HOLY LAND KINE

In Palestine, renowned in ancient times as a country of herdsmen and shepherds, the native types of cattle are being superseded by pedigree stock, from which steadily improving milk yields are being obtained. See the Dominion Dairy and Cold Storage News Letter, Ten years ago 600 cows of good strain gave 2,724 lbs. of milk per cow. Today there are 6,000 cows of improved breed with an average yield of 6,810 pounds per cow, while the total production from all sources, including native cows, amounts to 27,240,000 lbs. Some settlements, notably Kiriath Anavim, show an average milk yield of as much as 5,800 litres (13,166 lbs.) per cow.

CLOSING RALLY IN NEW YORK STOCK MARKET

(By John L. Cooley Associated Press Financial Writer.)

NEW YORK, Oct. 1—Stocks bade good-bye to September and the third quarter with a smart closing rally Saturday, although prior to the late trading prices had declined. Short selling earlier this week, however, appeared to have given the market a backlog of potential support and presumably it was covering by recent sellers that in large measure accounted for the final upswing. Grains ended their day virtually unchanged, while cotton here was a shade higher.

Several leading shares bogged down noticeably as the market rounded out its first hour. Consolidated Gas of New York made a new low for the year, under 40. New York Central and American Telephone both gave up around 2 points. But the latter rallied easily when pressure lifted, rising from 115 1-8 to 120 1-4 for a net gain of 2 3-4. Central got back all but a nominal fraction of its loss and gas was up more than a point net.

Stocks Decline

Markets heard various reports as to what the administration planned to do about the United States dollar; one suggestion was that the President would talk on currency matters soon, perhaps next week, but nothing definite developed.

PRICES STEADY IN WINNIPEG GRAIN MARKET

(Canadian Press) WINNIPEG, Oct. 1—Wheat futures prices rallied almost two cents from bottom levels on the grain exchange Saturday but closing quotations were 1-2-5-8 cents under the previous finish.

New York and Southern interests entering the market on the purchasing side shortly after mid-session lifted prices to previous closing levels, but selling was renewed at the high points and the full gain was not held.

October wheat finished at 61 5-8, November at 62, Dec. at 62 1-2 and May at 67 3-8 cents. Weak Liverpool cables and lack of support ran the market in stop-loss selling at the start with a consequent downturn in values.

Currency

(Canadian Press) NEW YORK, Oct. 2—The United States dollar resumed its decline in foreign exchange markets today after a week of comparative steadiness. At one time the value of the dollar, as measured by the French gold franc, was down more than a cent. It rallied after the close of the Paris market however and finished at 64.38 cents against Saturday's final quotation of 65.38.

Steadily opened several cents higher and touched its top at 64.50 around midday. The final rate was 64.75 1/2 where it was up 3 1/2 cents from Saturday's close. The French franc finished at 6.08 cents, up .07 of a cent. The Canadian dollar went as high as 98 1/2 and closed at 98 for a net gain of 3/4 of a cent. The final rate was equal to a premium on United States funds of 1 13-16 per cent.

Trading Active

Trading was quite active at the start, but thinned appreciably on the buying lull. The close was comparatively quiet. Liverpool at the close was off 3-4 and Buenos Aires was down 3-8 of a cent. Export demand apparently had been satisfied yesterday

as no movement of Canadian wheat was reported today.

Volume of business worked in cash grains was extremely small, with spreads on most grades easier. A moderate quantity of oats was sold for export out of Vancouver. Destination of the shipment was not learned. With the exception of fair buying in barley by southern interests and malsters pit trade in coarse grain commodities was rather quiet.

CHICAGO, Oct. 1—(A.P.)—Despite a brisk rally following material setbacks earlier, the outcome of grain trading Saturday proved to be virtually a draw.

Varying action of securities had much to do with the course of cereals, but the main factor was uncertainty as to what unforeseen developments might take place regarding United States monetary plans. Under such circumstances, few grain speculators were willing to leave any important risks open until Monday.

Wheat closed nervous, 1-8 lower to 3-8 higher compared with Friday's finish, corn and oats both unchanged to 3-8 lower, and provisions unchanged to 25 cents down.

He always took an active part in the enterprise of the community, and the product of his mill was known all over the Province as well as on the Mainland. It was very fitting that his funeral service was held in the church that he helped design some fifty two years ago. He was the last surviving member of the building committee when the church was erected in 1879. When the church celebrated its fiftieth anniversary two years ago he occupied a position on its platform programme. In his passing Tryon
