

1 IN 8 WILL DIE OF CANCER UNLESS WE PROVIDE

1 - More Education. 2 - Early Diagnosis. 3 - Early Treatment. 4 - Increased Facilities.

CANCER CAMPAIGN For Funds Opens Tuesday, June 8

\$5,000 Needed So That 1^{Out} Of 3 May Be Saved

Early Cancer Is CURABLE

Cancer is curable — provided it is detected early enough. But cancer specialists cannot make the rounds of Canadian homes, probing for the early sore in the housewife, collecting a case history of the man of the house, examining son or daughter. That isn't the way we operate in Canada and, even if we did work things that way, there wouldn't be enough doctors.

The public must take the initiative in this matter of early detection. Such initiative, however, can only be expected where there is public awareness of cancer, where there is

public understanding of its nature and treatment.

To enable Canadians to face this problem fairly and squarely is the task of national education — a task which has been shouldered by the Canadian Cancer Society.

The Canadian Cancer Society is dedicated to education of the general public, to co-ordination of individual and group efforts across Canada, to the promotion of research and, last but not least, to collecting from the public the necessary funds to carry on the fight.

The opening gun of the drive will be fired on Tuesday, June 1st, when thirty of our leading citizens comprising the "Special Names Committee" will call on the business firms to make certain the success of the campaign.

Believes Baby Black Market To Be Stopped

By IRVING C. WHYNOT
SAINT JOHN, N. B., May 27—(CP)—The Saint John Children's Aid Society is "headed in the right direction" in efforts to halt the baby black market operating out of the city, president Travis W. Cushing said tonight.
Mr. Cushing, who presided at the meeting of the society which disclosed operation of the international baby market last Thursday, said the press had been the "chief factor" in bringing the matter to public attention.
"The press had brought the thing to a point where something more vigorous is being done," he said. "We think we are headed in the right direction now."
The Society had not yet heard from Premier John B. McNair on its request for a meeting with him on the matter. Mr. McNair also is New Brunswick Attorney General.
The ring, as uncovered by the Society, operated from Saint John and had sold more than 50 babies, mostly in the Eastern United States, during the past year for prices ranging up to \$1,500.
Although it was possible members of the ring might be working within the law, Mr. Cushing said he doubted if adoptions were being formalized in the United States.
"And we don't know how they get the babies across the border. That's another thing we want to find out."
"We are, in effect, the guardians of dependent and neglected children and these babies certainly

Claims U. S. Income Taxation Is Higher

OTTAWA, May 29 — (CP) — Finance Minister Abbott repeated in an interview recently his budget statement that three out of every four Canadians would pay more income tax on their present income if they lived in the United States.
In his budget speech, he accompanied that observation by a set of tax-comparison tables which showed what Canadians pay in income tax and what an American pays if he lives in New York State, where there is a state income tax in addition to the Federal levy.
Asked whether his observation about higher taxes would apply only if the hypothetical Canadian lived in New York State, Mr. Abbott said it was meant to cover all the United States since the majority of states have income taxes.
He explained that he and his officials had chosen to include the New York tax in the American tax burden because it was "fairly typical" of State taxes and made a "pretty fair" comparison with Canada. If anything, his figures were biased against Canada, he said.
Mr. Abbott, in giving the Canadian figures, made no allowance for medical expenses and other deductions, took family allowances into account as being in lieu of additional income tax relief for children, and assumed all income over \$30,000 to be investment income and subject to an additional four-per-cent tax.
The American figures assumed the taxpayer there pays New York

State tax as well as Federal, makes allowable deductions for medical and other expenses, and take advantage of provisions for splitting incomes between husband and wife. Mr. Abbott's comparisons follow:
