CLYDE RIVER—On Sunday, Mar. 26th, the service in the Presbyterian Church, Clyde River, will be at 3 p. m., S. School at 2 p. m.

YORK PASTORAL CHARGE—Services on Sunday, March 26th, will be: York, 11 a. m.; Brackley, 3 p. m.; Central Church, 7 p. m.

HUNTER RIVER CHARGE—United Church of Canada. Services for Sunday, March 26: North Wiltshire at 11 a. m.; Wheatley River at 3 p. m.; Hunter River at 7 p. m.

BROOKFIELD—The services in the Brookfield Congregation on Sunday, Mar. 26th, will be as follows: Hartsville, 11 a. m. and Brookfield, 7 p. m.

CRAPAUD, Saint John's Church, March 26: Evensong, 7, Hymns, 395 (1), 403 (3), 782 (1), 404 (2); Springfield, Saint Elizabeth's Church, Morning Prayer, 11. Service every Wednesday evening at 8 during Lent at Crapaud.

SAD BEREAVEMENT—Mrs. A. L. Wright, 82 Brighton Road, yesterday morning received the sad news of the sudden passing of her sister, Mrs. Jos. R. Taylor, at Taylor Village, N. B. Mrs. Taylor visited Charlottetown last summer and was known to numerous people in Prince Edward Island.

ISLAND LADY ENTERTAINED—Mrs. H. S. Bishop, of Woodstock, N.B., entertained charmingly at the tea hour on Wednesday afternoon when the guests were the members of the Ladies' Aid and the Associate Aid of the United Church. The drawing room was attractively decorated with spring flowers. The tea table, which was presided over by Mrs. J. B. Gardner, was centred with a silver vase of tulips and lighted by yellow tapers in silver candlesticks. Mrs. Bishop was assisted in receiving by Mrs. E. B. Allen. Those serving were Mrs. L. A. Rogers, Mrs. A. C. Brooks, Miss Helen Jones, Miss Muriel McWald and Miss Mary Stewart, of Cavendish, P.E.I. Mrs. Douglas McBride replenished, and little Miss Elizabeth Corbett opened the door. — Woodstock Carleton Sentinel.

PERSONALS
Mrs. Foster Moore, of Charlottetown has returned home, after spending the winter in Boston, Mass.

Mr. L. W. Roper, Federal Live Stock Promoter, who left Halifax by steamer on Monday evening arrived in St. John's, Nfld., yesterday. He is visiting Newfoundland to investigate the markets there for the sale of Prince Edward Island cattle.

In this city.

As for the explanation, opinions vary widely, but one Halifax psychologist appears to have as good a theory as any. Jig-saws, he says, satisfy a craving to do something apparently difficult, although actually easy. They allow the puzzler, he claims, to accomplish a pleasing piece of work without much mental exertion.

Dr. S. H. Prince, psychologist at Dalhousie University, believes the popularity of the fad to be due to mob psychology—the desire to imitate. Incidentally, he holds that jig-saws reveal interesting traits of character in the persons solving them. For instance, a hit-or-miss style in assembling puzzles reveals a person who would go about his ordinary duties in haphazard fashion. On the other hand, he says, a methodical, logical thinking person would carefully size up the situation; look over the pile of units, locate the right one and slip it into position on the first or second try.

Another Halifax doctor has been experimenting with jig-saws. He holds a watch while adults work them and then hands the puzzles over to a 12 year old boy. The lad invariably assembles them in half the time of the older fans, demonstrating that whatever other qualifications may be needed, abnormal brain capacity is not a requisite of the jig-saw puzzle expert.

Fish Landings Off In The Maritimes

HALIFAX, March 24—Fish landings in the Maritime Provinces decreased 2,426,500 pounds in February, as compared with landings during the same month last year, according to the report of D. H. Sutherland, chief supervisor of the eastern fisheries division.

The total catch during February was 7,023,700 pounds having a landed value of \$193,689, compared with \$450,200 pounds valued at \$207,835 in February last year. Decreases were noted in the three provinces.

Among the principal varieties taken, however, substantial increases were noted in the lobster and scallop fisheries. The increase in lobster was due to the season being open during February in southwestern Nova Scotia. The catch in New Brunswick fell off 3,200 pounds and the value decreased accordingly.

The scallop fishery showed satisfactory results, heavy increases being shown both in Nova Scotia and New Brunswick. The total production for Nova Scotia was 6,048 gallons, shelled, valued at \$14,084, compared with 1,354 gallons valued at \$2,518 in February, last year. The total production in New Brunswick was 6,408 gallons, shelled, valued at \$13,802, compared with 200 gallons valued at \$300 in February, last year. Prince Edward Island showed a decrease in all varieties except flounders.

The catches by provinces:
Nova Scotia: Total quantity of all fish landed, 326,500 pounds, valued at \$115,609, compared with 5,428,900 pounds, valued at \$100,029 in February, last year.
New Brunswick: 2,588,200 pounds, valued at \$75,441, compared with 3,864,700 pounds, valued at \$102,465, in February, last year.
Prince Edward Island: 109,000 pounds, valued at \$2,639, compared with 156,500 pounds, valued at \$5,341, in February, last year.

A New One

Five-year-old did not like the dark. You must not be afraid of the dark, said mother. But Mummy, protested the little one, it gets in my eyes and I can't see anything.

Blind Professor Forsees Great Astronomic Progress

WILLIAMS BAY, Wis., March 20—Amid the quiet atmosphere of his home, a blind man, who has taught many to learn the secrets of the universe, visualizes an amazing degree of scientific progress during the next 100 years.

He is Dr. Edwin Brant Frost, former director of the Yerkes Observatory who won world renown as an instructor of astrophysics. Whether man, within that period or beyond it will find an answer to the age old question as to the possibility of intelligent life beyond the earth, he is not prepared to say.

"It is reasonable to assume, however, that thousands of yellow stars closely resembling our sun in physical and chemical characteristics are quite as likely to have habitable planets circulating about them as has our sun," he said, "I suspect that life would develop on a planet ready for it as naturally as familiar processes occur on the earth." And methods of detecting and of transmitting radiation he added "May develop in ways undreamed of."

"But believing, as I do, that the progress of science in the next 100 years will be even more rapid than in the last, I think it unwise to get limits on discovery for the future." The occasion for Dr. Frost's remarks was the recently announced discovery of Dean Charles B. Lipman of the University of California that bacteria had been found in the interior of stone meteorites—a fact which has led some scientists to speculate further on the theory that original forms of terrestrial life may have been brought to the earth by these aerolites hundreds of millions of years ago.

Pointing out that he was expressing a personal opinion and was speaking in no way for Yerkes Observatory, Dr. Frost said that positive proof of the existence of living organisms in meteorites would only shift the point of origin to some other unknown body. In this connection he also called attention to the slowness of any inter-communication in sidereal spaces.

glanced in the net of an opponent's skate. This gave the St. Pats new life but try as they might they could not break through. Just before the bell Mills got away with five of the St. Pats up the ice and beat Mabey for their second and last goal. Final score St. Eleanors 2; Albany 1.

Critely Lea of Summerside very efficiently refereed the game, with just two penalties handed out.

The total score of the series was: St. Eleanors 4; Albany 2.

After the game James Clark went on the ice and congratulated the winners and also the losers on their good sportsmanship. After which little Patsy Clark, small daughter of James Clark presented the trophy to Gordon Bennett, Captain of St. Eleanors team.

The line-up was as follows:
ST. ELEANORS **ALBANY**
GOAL Horace Mabey
DEFENCE
S. Barlow L. Howatt
R. Harris L. Noonan
J. Chappelle N. Walsh
Fred Mills
FORWARDS
G. Bennett M. Delaney

The Robert Simpson Eastern Ltd. have appointed Mr. Lloyd Proude as their special representative in this province, their store being on Kent St., near the Revere Hotel.

LONDON 'HELLO' GIRLS SHUN COMPLIMENTARY OFFER OF EXTRA WORK

LONDON, Eng., March 24—Because they are "undoubtedly superior," girls have been asked to take the telephone operators' shift in the evening as well as the daytime but while enjoying the compliment they have thus far refused to accept the offer because they do not wish to force male operators out of work.

Sir Kingsley Wood, Postmaster General, under whose supervision falls the telephonic communication, has asked the girl operators to volunteer for evening duty between 8 and 11. Men have hitherto operated during these hours but universal complaints of tardiness and careless service have resulted in the requested change.

Although the girls have been offered extra pay they are at present through their union, refusing to countenance the proposal because they fear it would cause the men to lose their jobs. Besides, they declare with the true feminine touch, "we want our evenings for our own pursuits."

Fortune Given To Charity

LONDON, March 24—An old lady of shreds and patches whom her neighbors thought to be on the verge of destitution has been revealed as a veritable fairy godmother—the possessor of a \$50,000 fortune and all willed to charities and distributed in \$500 gifts to reward little acts of kindness shown to her.

And behind her legacies are stories scarcely less strange than that of Mrs. Ann Berresford—real romances of this every-day world, only matched in the fairy tales of old. For more years than neighbors can tell, Mr. and Mrs. Berresford lived in Collyhurst road, London (Eng.), in what appeared to be the poorest of circumstances, but always refusing proffered help.

No light was ever seen within the house, and there was never anything to indicate that there was ever a fire in the place. When Mr. Berresford died at the age of 84 two neighbors for the first time entered the silent house.

One of these, a widow with two children, told the reporter that Mrs. Berresford had to go to the hospital after the old man's death. "While she was there," said the widow, "I visited her daily for about a fortnight. She died shortly after her husband, and was buried in the ornate family grave at the Southern Cemetery.

"Now I find she has left me \$500. "It was a great surprise to me. I did not even know she had money to leave to anyone. True romance underlies the story of another \$500 legacy to a flower-seller named Mrs. Tetlow.

The two women met on Victoria Station, Manchester, and the flower-seller, moved to pity by the other's drab and forlorn appearance, pressed a shilling into Mrs. Berresford's hand.

With a whimsical smile and a muttered word or two of thanks, the old lady took the coin and insisted on getting her benefactor's name and address.

And the old lady of shreds and patches never forgot the flower-seller with the heart of gold. Mrs. Tetlow's \$500 will be used to help her own paralyzed daughter. Louise Howarth and Mrs. Elizabeth Jones, who have been bosom friends for nearly 20 years, are two more of the beneficiaries of Mrs. Berresford's will.

Miss Howarth is a niece by marriage of Mrs. Berresford, and together with her friend often set out to give her aunt and uncle, whom they believed to be very poor "a good time."

"I had always an idea," Miss Howarth said, "that my aunt had wealthy relations. It was a surprise to me to find she herself had so much money."

POOLING PLAN WILL SAVE HALF MILLION

C. N. R. And C. P. R. Agree To Pooling Of Passenger Services Between Montreal And Toronto —Ottawa and Toronto

(Special to the Guardian)

MONCTON, N. B. March 24—The following official statement was issued jointly today by Canada's two major railway systems The Canadian Pacific and Canadian National Railways have agreed in principle to pooling of competitive passenger service wherever practicable. Detailed arrangements for making the pool effective, east and west, will take some time to complete but in order to effect immediate economies the two companies have arranged for a partial pooling of passenger service between Montreal and Toronto, and the pooling of all passenger service Ottawa-Toronto, these consolidations to be effective on Sunday, April 2nd.

An economy of well over half a million dollars per year will result from these initial developments in the pooling arrangements. Under the new plan effective Sunday, April 2nd, the fast afternoon train service between Montreal and Toronto will be consolidated. Instead of the two fast trains each way daily, there will be one afternoon pool train in each direction.

The westbound pool train will leave Windsor Station daily at 3:15 p.m. and travel over Canadian Pacific tracks to Dorval, where it will cross over to the Canadian National lines, for the balance of its journey to Toronto, which will be reached at 9:45 p.m. westbound this pool train will make all its present stops and at Brockville, it will connect with a pool train leaving Ottawa at 3:15 p.m. The eastbound afternoon pool train will leave Toronto by Canadian National Railways at 3:30 p.m. and will arrive Bonaventure Station, Montreal at 10 p.m. At Brockville a pool train for Ottawa will connect with this fast afternoon train the passengers using this service arriving at the capital city at 10:10 p.m. The trains in this service will be designated and advertised as pool trains and the tickets by other company will be honored on them. Between Ottawa and Toronto to the Canadian National will pool its day and night trains with the Canadian Pacific. The pooled night service for the traffic of both lines will be over the tracks of the Canadian Pacific via Peterboro. The Canadian Pacific will maintain its morning service between Ottawa and Toronto and accept through tickets of both companies of these trains.

The Toronto-Ottawa afternoon service as already stated will be on the pooled trains via Brockville. The pooling arrangement is an extension of the continued reduction in passenger service to meet the decline in passenger traffic. It is felt that the pooled services will provide ample facilities for all present requirements.

NEW YORK, March 24—A world of greater leisure and greater humanization of the working day was advocated by Dr. Goodwin Watson, of Columbia University, in a study made public on "what technocracy means for education."

Elimination of the gold standard for the "product standard," extension of the scrip and barter system on a wide basis and abolition of time clocks were some of the things he urged.

The fence in front of the farm was badly damaged, and it seemed to the sensitive Mrs. Dairymaid the farmer's wife, that all the neighborhood was talking about it. "When are you going to mend that fence?" she asked her husband one day.

"Oh, next week," when George comes home from college. He said in his letter a week back he had been taking fencing lessons, so he can try his hand on that fence."

THAT UPSET MORNING FEELING YOU HAVE

Nine Chances in ten It's "Acid Stomach" How You Can Easily Correct It

According to many authorities, some 80% of the people of today have acid stomach. This because so many foods, comprising the modern diet, are acid forming foods. It usually makes itself felt in sour stomach, indigestion, headaches, nausea, "gas," "biliousness," and most frequently in stomach pains that come about thirty minutes after eating. So you can easily tell if you have it.

Now Quickly and Easily Corrected

If you do have acid stomach, don't worry about it. You can correct it in a very simple manner. Just do this. It will *neutralize* your acid stomach almost immediately. You will feel like another person. TAKE—2 teaspoonfuls of Phillips' Milk of Magnesia with a glass of water every morning when you get up. Take another teaspoonful thirty minutes after eating. And another before you go to bed.

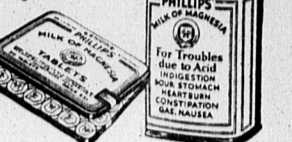

PHILLIPS' Milk of Magnesia

Neutralizes Food and Tobacco Acids a few minutes after taking.

What This Does
That's all you do. But you do it regularly, EVERY DAY, so long as you have any symptoms of distress. This acts to neutralize the stomach acids that foster your "upset" stomach, that invite headaches and that feeling of lassitude and lost energy. Try it. Results will amaze you. Your head will be clear. You'll forget you have a stomach. BUT—be careful that you get REAL milk of magnesia when you buy; genuine PHILLIPS' MILK of Magnesia. See that the name "Phillips" is stamped clearly on the label.

ALSO IN TABLET FORM:

Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of fine Phillips' Milk of Magnesia.

Made in Canada

housewives do not realize what a variety of fish is available to them from Canadian sources, and perhaps they do not realize how many different ways there are of cooking these healthful food-stuffs. They are apt to use only two or three kinds of fish and follow the same methods of cooking again and again. Then, perhaps they think they have run the whole gamut of fish as a food.

But fish may be cooked in many ways. They may be broiled, pan-broiled, sautéed, fried in deep fat, baked, boiled, steamed, stewed, fricasseed, braised, pot-roasted, cooked in a casserole, or cooked by the Spencer method in a very hot oven with a minimum of time and labor. Or they may be made into broth or bisque or soup or chowder, salad, or soufflé, or creamed or scalloped.

Fish foods may be cooked in these many different ways, and made into dishes suitable for every meal. What could be more tasty for breakfast, for example, than a kippered herring or some finnan haddock or a fine salt mackerel? Or, for dinner, a piece of halibut or salmon or cod or whitefish or haddock? Or, for supper, an oyster stew or a scalloped dish? Or what more delicious than a fish chowder or salad or a clam stew? The list of dishes that may be made from Canadian fish and shellfish is almost innumerable. Those which have just been suggested are only an example or so given at random.

"Different people want to do their work in different ways," he writes. "Some will welcome the tense four-hour day with its opportunities for free time after working hours. Others will want to put more friendliness into their work. For that type we should be away with punching the time clock. Rather, we should have the employer serve his workers tea and lemonade during business hours. Let a group of employees congregate around a workbench and swap jokes, while they relax in the odor of tobacco smoke, if they want to. "People should be treated like human beings, not like typewriters. We need less efficiency and more satisfaction today. A man should be able to leave home for his day's work, whether it is to his office or factory, with the same zest and joy with which he starts in a camping or fishing trip. . . . Schools should not emphasize speed and efficiency any longer. We need leisure."

He said the "humanization of industry" would tend to get rid of "gangsters and racketeers."

"If we wanted to run the (economic) system intelligently, instead of traditionally, an annual income of more than \$10,000 for each worker of the United States could be a reality. Dr. Watson, professor of educational psychology at Teachers' College, with Dr. Harold Rugg and Dr. Harold P. Clark, is inaugurating a new course to consider all phases of economics.

The fence in front of the farm was badly damaged, and it seemed to the sensitive Mrs. Dairymaid the farmer's wife, that all the neighborhood was talking about it. "When are you going to mend that fence?" she asked her husband one day.

"Oh, next week," when George comes home from college. He said in his letter a week back he had been taking fencing lessons, so he can try his hand on that fence."

Fish Provides Great Variety For The Table

OTTAWA, March 24—(C.P.)—How many housewives have ever stopped to think how great a variety of fish foods there is available in Canada? Beef, poultry, mutton and pork, with veal and lamb, make up the list of available changes in the case of meat. But there are so many different kinds of Canadian fish.

From the Atlantic, for instance, Canadians get cod, haddock, hake, halibut, mackerel, salmon, alewives, herring, smelts, sardines, and swordfish, and other fish, as well as such shellfish as lobsters, clams, oysters, and scallops. From the Pacific come salmon, halibut, herring, pilchards, black cod, oysters, shrimps, crabs, and so on, while from the fresh water fisheries we get trout, whitefish, pickerel, tullibee, goldeyes, etc.

As a matter of fact more than 60 different varieties of food fish and shellfish are taken from Canada's commercial fisheries, and all of them of prime quality. Probably a good many Canadian
