"The Bad One"

In the most brilliantly acted, and most colorful role of her career, not even excluding, "What Price Glory," and "Ramona" Dolores Del Rio made her debut in talking pictures at the Prince Edward Theatre yesterday, with the opening of United Artists "The Bad One,' with Edmund Lowe.

Not only does the star excel all her previous efforts on the screen in the matter of characterization, but she lends through the medium of her voice alternate elements of vibrant force and charm.

"The Bad One" is entertainment at its very best, with enough of music and drama mixed with its comedy to make it universally liked. It is replete with thrilling episodes, tinctured with amusing situations and near the end with a touch of melodrama and near tragedy when the star and her lover are embroiled in a breathtaking prison revolt.

From sheer comedy "The Bad One" dips into serious drama at the end when "Lita" sacrifices herself to voluntary confinement in an island penal institution to be near the man she has wronged.

In this intensely interesting picture Edmund Lowe plays once again his typical role of the go-getting male pursuer after beauty. Just as Miss Del Rios characterization is the most striking since her meteoric rise to popularity, so is Lowe's interpretation of the boldly amorous American the most spectacular in which he has been seen for years.

Similar praise must go to Don Alvarado who is one of a quartet of villains composed of Ralph Lewis, Ullrich Haupt and Mitchell Lewis. Adrienne d'Ambricourt, playing "Mme. Pompier," the cafe proprietress, adds much of delightful humor to the picture. Others cast in important roles are Blanche Friderici, Yola D'Avril, who is seen as a cafe hoyden; John St. Polis, Victor Potel, Henry Kolker, and Tommy Dugan.

You have probably noticed in paying certain bills that all robbers do not wear masks.

Closing Stock Letter

By LOGAN & BRYAN

Special to Johnston & Ward

BY THEIR OWN PRIVATE WIRE

NEW YORK, Dec. 10—The market opened in good form today, firmness to moderate gains being the rule. New York Central whose directors declared the regular 2.00 quarterly dividend was particularly strong in early dealings presumably on short covering. Attention was focused on the appearance of the Steel tonnage figures which were foreshadowed by the estimate of Iron Age, that publication also reported further recession in Steel activity, but nevertheless, there was reported a pickup in the demand for fabricated steel. The announcement which finally came concerning the Steel tonnage showed something over 157,000 tons. The absence of any bullish demonstration in connection with the steel tonnage figures invited some professional selling on an aggressive scale at the beginning of the last hour and prices were driven down two to four points in many instances, but most of the list closed fractionally above the low points for the days with several prominent issues recovering about half way from their lows. The market showed disposition to resist at the preceding low level and we incline to the belief that upturns will be accomplished with greater ease than reverse tendencies.
