RAFT — BENNET IN "HOUSE ACROSS THE BAY" AT THE PRINCE EDWARD

Highly emotional drama and honest-to-goodness thrills are in store for filmgoers when they witness Walter Wanger's new film production, "The House Across the Bay," which opens today at the Prince Edward Theatre, with George Raft and Joan Bennett heading an imposing cast of Hollywood topnotchers. This new picture not only introduces a new romantic team composed of Raft and Miss Bennett, but it brings the beautiful Miss Bennett forward in one of her most varied and exciting roles to date.

Miss Bennett, in a word, looking more ravishing than ever, plays a straight dramatic role—and she does it strikingly and brilliantly. In addition, the star withthe brunette tresses does her first dancing on the screen—a new type of rhumba which required tireless practice and intricate studio rehearsals. Miss Bennett's dancing equals her acting, which is another way of saying that the glamorous star has added another laurel to an otherwise long list.

As for George Raft, his impersonation of Steve Larwitt, a latter-day gentleman of means and ambitions, is as deft as it is clever. Raft knows how to fill his screen characterizations with life-like qualities, with punch and drama, with humor and imagination.

Others who contribute stirring and unforgettable portrayals in "The House Across the Bay" are Gladys George, Walter Pidgeon, June Knight and Lloyd Nolan. Gladys George, as a worldly-wise wife whose husband is serving a prison sentence, goes an impressive piece of down-to-earth acting, while Walter Pidgeon as the second male lead is a romantic hero who hasn't been typed at the studios.

Archie Mayo directed "The House Across the Bay" with tempo and rhythm, working steadily and surely to an exciting and unexpected climax which leaves the audience tense and breathless. The story is told compactly and with speed; the dialogue is excellent and the background scenes are beautifully lighted and photographed. The film has no waste motion and no artificial drama—it is a story told in a down-to-earth manner, highlighted by excellent acting and crisp direction.

Included on the program are three short subjects—A Travalogue, an Our Gang ..... and a Popular Science Reel.

UNION ROAD W. I.

On October 1st, 1940, a meeting of the Union Road Women's Institute was held at the home of Mrs. Tom Mellish.

Meeting opened by repeating the Creed in unison.

Elsie Mellish was appointed secretary pro-tem.

Nine members answered the roll call with one visitor present.

The minutes of the last meeting were read and approved.

New correspondence was dealt with, and sewing and knitting received for Red Cross with new work being distributed. The different committees gave their reports and following are the committees appointed for the month of November: Sick, Mrs Lloyl Mellish and Elsie Mellish. Programme, Evelyn Ross and Ray Carver. School, Mrs. George Mellish and Mrs. Ira Ross. After a call for nominations, it was moved and seconded that Elsie Mellish be appointed secretary. Motion carried.

Next meeting is to be held at the home of Mrs. Kistle Ross, roll call to be answered by a riddle.

Lunch was served by the hostess, and after a short program the meeting adjourned.

NORTH WINSLOE W. I.

The September meeting of the North Winsloe W. I. was held at the home of Miss Winnie Cudmore with eleven members and two visitors present. Meeting opened by singing It's a Good Time to Get Acquainted and reading the Creed in unison. The roll call was responded to by an exchange of apples. Minutes of the August meeting were read and approved. Yarn was distributed among the members for knitting socks. Eight pairs of socks were given to Mrs. John Carter to be forwarded to the Red Cross office. It was moved and seconded that in the future fruit will be sent to members only "for the duration."

The following new officers were appointed as those that were elected are not members, Director, Mrs. Earl Clark.

Auditors, Mrs Oliver Munn and Miss Eva Coles.

Mrs. Stanley Younker and Miss Rena Younker were appointed to attend the annual meeting of the T. B. League.

A letter of thanks was received from Mrs. Reginald Munn. One new member was welcomed to the Institute. Mrs Irving Laird invited the members to her home for the October meeting, roll call to be answered by naming a battle of the Great War Collection amounted to 60 cents. Miss Winnie Cudmore put on a cake contest which was won by Mrs. Earl Clark.

Meeting closed by singing National Anthem. Lunch was then served by the hostess and a pleasant hour spent in social intercourse.

School on Wheels Teaches Democracy

NORTH BAY, Ont., Oct. 21 —The story of how the principles of democracy are taught to foreign settlers in the more remote districts of Northern Ontario was told recently by Frederick Sloman, teacher in charge of "The School on Wheels" Car No. 1, built and operated by the Canadian National Railways on its transcontinental line between Capreol and Foleyet stations.

The school car, one of the half dozen operated by the National System and staffed by the Ontario Department of Education, was brought specially to North Bay so that the teachers of the Nipissing district might have an opportunity to inspect the movable school and learn something of its work from Teacher Sloman during the two-day convention here. In his explanation of the teaching duties which range from the first form to matriculation, Mr. Sloman stated that the 50 members of his class, ranging throughout the dozen grades and scattered along 150 miles of railway are but a small part of his educational duties. It is after school hours close that his really serious work commences, for then he spends his late afternoons and up to midnight in instructing the scholars' parents and even grandparents into the principles of citizenship and democracy.

Sea Fisheries 85 p. c. Of Total Production

MONTREAL, Quebec —Canada's fisheries production in 1939 had a total value of $40,072,976, of which the sea fisheries contributed $33,-972,301, or 85 per cent, and the inland fisheries, $6,100,675 or 15 per cent, according to the Natural Resources Department of the Canadian National Railways. Compared with 1938 the value of the sea fisheries showed an increase of $198,-153, while the inland fisheries decreased by $618,153. These figures represent the value of the fish as marketed, whether sold for consumption fresh, canned, smoked, or dried. The salmon fishery was by far the most important, its value amounting to 33 per cent of the total. Following, each with a value of almost four million dollars, were the lobster and herring, while cod, with slightly more than three million dollars, was fourth on the list of the chief commercial fish. By reason of her great salmon fishery, British Columbia ranked first among the provinces in order of maketed value of product. Nova Scotia held second place, with the cod, lobster and haddock fisheries accounting for more than half of the marketed value of the Nova Scotia production. New Brunswick was in third place, with the output of the sardine and lobster fisheries representing 65 per cent of the total value of the fisheries production of the province. Prince Edward Island also has an important lobster fishing industry. Fresh sea-foods are one of the major tourist attractions of eastern Canada.

Over 1,700 Educational Meetings For Fishermen Have 91,000 Audience

Organizers Visit 2,779 Places in Maritimes and Magdalens, Attend 1,632 Conferences—Similar Work also Carried on in Mainland Quebec And British Columbia

Over 91,000 persons, 91,544 to be exact, attended 1,765 meetings held during 1939-40 by lecturer-organizers, in the program of special adult educational work carried on among the fishermen in the Maritime Provinces, the Magdalen Islands, and British Columbia — graphic evidence of the scope and importance of this work in the fishing communities. Actually, indeed, the figures are larger than those given, for some meetings in mainland Quebec have been left out of account since complete records in regard to them were not available.

In the Maritimes and Magdalens the educational program was carried out under arrangements made by the Dominion Department of Fisheries, with instruction given by trained workers in adult education from St. Francis Xavier University. On the Pacific coast the work was done by the extension division of the University of British Columbia, with financial assistance from the department and in mainland Quebec the department aided in meeting the cost of educational work carried on among fishermen by the High School of Fisheries, Ste. Anne de la Pocatiere.

Figures showing the number of meetings held and the size of attendance do not tell all the story of the work not by any means. Further examination of the reports made to the department, indicate that between March 31, 1939, and March 31, 1940, over 1,150 study clubs were organized. In the Maritimes and Magdalens alone the organizers visited 2,779 fishing communities, addressed 1,620 meetings with audiences aggregating 85,979 persons, and attended also over 1,600 conferences and meetings of organizations and study clubs.

In British Columbia, during the same period, 144 general and directors meetings were attended with 5,565 persons present, and 100 study clubs were formed. On the mainland of Quebec, though work was still in its initial stages, lecturer-organizers organized something like 60 study clubs.

As initiated in 1936-37 the departments special educational work is designed to make available to the fishermen competent assistance and guidance in organization and study for action looking to solution of their problems. First undertaken in certain northeastern districts of New Brunswick, the work is now carried out in that province in Nova Scotia, Prince Edward Island, and the Magdalen Islands under the original plan by workers of St. Francis Xavier.

Cost $46,000

In 1939-40 the total cost of the department for this educational work, including the amounts given to aid the University of British Columbia and the High School of Fisheries, respectively, in carrying out instruction to fishermen, amounted to slightly over $46,000. Expenditures by areas, roundly stated, were: Nova Scotia, $15,000; New Brunswick, $12,500; Prince Edward Island and Magdalen Island, $4,100; Quebec (mainland), $6,200; British Columbia, $3,600. In addition some $4,400 was used in assisting young fishermen from the Maritimes and the Magdalens to attend fishermen's extension courses.

The increase in the number of clubs fromed by fishermen for the study of clubs formed by fishermen for the study of the problems of their industry with a view of reaching a solution of their own problems has been striking since the department started the special instructional work in the Maritimes. Among other developments traceable to this programe has been the co-operative canning of lobsters, the co-operative marketing of smelts, and other fishermen's co-operative efforts.

CHICAGO COACH MAY BE COME BACK

SAN FRANCISCO. Oct. 21 (CP) —Clark D. Shaughnessy, the football coach who last season suffered the ignominy of an 87-to-0 defeat and then had his school—the University of Chicago—simply fold up its football team and turn him adrift, is once more riding high.

Seldom has a gridiron mentor made such an instantaneous impression on the press and public of the Pacific Coast.

He has taken the "sick Indian"—which is what the pitying fans have been calling the once-great Sanford—and turned him into a strong and dangerous warrior.

What the rest of the tough coast conference schedule holds for Shaughnessy and his team is uncertain, but simply on performances to date the erstwhile Chicago U. coach is a hit.

MOOSE STRUT HIGHWAYS DURING CLOSED SEASON

MONCTON, N. B. 22.- Down in New Brunswick the moose are becoming so plentiful that they are coming out on the highways and giving hunters the "raspberry"-the season, there is a closed season. Just recently A. Wilcox employed as a general foreman in the Canadian National Railways shops at Moncton was driving in an adjacent county when he encountered a moose calmly standing in the middle of the road. For some time the animal stood there and after giving Wilcox the horse-laugh, took its time about lumbering off into the woods. Up near Campbellton, one moose even trotted after a hunter driving along the highway after the hunter had tried to push the moose out of the way with the bumper of his car when it disputed the right of way. In Sackville, a college town, a bull moose sprouting seven-point millinery ambled down the streets of the town paying not the least bit of attention to on-lookers.

News Briefs

HALIFAX, Oct. 22.—(CP)—Outbreaks of diphtheria of a more virulent strain than has been known here in recent years, have cropped up in the city, Dr. A. R. Morton, City Commissioner of Health and Welfare, said yesterday. Dr. Morton announced 15 cases were being treated at the infectious disease hospital.

LONDON, Oct. 22.—(CP Cable)—The Polish Telegraphic Agency reported today that it has now become known that Maciej Rataj, Polish political leader and patriot, was "outrageously murdered" in May by the Gestapo (German Secret Police) at Warsaw.

ABERDEEN, Idaho, Oct. 22.—(AP)—Thirty sacks of potatoes arrived here from Oregon for distribution to relief clients. Aberdeen farmers couldn't quite understand. They raise the nationally famed Ihaco potatoes, but prices are so low they have been giving them away.

ISTANBUL, Oct. 22.—(AP) —The authoritative newspaper Yeni Sabah reiterated today that Turkey is prepared to defend herself against any axis threat.

LONDON, Oct. 22.—(CP)— R. S. Hudson, Minister of Agriculture, told the House of Commons today that Britain's food position had been rapidly improving and that British Agriculture is "in a well-balanced condition to meet the demands which the next year's campaign will make." The Minister, nevertheless, said a rigid economy is necessary, because "I cannot foretell the shipping position this winter."

CORNWALL, Ont., Oct. 22.—(CP) —Defence Minister Ralston inspected the military training centre here today and saw 750 young recruits go through their training routine. He also watched the progress through Cornwall of troops returning to Petawawa camp after week-end military manoeuvres in the Montreal district.

OTTAWA, Oct. 22.—(CP) — Returning from his visit to the United States, the Earl of Athlone arrived in the capital today accompanied only by his secretary, Sir Suldham Redfern. Princess Alice and Lady May Abel Smith, their daughter, remained in the United States on a private visit.

LONDON, Oct. 22.—(CP Cable)—Four Canadians, members of the Royal Air Force, have been awarded the Distinguished Flying Cross, the Air Ministry announced last night. They are:—

Flt.-Lt. A. W. Fletcher, whose father lives in Lethbridge, Alta.; FO. R. C. Bissett, whose wife resides in England; FO. Wilfred J. Burnett, of Garden Creek, N. B.; Flt.-Lt. Garfield J. Prior, of Indian Head, Sask.

LONDON, Oct. 22.—(AP) — Neville Chamberlain definitely left Downing Street today after five years of residence at Nos. 10 and 11. He moved to a residence in the country. No. 10 is the residence of the Prime Minister, and No. 11 that of the Chancellor of the Exchequer, which post Mr. Chamberlain held before becoming Prime Minister in 1937. His belongings had remained at No. 10 after Winston Churchill succeeded him as head of the government.

OTTAWA, Oct. 22.—(CP) —Canadian business operations, advancing without important interruption since early in 1939, reached a higher volume of output in September than at any time in history, the Dominion Bureau of Statistics reported today in a survey of economic conditions in Canada. On the basis of preliminary calculations, the Bureau said the index of physical volume of business showed an increase over the previous month, but the exact figure was not available. The figure for August was 152.5 and for September last year it was 125.8.

London, Oct. 22. — (CP) — The Marquess of Lothian, British Ambassador to the United States, who arrived in Britain Sunday for a brief holiday and to report on conditions in the United States, was received by the King this afternoon. Prime Minister Winston Churchill lunched earlier with the King.

NEW YORK, Oct. 22.—(AP) — A change-over in American airplane manufacture from the present aluminum alloy construction to stainless steel is predicted by steel makers. They say that, under pressure of the national rearmament program, the steel industry is on the threshold of quantity production of a thin, high-tensile stainless steel which will "revolutionize" airplane construction. The new steel is thinner than the paper upon which this is printed. A strip of it hangs limply from the fingers, resembling a piece of light tinfoil. But it has a tensile strength of 185,000 pounds to the square inch.

ROME, Oct. 22—(AP) —Premier Mussolini returned to Rome today after completing an inspection of Italian troops near the Yugoslav border. He slipped back into the blacked-out capital quietly and unannounced.

Bomb Splinters

By Douglas Amaron
Canadian Press Staff Writer

LONDON, Oct. 22—(CP)—Bomb splinters from the Battle of Britain:—

The ageing woman stuck out six weeks of constant bombing, had to evacuate one home and put out 43 incendiaries near another. Finally she decided to go to Gloucester for a quiet weekend. She came back the next day on a stretcher. A cow kicked her.

The home of T. T. Champion, former London manager of the Canadian Press was damaged in an air raid. Mr. and Mrs. Champion were uninjured but the house was made totally uninhabitable.

Nazi airman Franz Von Werra, after escaping from a prisoners' camp in northwest England, swam two rivers attempting to reach the coast. Shepherds found him hiding among tall rushes on the moors. "I am a soldier and it is the duty of a soldier to rejoin his unit," he said on surrendering.

A ring made from a shell picked up on the beach of Dunkerque was used at the wedding of Irene Fauset, 23, of Liverpool, and Aime Boistelle, 33, officer of the Free French Army. Boistelle, an evacuee from Dunkerque, and Miss Fauset became engaged in an air raid shelter.

Damage estimated at £70,000 ($311,500) was caused by bombing of The Temple. Among buildings hit were the middle temple, the library tower, parts of Goldsmith Building, Elm Court, Essex Court and Crown Office Row. None of the damage is beyond repair but renovation will not begin until after the war.

YOUNG HOUSEWIFE IN HIGH SCHOOL

EDMONTON, Oct. 21 —(CP) Although married and a housewife, Mrs. Helen Mascius of Edmonton is determined to finish her schooling and perhaps attend classes regularly. Mrs. Mascius says "it it exciting and a lot of fun," although she is 10 years older than most of her students. One day she forgot to do her home work and was "kept in" 20 minutes like any other student in the school.

LINK HOUSEWIVES FOR CONFIDENCE

LONDON, Oct. 21. —(CP) — A housewives' service, a system which already has won its spurs in Air Raids Precautions work in London and elsewhere in England, is being organized in the Midland region. Aim of the service is to co-operate with the wardens and other A.R.P. workers and to promote a feeling of confidence and neighborliness. Members of the service meet in street groups and take training in A.R.P. and accident aid.

IS ELECTROCUTED

GOLDBORO, N.S., Oct. 14.—(CP) —Herbert MacCarthy, 27, of Caribou Island, was electrocuted when he touched a high tension wire in a private dwelling here today. He was repairing the wire at the time. A coroner's jury decided death was accidental.

Careful Fall Spading Speeds Crops In Spring

In the fall plow or spade up your garden for vegetables, burn all debris and leave the ground in the rough until spring. The winter freezing and thawing will benefit it.

This treatment is especially advisable for heavy soils. Such soil is in some ways most trying to the amateur, but it repays in good measure the well-directed efforts put upon it.

One of the new facts well established about plant growth is that

Spading Heavy Clay Soil.

plants take from the soil the building materials they need only in liquid form. So we water our gardens and find that the soil which is retentive of water in just the right way seems to encourage plant growth.

We speak of this quality as the mechanical condition of the soil, and when soil is in good mechanical condition it is known as friable or mellow soil. When taken in the hand it crumbles easily, and while it allows water to run through it quickly it retains water, as a sponge which has been squeezed out still remains moist. Most plants refuse to thrive in a soil which holds too much water, but demand that the soil shall retain just enough.

Heavy soils are made friable by breaking up the cohesion of their particles. This is best accomplished by mixing with them decayed animal or vegetable material, which makes humus. Anything which is decayed or will decay readily is useful, but substances slow to decay should not be mixed with the soil of a cultivated garden.

All forms of wood, including shavings, are detrimental. Leaves decay slowly and should be buried deeply or piled up to rot in a composite heap. Humus is black and colors the soil. Black soil is usually in good mechanical condition, though not necessarily fertile, while some of the most fertile soils are not black and yet are both rich and friable; for example, the brown limestone soil of Kentucky.

Other things than humus are useful in making clay soil friable. Pulverized limestone is excellent, for it not only loosens but sweetens the soil. Wood ashes, hard coal ashes, sand and even cinders will serve. Much is accomplished by tillage.

Each time soil is handled its manipulation becomes easier and its condition better, provided a single precaution is taken, which is especially important with heavy soils. Never work any soil when it is too wet and never clay soil when it is too dry. The usual test is to mold a handful into a ball and then strike

FOR SALE

Desirable property on Spring Park Road, Charlottetown, for immediate sale. This property has modern dwelling, large barn and an acre of well cultivated land.

Apply to
