ORIGIN OF DWARFS PUZZLES SCIENTISTS

Old Age Infantile Characteristics Still Persist, Notwithstanding Their Wizened Appearance

Dwarfs have always been a puzzle to scientists, whether they are human beings, animals, or plants. Some of the difficulties of understanding the origin of the human ones were cleared away by Professor Hastings Gilford in his lecture at the Royal College of Surgeons, London. Of course, there are whole races of dwarfish human beings, but the kind of person who especially deserves the name is one who is conspicuously small amongst his own people. Most of these eccentric little folk, often called midgets, are really, according to Professor Gilford, endowed with the gift of perpetual youth—not altogether a desirable gift, as any reader of fairy tales will know. It was often thought, he said, that midgets were people whose growth had suddenly been arrested. This was not so. The professor pointed out that in many cases "the so-called dwarfs or midgets are not in reality the result of a stoppage of growth, but rather of a protracted delay in development, so that they remain infants all their lives. When they grow old, as they often do, their infantile characteristics still persist. Dr. Gilford gave many quaint instances. Dr. Gilford gave many quaint instances where their smallness and their baby-like minds stood dwarfs in good stead. One mannikin, he said, travelled wherever he cared to go on the railway with half a ticket until he was 30 years old; another intelligent child of 14 years got through more easily still, for his mother or any other woman who cared to assume the responsibility could carry him about as a baby in arms.

This intense prolongation of the period of childhood was really something very much akin to a disease. The lecturer classified it into many forms, but said of the many specimens he had met and examined: "They seem to be intelligent and captivating little people, their intelligence being of the childish pattern, such as might be expected of young people who had gathered years of experience. They never seem to be spoiled or even embarrassed by the attentions they receive from the public, but show quaint childish traits and a charming naïveté which makes them great favorites with those who have dealings with them."

Science naturally divides dwarfs into many kinds, but two of these are quite distinct. In one class the bones grow harder with age instead of remaining, as in the other class, gristly like those of little children. When, as in the first case, the bones begin to harden, other changes often happen, and the midgets become a strange compound of adult and child. They often resemble, said Professor Gilford, in some respects, the old and some of the young. The latter provide fathers and mothers with a grand opportunity of making a study of their own children.

When driving, motoring or enjoying out door life, your complexion will be assailed by dust, wind, sun and other natural enemies to fine skin and good complexion. If you wish to protect yourself against these complexion destroyers you should use McKinnon's Rich Hazel Cream, a splendid preparation for keeping the skin satiny smooth, velvety soft, and daintily clear, a bottle 25c. McKinnon Drug Co., Rexall store, corner Great George and Kent Streets. Mr. M.

Valuable Property for Sale in Alberton

The undersigned will receive tenders for all or any of the following tracts or pieces of land. Town Lots No. 53, 57 and 58 Bounded on the North by the Northern boundary of the Town on the West by the P. E. I. Railway on the East by Albert Street, containing 54 acres of land. Also that five tract of land bounded on the North by Cedar Street on the West by the P. E. I. Ry., on the South by George Street and on the East by Town Lot No. One being Town Lot No. 2 and parts of Town Lots Nos. 3 and 50. Containing 33 acres of land. Also the Western Moiety of the Coal Yard bounded on the North by George Street on the West by the P. E. I. Ry. on the South by Water Street and on the East by Town Lot No. One being that part of Town Lot No. 6, east of the P. E. I. Ry. Also Town Lots Nos. 10 and 11, fronting on Cascumpeque Harbor being the very choicest location for a summer Residence in the West—Commanding a view of both Harbor and Gulf of St. Lawrence containing 2 1/2 acres bounded on the West by Dundas Street and on the East by Cascumpeque Harbor all the several properties and in the first hundred of Town Lots in Cascumpeque—see P.E.I. Atlas Page 147 for plan of same. Tenders will be received up to and on the 1st day of July 1914. Advertisers the undersigned at Charlottetown—who reserves the right not to accept the Highest or any Tender. GEO. R. MONTGOMERY, Charlottetown, P. E. I. June 12th, 1914. 2965-6-15Mmwl.

PRINCE EDWARD ISLAND AS A SUMMER RESORT

THE LAND OF PURE DELIGHT FOR TOURISTS AND HEALTH SEEKERS

SOME OF P. E. I. ATTRACTIONS

Prince Edward Island is the best spot on earth in which to spend a vacation. It is more, it is the ideal land we've all heard and sung about in the halcyon days of childhood and youth, "The Land of Pure Delight." Some of its outstanding features are

A LAND OF BEAUTY.

Three hundred and seventy-eight years ago Jacques Cartier wrote:—"All this land is low and the most beautiful. . . . This is a land of the best temperature which it is possible to see." Thousands of tourist visitors attest that it is more beautiful today, and the most attractive summer resort in the entire Dominion of Canada.

A DELIGHTFUL SUMMER CLIMATE.

Gentle scenes laden with the breath of the sea blow from the south and the west all through the long summer days, dying with the red and gold amber and green of a gorgeous sunset. The nights are always cool and bright, insuring refreshing rest and sleep. There are no fogs.

A LAND OF HEALTH.

In no country does so large a proportion of the people live to a green old age. Only about one per cent. of the population dies each year. The report of the Registrar of Vital Statistics for the year 1913 shows that of a total of 982 deaths there were 130 over 60 years of age; 188 over 70 years of age; 110 over 80 years of age; 27 over 90 years of age.

The infant mortality of other countries is almost unknown here. There is no other land under the sun where 40 per cent. of the population live to pass the seventy year span of life!

A LAND OF ABUNDANCE.

In no other country is there greater abundance of the best food and of clear, sparkling water in town and rural districts alike. Lamb of finest flavor; Eggs, milk, butter and cheese; The most luscious oysters in world; Lobsters in great abundance; Sea and brook trout, mackerel, cod, etc.; Wild geese, brant, plover, duck and partridge in their season; Strawberries, raspberries, blue berries, cranberries; Apples and plums of rare excellence; cherries and small fruit are plentifully produced.

Prince Edward Island crop area, 1913: Wheat, 29,500 acres; oats, 176,200; barley, 4,200; peas, 70; mixed grains, 7,500; hay and clover, 184,100; buckwheat, 2,600; potatoes, 31,400; turnips, etc., 7,400; corn for fodder, 260.

Prince Edward Island live stock (June 30th, 1913): 36,000 horses, 48,600 milch cows, 64,800 other cattle, 85,700 sheep, 43,800 swine.

P.E.I. farm crops, exclusive of fruits, in 1913, were valued at, as follows: Wheat, \$450,000; oats, 2,420,000; barley, \$80,000; mixed grain, \$203,500; buckwheat, \$42,500; roots, \$625,000; hay, \$3,000,000. Total, \$8,186,000.

P.E.I. has \$246 worth of farm implements per farm, as against \$157 in N. B., and \$37 worth in N.S.

AGREEABLE SOCIAL CONDITIONS.

The Island is socially a land of the golden mean. Few are very rich and almost none are poor. The great majority enjoy comfort and prosperity. Sobriety and order everywhere prevail. In no part of the American Continent is there proportionately so little serious crime.

There are no tramps and beggars are unknown. Churches and schools are abundant.

POSTAL AND OTHER FACILITIES.

There are 46 post offices—one to every 4 1/2 square miles. Throughout a large part of the Province there is free delivery of the mails daily at the farmers' road gates. The Prince Edward Island Railway intersects the Island in every direction, bringing four-fifths of its area within five miles of the rails. Telephone lines all over the Island connect 175 towns, villages and settlements.

SOME SPECIAL ATTRACTIONS FOR TOURISTS

ON THE NORTH SHORE. The rampart of sand dunes, fifty miles long, thrown up by the waves. The long shallow lagoons inside the dunes, the haunts of fish and waterfowl. Scores of miles of bread, clean hard sand beaches, the delight of the sunbather.

IN GENERAL.

Surf bathing and sheltered sea bathing; Shooting wild geese, duck, brant, partridge and plover in their season. Fishing brook and sea trout, mackerel and other sea fish. Clam baking, picnicking, oyster digging. Boat sailing and rowing. Hundreds of motor boats.

IN CHARLOTTETOWN.

Victoria Park, 60 acres within ten minutes' walk of the Post office. Beautiful walks and drives, tennis courts, cricket and baseball. The Belvidere Golf Links. Amateur Athletic Grounds. An excellent Free Public Library. The Legislative Building, seat of a Legislative Assembly older than the United States Congress. The Miemac Encampment at Rocky Point. The old French Port at the Harbor's mouth. Seventy miles of land-locked waters for boating, bathing, oyster shing and clam digging. Charlottetown has one of the finest harbors in Canada, entirely land-locked, with a shore front of over four miles. Charlottetown has broad macadamized streets, with concrete sidewalks, lined with lawns and shade trees. Charlottetown's water supply system is pure, cold, spring water in abundance. There is none better in Canada or the world. Within a radius of 25 miles in all around Charlottetown, there are 60,000 people. Charlottetown has one of the finest market buildings in Canada.

THE FOX RANCHES.

Tourist visitors and investors will find great interest in seeing the scores of fox ranches that are thickly dotted over the western and central portions of the Island. P.E.I. has 290 incorporated fox companies, with an authorized capital of over \$26,000,000, and a number of ranches not incorporated. Sixty-four fox companies were incorporated in P. E. I., during last Legislature besides oyster farming, distrial and trading companies. Selling prices for P.E.I. silver foxes, at close of 1913, were \$20,000 to \$30,000 per pair for provided breeders, and for young foxes born during the year, \$15,000 per pair. P.E.I. fur farming includes the breeding of three varieties of foxes, also racoon, fisher, beaver, otter, mink, muskrat, marten and Russian sable, as well as Persian lambs. Eighty-five per cent. of all the valuable foxes in captivity throughout the world are within P. E. I. P.E.I. has 187 lobster-canning establishments.

SPORTING NEWS

RIFLE SHOOTING

The members of the Civilian Rifle Club on Saturday afternoon at Kensington range shot the third of the series of the Canadian League Rifle Matches, the fourth and last of which will take place on Saturday next.

Conditions were favorable for shooting and some good shooting was accomplished. A brilliant performance was the score put up over the three ranges, 200, 400 and 600 yards, by Mr. G. R. Beer, who has been doing great shooting this season, having previously made two centuries on the range. On Saturday afternoon he made a score of 103 points, making 34 at the 200, the possible at 500 and 34 at 600. At the last range, indeed, he just missed the possible. His first six shots there resulted all in bulls; the last shot, however, was an inner. His score equals the record for this range, and in fact for the Island, which was put up a few years ago during the Provincial rifle meeting by Major Jones of Bisleys fame. Mr. Beer received the hearty congratulations of his fellow riflemen on the range, and deserves all praise for his fine shooting. Another excellent score on Saturday was that of Mr. R. W. Longworth, who had hard luck in not getting his hundred, a puff of wind giving him a magpie at 600 yards and causing him to finish with 99 down the range.

The Civilian Club's first team made a total of 936 points; the second team, 822 points. Following are details of the first team's scores:—

Table with 4 columns: Name, Yds. 200, Yds. 400, Yds. 600, Pts. Total. Includes G. R. Beer, R. W. Longworth, J. H. Judson, G. F. Hitchenson, G. V. Moore, E. G. Love, W. A. Weeks (Maj.), A. R. B. Duck (Capt.), P. Barlow, M. A. Allan (Maj.).

CONN'S WIN THEIR SECOND VICTORY

It was five o'clock when the fourth game of the Charlottetown Baseball League started at the C.A.A.A. Grounds on Saturday afternoon. The contestants were the Victorias and Connaughts and latter won their second victory this year by defeating their opponents to the tune of 14-3.

In their playing the Connaughts redeemed themselves with the fans and played a good game, with few errors. They got six runs in the first innings and two in the second. Then the Vics held them down until the fifth innings when they secured five more runs. They secured their last run in the seventh. The Vics got their three runs in the fifth. They did not have their regular team on the field and were greatly "off color" in their playing. Mr. Samuel Murphy performed the duties of umpire in a manner that showed a thorough knowledge of the game. Mr. Louis Campbell made a competent Base Judge.

Table with 3 columns: CONNS, Catcher, VICS. Includes McAleer, McCarey, Moore, Sweeney, Corrigan, J. Purcell, L. Mullen, Newson, Hulson.

This afternoon one of the most interesting games of the League will be played between the Abegweits and Connaughts. It will be remembered that the Abegweits won the last game by a small margin and the Conns will no doubt make a desperate attempt to turn the tables this afternoon. The Conns will put a stronger team than last game on the field and no doubt a great game will result. The game is scheduled to start at 4.30 and it is hoped that the players will be out on time, which they will all try to do.
