

Almost Distracted

Dreadful Suffering by a New-market Woman.

The Bones in the Nose Affected - Face Would Swell Until Her Eyes Were Closed - How Relieved.

NEWMARKET, ONT. - "I have had a good opportunity of noting the great medicinal powers of Hood's Sarsaparilla. My wife has been a sufferer from catarrh for the past four years, and the disease had gone so far that the bones of the nose had become affected and particles had come away through an opening in the left side. Her eyesight was also affected to the extent that for nearly a year she was unable to read for more than five minutes at a time. She suffered

Severe Pains in the Head

and at times was almost distracted. She was treated by four different doctors, one of whom was a specialist. They all said they could not do anything for her, as the disease had gone too far. Her nose would swell about every three days until her eyes would almost be closed. Then it would break through and the swelling would subside for a day or two. About Christmas she commenced taking Hood's Sarsaparilla, and since that time has steadily improved. She has not been troubled with any swelling since, and the sore on the side of the nose has all healed. She is on the road to a complete cure. I cannot speak too highly of Hood's Sarsaparilla, and I cheerfully recommend it to any person who is suffering with catarrh." W. H. FURBER.

N. B. If you decide to take Hood's Sarsaparilla, do not be induced to buy any substitute. Be sure to get Hood's.

Hood's Pills cure liver ills; easy to take, easy to operate.

Lawyers and Other Men

THE MORNING GUARDIAN.

TUESDAY, FEBRUARY, 28, 1899.

INGRESS AND EGRESS.

Prime essentials to the enjoyment of a landed possession or a domicile are the rights of ingress, egress, regress and progress. The right to come and go and the means of coming and going at all times, together with the necessary facilities for effecting these objects are basic principles on which the enjoyment of life and liberty largely depend. If the farmer were confined to his farm, or the city householder confined to his dwelling by stress of circumstances other than sickness; forbidden to go, or send, or hold communication with other persons, they would feel in some respects like prisoners wrongfully imprisoned or kept "on the limits." Yet these are in the main, conditions to which this entire province has from time to time been subjected in its relations with the outside world. Our people are greatly restricted in regard to travel, the sending out and receiving of goods and products, the receipt and sending out of mails, &c, by the intervention of the ice-blockade. Added to this is the unaccountable condition of our telegraphic communication, which is limited to twelve hours out of the twenty-four.

These restrictions are not all of a kind that admit of easy remedy. Something has been done, and something is doing to remedy the worst of our grievances in so far as they are remediable. The ice-boat service by the Capes is being maintained, a second winter steamer is being built to be ready for service next season, and we can judge quite easily to what extent this will ameliorate existing conditions. It is clear that there will still remain very great difficulties of ingress and egress to and from the Island. It is also to be observed that we are proceeding along the old lines, which offer no prospect of a full and satisfactory remedy for our isolation during four months of the year.

This is the age of experiment. Why not try some new, or hitherto unused measure or appliance? The tunnel scheme is admittedly too costly for our limited population. The Dominion will not spend so many millions as would be required to accommodate 110,000 people in that way. Why not try a balloon service at the Capes? Balloons successfully cross the English Channel, which is three times as wide as our Strait. With a medium sized balloon and a fair wind the crossing would be but a matter of a few minutes. Some such resource seems to be clearly indicated at times when the ice-boats are stopped for days by the "lolly." In these days of skilled aeronauts and dirigible balloons the experiment seems well worth trying. The expense would not be great. Two men in a balloon could easily have brought our mails from the mainland day after day during the past week, while we were waiting for the boats. To some the notion may seem chimerical, but it appears to be reasonably practicable - and at least as promising as the experiment with the Petrel.

What does The Examiner mean by saying: "We are free to admit that a great deal of nonsense is talked about the prevalence of the disease," (tuberculosis in cattle)? A very prevalent belief is that many stock-owners fear to have their cattle tested for tuberculosis lest they be found diseased. The remedy will come by and by when consumers here as in other cities give a preference in price for milk from cows to which the tuberculin test has been applied and which have been found free from disease. In St. John milk from a herd that has been tested is regularly advertised as such and commands the highest price with a rapidly growing demand.

The Best Cure for La Grippe. If you have this severe form of cold try Griffiths' Menthol Liniment internally and externally. It is pleasant to take and apply, and will break up a cold and stop the coughing in a single night. Try it. All druggists, 25c.

KIPLING'S ILLNESS.

The illness of Mr. Kipling in New York is undoubtedly serious, and will cause grave concern to many friends and admirers wherever the English language is spoken. It has been given to him to achieve a wide fame and popularity at an early age, mainly because, in his poems especially, he has given apt and timely expression to those sentiments of imperialism which are so pleasing to loyal men everywhere under the British flag. He has also furnished a voice to the entire world of Anglo-Saxondom, and has done not a little toward drawing Britain and the United States closer together in more harmonious relations.

Mr. Kipling's illness came on quite suddenly on the night of Monday, the 20th instant. He had been well and in fine spirits during the day and had visited his American publishers, Messrs. Doubleday and McClure. During the night he showed symptoms of fever. Two doctors were called in and reached the conclusion that he was suffering from inflammation of the right lung. He has every care and attention, his devoted wife and children being with him. Our despatches speak of his being now at the crisis of his disease, this being the ninth day since he was taken ill.

When Gen. Miles' expedition landed in Porto Rico, Col. San Martin, the Spanish commander at Ponce, was taken completely by surprise. Col. San Martin had 1,000 men, but no cannon, and so he retreated to the interior and the advance of the Americans was thenceforth more like a pleasant excursion than a military campaign. When San Martin reached San Juan he was court martialed by order of Captain General Macia and ordered to be shot. He asked only one favor - that was that he might die in Spain. The request was granted. Gen. Brocke and other American officers wrote letters declaring that San Martin could not have done other than he did, and on the strength of these his sentence has been commuted to life imprisonment in a penal colony whose climate is little better than that where Dreyfus is.

The reported serious illness of the Czar, if true is a matter of grave concern to the world. It may turn out to be an unfounded rumor. The cable correspondents are under strong temptation sometimes when news of importance is scarce, to make the most of the slight indisposition of some great ruler.

Stubborn Coughs.

Some Coughs seem hard to shake off - stick right to you in spite of all you do to get rid of them.

Those are the kind of Coughs that are dangerous - that weaken the lungs so that the germs of Consumption find a ready foothold.

Now, there's no remedy will cure stubborn Coughs - Coughs that won't let go - like Dr. Wood's Norway Pine Syrup.

It allays the inflammation, soothes the irritation, heals the diseased mucous lining of the Lungs and Bronchial Tubes, and rids the system completely of all the bad effects of lingering Coughs and Colds.

Dr. Wood's Norway Pine Syrup. Price 25c. All dealers.

It is expected that General Lord Roberts, who rendered very eminent service in Afghanistan, and who is commander of the British forces in India, will visit America this year.

The term Saragossa sea is applied to a portion of the ocean in mid-Atlantic. It is in the centre of the whirl caused by the gulf stream and other ocean currents. Owing to the comparative stillness of the waters in that part of the ocean, immense growth of sea-weeds are found there.

New farm lands have been opened in Ontario in the Rainy River district, in the west, and in the neighborhood of Lake Temiscaming in the north east. From reports sent by settlers from these districts it is believed that the conditions of soil and climate are such as to make farming profitable.

Correspondents who have written THE GUARDIAN for publication will please be patient. These about to write us will also do well to make their favors as short as they consistently can. Letters, some of them too long, are accumulating in this office. News is always welcome.

Half time.

SIR. - I take notice that the section men on the P. E. I. R. are, this winter, again, on half time. Why is this? Is it for the sake of economy? Surely not. If it were, I should think that it would not be the poor laboring man, who receives the lowest wages, that would be the first to feel the fruits of this economy by having his wages reduced one half.

Why not reduce the wages of the foremen as well as the laborer? I suppose that would not work, for, as you are aware, nearly all the foremen are Tories, and we must love our enemies. So think the wise men at Ottawa at all events.

I am informed that the section men on the I. C. R. are on full time. Are they any better than our P. E. I. men? If not, why this difference? Where is our Minister (with portfolio) at Ottawa now? The laboring man's champion who declared that "if the Liberals got the reins of power, half-time would be a thing of the past on the P. E. I. R.?" He surely does not know that there is such injustice meted out to our railway employees. If he does know he should see to have the wrong made right.

March Winds Prevail. Causing chafed and roughened skin. British Almond Pink is the ideal preparation. Chapped hands, roughness of the skin, made soft and smooth by one application. After washing and before completely drying the skin, apply and rub in until absorbed. Not sticky, pleasantly perfumed. Popular Price 25c. Our sales have been very large of late, of this popular article. A. W. REDDIN, Phm. B. Central Drugstore. Sunnyside.

More Care Necessary in-Fitting Children's Shoes. We have used our best judgment in selecting children's footwear with regard to wear and fitting qualities. More care should be taken in the matter. Cheap shoes are apt to ruin young and tender feet. Buy them of a good quality, get them long, spring heeled and not too wide, then the feet will grow as nature intended they should, not twisted and shoved out of shape. Infants' Soft Sole Boots, (the good kind) 55c. Children's Spring Heel Boots, larger size \$1.00. " " sizes 8 to 10, \$1.10. ALLEY & Co.

It Pays to buy at Perkins. CAN YOU SPARE A MINUTE AND SAVE DOLLARS?
