circle City Townsite and when the Railway (which is now being built) is finished, the terminus will be but a few hundred yards from the Comstock. This property has been opened up in three places, all showing up Ore and the Company can take out Ore right from the start. I consider this also, thoroughly safe as an investment. A few thousand Shares of non-transferable (rooled) Stock can yet be had at 5. Write me. I may pay you. Maps, etc. on application.
