**HOOT GIBSON'S LATEST PICTURE FILLED WITH RAPID FIRE ACTION AND HEARTY COMEDY**

Hoot Gibson lives up to his old reputation for riding slambang into all sorts of entertaining trouble in "Trigger Tricks," his latest western action picture for Universal which opened at the Capitol Theatre yesterday.

This time Hoot takes it upon himself to settle a war between sheep men and cattle men. The fact that the principal sheep rancher is a beautiful girl gives plenty of opportunity for romantic interest.

Hoot displays exceptional ability along the lines of strategy in bringing the sheep and cattle war to an end. What with riding and fighting and various clever schemes, he makes "Trigger Tricks" one of the outstanding pictures of his career.

There is plenty of good hearty comedy of the famous Gibson brand. The picture is exceptional for its scenic beauty, as well as for the rapidity of its action and the dramatic qualities of the plot.

Gibson's role is ideally fitted to his abilities, and he gives a splendid performance from start to finish. Charming Saly Eilers plays the role of the girl sheep rancher, to whose aid Gibson chivalrously rides. Miss Eilers is both beautiful and appealing in an excellent role.

The Capitol serial and Sunny Jim comedy are added features.

**PETERS ROAD AND VICINITY**

We regret to state that on Friday night, 10th inst., the dwelling house of Mr. Malcolm Reid and family, Peters Road, was totally destroyed by fire. According to information received, the family had retired for the night, with the exception of the son, Mr. Benjamin Reid, who was detained in the barn, attending to stock, necessary at this time of the year. On coming into the house

about 12 o'clock, he discovered that the upper part of the house was on fire, and had made considerable progress. On raising the alarm, the family speedily dressed and got out, except the little boy Lawson, who was rescued just in time by his father. Mr. Forest Beaton, a near neighbor, arrived first on the scene, and speedily set to work to save as much as possible of the furniture and other moveables within reach. By this time, the fire was beyond control, as the late hour prevented the arrival of sufficient aid. Much stuff in the upper part of the building, together with a large quantity of potatoes in the cellar, were a total loss. The family are now temporarily residing with Mr. and Mrs. John A. Stewart, Peters Road, whom Mr. and Mrs. Reid and family desire to thank for their kindness in affording shelter, and also the neighbors, Mr. Begton and family and Mr. Lenuel Butler and sons for their assistance during and after the fire. We are informed some insurance covers the loss.

The snow is rapidly disappearing, except some banks that held their heads in mid-air. No runs of water have damaged the roads to any extent. The land is becoming firm, and it appears as if there may be an early start on the land this year. The favorable change of winds to westerly has driven out the ice-barrier some distance, which is a favorable omen for our fishermen.

The repairing and erection of new fences made possible by the absence of frost and snow, will soon be in order.

We are informed that Mr. James Thompson, Alliston, has the contract for the hauling of milk on the Peters Road route to the Cheese Factory at Sturgeon.

Mr. John Hicken, Pembroke, is collector of eggs for the Murray Harbor North Circle, which position he has held for some years. Mr. Hicken's territory is a large one, demanding skill, patience and exactness, all of which Mr. Hicken possesses, especially in this line.

Mr. William McLure, J. P., Murray

Harbor North, is the efficient Secretary for the above circle and reduces the routine of this arduous industry to a concise statement, which explains the financial standing in comprehensive terms.

Mr. James McGuigan, mail-carrier, after experiencing some bad days on equally bad roads, will be glad to see the snow-banks disappear and the pitches likewise, and the advent of a more genial season ushering in the use of the auto car.

**Poem—(To the Cuckoo)**  
 Hall, beautiful stranger of the grove!  
 Thou messenger of Spring!  
 Now heaven repairs thy rural seat,  
 And woods thy welcome sing.

What time the daisy decks the green,  
 Thy certain voice we hear;  
 Hast, thou a star to guide thy path,  
 Or mark the rolling year?  
 Delightful visitant, with thee—  
 I hail the time of flowers  
 And hear the sound of music sweet,  
 From birds among the bowers.  
 The schoolboy wandering through  
 the woods,  
 To pluck the primrose gay,  
 Starts thy curious voice to hear,  
 And imitates thy lay.  
 What time the pea puts on the bloom,  
 Thou fliest the vocal vale,  
 An annual guest in other lands—  
 Another Spring to hail.

Sweet bird; thy bowser is ever green,  
 Thy sky is ever clear;  
 Thou hast no sorrow in thy song,  
 No winter in thy year.  
 O could I fly thy wings with thee,  
 We'd make with joyful wing,  
 Our annual visit o'er the globe,  
 Companions of the Spring.—Logan.

**FERTILIZER ACT CHANGES**

Under the Fertilizers Act a minimum percentage of plant food substances is required for each of the various fertilizer materials when sold singly. Recent changes in regulations under the Act affect certain of these materials, particularly basic slag and nitrochalk.

The total phosphoric acid requirement in basic slag is reduced from 12 per cent to 10 per cent. This will permit the sale of the Sidney, Cape Breton slag without its having to be fortified with natural rock phosphate which made it less popular with consumers.

The required water soluble nitrogen content in nitrochalk is raised from 10 to 14 per cent because the trade has increased its guaranteed analysis to above this percentage. Nitrochalk is a competitive material with nitrate of soda and sulphate of ammonia and contains its nitrogen in two forms, namely, nitrate and ammonia. It is imported from Great Britain in increasing quantities.

Changes of lesser importance are those lowering the total nitrogen in fish scrap and meal from 8 to 7 per cent and the phosphoric acid content of manganite manure from 3 to 2 per cent. Whale meat and bone and whale meat and blood are also added to the list of fertilizer materials subject to a prescribed minimum analysis.—Fertilizer Division, Dept. of Agriculture, Ottawa.

**DOCTORS AT TWO CENTS A DAY**

Doctors of Essex, England, have inaugurated a medical service for the benefit of the \$1,250-\$2,000-a-year man and family. He is offered a full medical service for himself, his wife and children at a cost of two cents a day each. Many families already have joined.

**THRIFT CONGRESS FOR DUBLIN**

As the result of a proposal made by the Central Savings Committee to the Free State Minister for Finance, the Irish Free State is to have its first National Thrift Congress. It will be held in Dublin in June or July, and two delegates from each country will attend.

**DOMESTIC PYRITES SHOW SLIGHT INCREASE FOR 1930**

WASHINGTON, April 15. (U. P.)—The domestic production of pyrites in 1930 amounted to 347,512 long tons valued at \$1,028,680 according to the Bureau of Mines of the Commerce Department here.

These figures show only a slight advance over 1929, when 333,465 tons was produced here. Of the 368,114 tons imported, 325,993 tons came from Spain; Canada furnished 42,117 tons and the United States of Soviet Russia imported five (5) tons.

**FRENCH BACKS PUZZLE JUDGE**

LAWRENCE, MASS. April 17.—No necessity for doffing his hat to any man on a question of law interpretation exists with Judge Frederic N. Chandler, presiding justice of the local district court. But he displayed a somewhat restricted understanding of style terms, as applied to women's and men's wear, during the trial of a civil case here.

A New York wholesale clothing concern was suing a local retailer over a bill of merchandise which included as itemized, "two dozen pairs boys' pants," and "two dozen French backs."

"What are these 'French backs'?" queried his Honor, as he scanned the bill.

"Why, they're pants," replied one of the attorneys.

"Women's or men's pursued Judge Chandler.

"Why men's?" responded the smiling attorney.

"Proceed," ordered the Judge.

KITTERY, Me., April 14.—(U. P.)—Opening a claim he dug on Badger's Island, Benjamin Downing found inside a nickel, dated 1908.

**GANDHI MUST CLOTHE SELF**

BOSTON MASS., April 17.—Assurance of a warm welcome if Mahatma Gandhi, idol of the Indian Nationalists, comes to Boston in the course of his proposed visit to the United States, has been given by Mayor Curley, who decided to send the Mahatma an invitation to stop here.

Such a welcome may be warm in more than one sense of the word, however. The reverend leader must wear some clothes if he expects to make a public appearance here, states Michael H. Crowley, Superintendent of Police and incidentally an admirer of Gandhi.

"We can't let any man appear on the streets here in very much less than a one-piece bathing suit," said the Superintendent. "We shall insist that he be suitably clothed."

Mayor Curley paid tribute to the great Hindu leader of the Indian movement for independence.

"We will give him a royal reception here," declared His Worship. "He is one of the world's great figures and Boston will be proud to entertain him."

Gandhi first stated he would appear in London and the United States in a simple join cloth, his only costume when in India. Later he intimated he might wear trousers at London.

Superintendent Crowley expressed the intention of meeting Gandhi at the station to make sure that he puts on some clothes before appearing in public. The Superintendent was a bit hazy as to whether or not Gandhi would be allowed to camp in some public place here and cook his own meals.

**NATIONAL WRITER PRAISES NEVADA'S INDEPENDENCE**

RENO, Nev., April 17.—Nevada's complete independence of thought in all its law-making activities is the most interesting thing in connection with recent enactment of the "wide open" gambling and six weeks divorce laws, in the opinion of Samuel G. Blythe, nationally known magazine writer, a visitor here.

"Nevada is the only state left that appears willing to go its own way without bowing to precedent," Blythe said. "It is the real opponent of state's rights, something that would probably give Thomas Jefferson a real thrill."

"The gambling situation here does not look any different to me than on my last visit to Reno several years ago," he said. "I think an exaggerated picture of the situation is being painted."

**COLLEGE DADS AND SONS BATTLE**

NASHVILLE, Tenn., April 17. (U. P.)—Vanderbilt University has a father and son baseball team. Big Bill Schwartz coaches the nine. His son, Little Bill, is captain and first baseman.

**THINKERS**

(C. E. MacKenzie)

The joke told about the man who could not imagine why his wife was sore at him when he remarked to her "that in place of using a clothes brush to drive a nail, she should use her head, has brought to the writer's mind a statement made by the president of a large business concern, namely, "I have too many men who agree with me and not enough who disagree. I am not always right. If I am right even fifty percent of the time I am lucky. I want someone to come back at me with a different proposition, not the one I submit. This business needs more thinkers and fewer 'yessers.'"

How wide is the application of this same thought? It is not limited to a big business, nor to those who obtain their livelihood by working for others. It applies to every man and woman in our province from the heads of the governments down to the individual in the most humble sphere of life. Anyone can run with the crowd and say "yes" to every suggestion of the leader, but it takes a thinker to create new ideas and forge ahead to the point of becoming a leader himself.

When we are called upon to exercise the privilege of the ballot, (something for which we have to thank the thinkers of the past) do we allow ourselves to be carried away with party feeling or the flow of language of some silver tongued orator? When we discuss our provincial or federal affairs do we state our own views or merely repeat what has been said by our favorite politician? In the same way it may be asked do we use our own thoughts in local, school and church problems? Do we do our own reasoning or just take the way of the least resistance and say "yes" to the proposal of the leader or would be leader of our own community?

Coming down to our own businesses, do those of us who are engaged in farming think out our problems from every angle and in the light of changing conditions, or do we simply accept the theories of our fathers and neighbors? It is safe to say that if a survey were made of the successful farmers of the province, one would find them to be, in a large percentage at least, men whose methods show departures in various essentials from the generally accepted methods of their neighbors. They are men who have taken the trouble to think, and who have the hardihood to face the ridicule of their fellow farmers and change their methods as their thoughts dictated. To think is unquestionably more difficult than to acquiesce, but whether it be in great things or small, it carries its own reward.

Let us then do our own thinking, accept advanced views as they coincide with our individual problems and make the most of our lives.

**BRITISH PARLIAMENT DEPRIVED OF MATCHES**

LONDON, April 17.—Smokers among members of the British Parliament will, in future, be forced to buy their own matches.

As part of the great governmental economy wave the Office of Works recently issued an order that when the present stock of matches supplied to the House of Commons is exhausted no further supplies will be provided.

It would appear at first that this is a paltry saving—but records show that 12,000 boxes of "ship matches"—good, stout sticks, two inches long—are used at a single session of Parliament.

**FESS URGES FREEZE IN PRIZE BE BLANK**

WASHINGTON, April 17.—The historical frieze encircling the rotunda of the capitol will remain shy 26 feet, if Senator Simeon Fess, Repn. Ohio, has anything to say about it.

The frieze depicts the history of the country up to the including 1848, but stops there with 26 feet left. Many discussions have been held in recent years as to what should go in the vacant space, but no action of any kind has been taken.

The space should constantly remain open, says the Ohio senator, who is chairman of the Joint Committee on the Library which has jurisdiction over all art works in the capitol, as a reminder to those who see it that the history of the country is not yet completed.

**SINGING SHERIFF WRITES SONGS FOR CAMPAIGN**

JACKSON, Miss., April 17.—When Gillis Gato, south Mississippi sheriff, started campaigning for railroad commissioner of the state, he wrote a number of songs about himself.

At each town where he was scheduled to appear he would make his "stage speech," strum his guitar and sing his songs. Most of them were about himself and told of his desire that voters work for him and nominate him for the commissionership.

Gato, a veteran peace officer, is known as the "singing sheriff."

**Gay "No! I Want Fellows"**

**For Loss of Appetite**  
**Nervousness**  
**Exhaustion**  
**Retarded Convalescence**  
**Anemia**  
**Malnutrition**  
**Bronchial Troubles**

If Fellows' Syrup were not such a remarkable success as a tonic for youth and age, it would not be so widely imitated.

If you need Fellows' Syrup, don't let anyone sell you something else, claiming it to be "just as good."

Fellows' Syrup is always uniform because it is compounded with great care and skill, and each laboratory process is rigidly controlled.

The delicate balance of your system is too important to trifle with. Say "Fellows'" and resolutely refuse to accept substitutes.

**FELLOWS' SYRUP**

**DAM WATERS TO SUBMERGE THREE NEVADA TOWNS**

LAS VEGAS, Nev., April 17. (U. P.)—The famous "Lost City" of prehistoric times will be submerged under the waters of the Colorado river as soon as water begins to accumulate behind the Boulder Dam.

The waters of the river will cover the city 50 feet. The present town of St. Thomas will be under 70 feet of water and the adjoining village of Koailli will be under 25 feet of water.

Compensation for damages is now being adjusted. The 300 residents of the Mormon town St. Thomas will move farther up the valley.

**ILLNESS MORE FREQUENT IN LOWER ECONOMIC GROUP**

ST. LOUIS, Mo., April 17. (U. P.)—Illness is decidedly more frequent in the lower economic groups, according to Frank J. Bruno, professor of Sociology at Washington University here.

In a study of the casual relation between illness and dependency he found 83.1 percent of St. Louis families receiving charity were also in need of medical care and that 2.37 percent were physically disabled.

A study of 22,600 deaths reported by 12 insurance companies reveals a higher death rate among the poorer classes. Bruno reported. The infant mortality rate increases definitely as the income of the parent declines, he also reported.

**CHEESE INDUSTRY SHOWS 120 MILLION PRODUCTION**

WASHINGTON, April 17.—A complete review of the American cheese industry for 1929 has been issued by the Census Department, of the Department of Interior, showing an annual production valued at almost \$120,000,000.

The cheese industry, the report shows, varies but little from year to year, and the figures gathered in the 1929 census can be applied to any other year in the past decade.

In 1929, the report states, 2,760 establishments produced 113,246,952 worth of cheese of all kinds.

Wisconsin leads in the production of fine cheeses with almost 325,000,000 pounds in 1929 valued at almost \$68,000,000, as compared to 47,000,000 pounds in New York and 25,000,000 pounds in Illinois.

**HUBBY CHARGES SPITE MARRIAGE**

MEMPHIS, April 17.—Charging his wife said she "married him just for spite," W. P. Bucher filed suit for divorce here recently.

**Mackerel Fishing**

Mr. S. T. Gallant, Supervisor of Fisheries has received the following interesting letter which speaks for itself.

Masonic Home, Charlottetown, April 13, 1931

My Dear Sir:—Having read with marked interest your article on the Fishery Industry in The Golden Future I am amazed that so little space is allotted to mackerel. When I was with S. A. Fowle & Co., and J. S. Carville, 1858 to 1866 and visited and corresponded many years after mackerel was the high line industry, barring agriculture. Has no one succeeded my old friend Churchill and others in Rustico and North Shore? Cordially,
