

OFFICIAL STATEMENT

LONDON, Aug. 16.—Winston Churchill, the Home Secretary, in the House of Commons yesterday, said that the strike situation in London had improved very much. He denied that the soldiers at Liverpool charged the rioters on Monday with fixed bayonets, and also denied that there was any volley firing. The troops, said the Home Secretary, had fired only individual shots. The Home Secretary declared that there were good grounds for believing that the London freight handlers were beginning to realize the advantages that they had secured by the recent settlement arranged between them and the employers, and that they realized that it would be folly to jeopardize these advantages by any ill-considered action. If no untoward events occurred, Mr. Churchill continued, the commissioner of police hoped to continue to maintain order in London without the necessity for calling in military aid. The situation in Liverpool, continued the Home Secretary, was not satisfactory, but the last reports received were favorable as regards to the keeping of order and the distribution of the necessary food. The chief of police at Liverpool had sent a telegram that there need not be any great importance attached to the rioting in the city yesterday. The rioting, the chief police said, took place when there is any abnormal excitement. The object of the rioters, Mr. Churchill said, according to the police chief's reports was simply to attack the police, who were tempted into an area where disorder is chronic side streets where barricades, the sanitary dustbins and wire entanglement. The object of the rioters, Mr. Churchill said, was to enable the police to fight them to more advantage.

ANNOUNCEMENTS

Joseph's Convent Bazaar during exhibition week in the Market House. 8-18111. Attention is called to the Farm for sale ad. of J. A. Thomas, Stanchel, Lot 67, which appears in this issue. 8-18111.

POSSE IN SEARCH OF WIFE MURDERER

BEDFORD, Mass., August 16.—All through a posse of police and armed citizens carrying lanterns searched the woods in every direction all night. A search, who, the police say, stabbed his wife, Mrs. Elizabeth A. Darrah, to death with a butcher's knife, was still at large today. The police of every town and city in Eastern Massachusetts have been notified to be on the lookout. The man, who had been employed as a farm hand where his wife was cook, left several days ago after quarrelling with her. Later yesterday afternoon he appeared at the home of Thomas Coyle, in Lexington, a short distance from the farm, and telling his trouble to Coyle, asked him to go with him to his wife and bring about a reconciliation. Coyle refused. About an hour afterwards, the latter saw Darrah running down the street in an effort to catch a Boston car.

MARRIED

CAMPBELL—McDONALD—At Charlottetown on August 16, 1911, by Rev. Ewan MacDougall, Malcolm H. Campbell of Kinross, P. E. Island, to Mary Ann MacDonald of Oriskany.

BOSTON BIRDMAN IN SPECTACULAR FLIGHT

TORONTO, O., Aug. 16.—Exactly 520 miles from his starting point, Harry N. Atwood, the Boston aviator, who is attempting to break the world's long distance aeroplane record by flying from St. Louis to New York, landed in Toledo late this afternoon, after completing the third day of his trip with a spectacular flight 2,000 feet above the city. He covered the 120 miles from Elkhart, Ind., to Toledo with only one stop, and in an actual flight time of 2 hours and 56 minutes. He started from Elkhart at 8.06 a. m., was compelled to stop at Pettisville, O., for more than 5 hours because he had run out of gasoline, and continuing his journey, guided by the track of the Lake Shore and Michigan Southern Railroad, he arrived in Toledo at 4.02 p. m.

SUNLIGHT SOAP

A BASKET FULL of clean, sweet-smelling linen is obtained with half the toil and half the time if Sunlight Soap is used. Sunlight shortens the day's work, but lengthens the life of your clothes. Follow directions.

ABSORBINE

Removes Bursal Inflammations, Rheumatism, Swellings, Sprains, Cuts, Filled Tendons, Soreness, Bruises, Burns, Scalds, Cuts, Sprains, Lacerations, Ailments, Itchiness, Eruptions, Eczema, etc. It is the only medicine that can be used on all these ailments. It is the only medicine that can be used on all these ailments. It is the only medicine that can be used on all these ailments.

MAGIC BAKING POWDER

BEATS TRAIN TIME Between some of the stations Atwood beat the schedule time for ordinary trains. In the last lap of the day's run, he whipped up such a speed as hardly to be visible for longer than a minute at any one angle. The 23 miles from Pettisville to Toledo in 50 minutes, including a delay for starting and time lost in a landing place, the Bostonian's arrival here was as exciting as was his trip over Northern Indiana and Ohio, greeted him as he came in from the Steam whistles and thousands of people on top of office buildings West. All the way in he had been sliding "up hill" to get a good view of the town, he said, instead of alighting in the West End, he shot clear over the city and landed near the mouth of the Maumee River in the Eastern Section. Intense interest marked its progress. When swooping low to read the names of the railroad stations, great crowds, including farmers, who had come in by automobiles from miles around, frantically yelled for him to come down. Some brought bouquets and lunches for the aviator, while policemen and municipal officers abandoned their posts to join in the ovation. Before the aviator whizzed into town, his machine coming on like a rapidly growing spot in the Western horizon, the telegraph offices were kept busy with inquiries as to his whereabouts. Whenever two minutes elapsed without a word from him an impatient message went over the wires: "Can you give us any news of the big bird?"

Going toward Pettisville, Atwood noticed that his gasoline was giving out and he was compelled to alight to land. While attempting to rise again with A. Leo Stevens of New York as a passenger, the wings of his machine brushed against nearby trees, and both men were almost dashed out. Stevens was knocked against a fence but escaped injury. It was necessary to abandon the passenger-carrying project. At Pettisville, Atwood decided to remain in Toledo tonight and tomorrow at 8 a. m. to start for Cleveland by way of Sandusky. He intends to return in Cleveland over tomorrow night. Atwood is now 745 miles from New York. With 520 miles already travelled he will on arriving in New York, have to his credit 1,265 miles, as computed by railroad mileage, including 286 miles from St. Louis to Buffalo and 439 miles from Buffalo to New York. But Atwood asserts he will be entitled to considerably more than this as he covered fifty or more miles in circling over St. Louis and Chicago and made detours en route. He said tonight he would not definitely decide whether he would continue on to New York until after his arrival in New York.

MELBOURNE, Aug. 16.—The strike of sugar cane cutters in Queensland, which involved thousands of men and threatened to spread to many other trade unions throughout the Commonwealth has been satisfactorily settled. The men in future receive \$7.50 per week and to work no longer than eight hours. Marriages are at present more frequent in New South Wales than for fifty years past. The increase during the past five years has been as high as ten per cent. Detectives from Perth are now engaged in shadowing two Russians in the settlements "out back." The man are suspected of having been involved in the bounds-ditch affray in London when soldiers show down two anarchists who defied the police. Strength is given to the suspicion by a report that one of the men when intoxicated accused the other of being the well known anarchist "Peter, the Painter."

BELIEVE THEY HAVE PETER THE PAINTER

The men will be arrested on a minor charge and full particulars of the case forwarded to the Scotland Yard authorities in London. The police here have no doubt that the men are members of the gang involved in the London sensation. PROVERBS OF OTHER PEOPLE. The eyes believe themselves, the ears other people.—German. Constant occupation prevents temptation.—Italian. Those that are quick to decide are unsafe.—Greek. It costs the devil little trouble to catch a lazy man.—Danish. The whole ocean is made up of little drops.—French. You may call that your own which no one can take from you.—Dutch. A wise man and a fool together know more than a wise man alone.—Italian. He who heedeth not the last shoe will soon lose his horse.—German.

CHARLOTTETOWN AND QUEEN'S COUNTY

It pays to buy in this Province. J. R. McDonald, City, returned last evening on the express from Summerside. A boy is wanted to learn a trade. Four dollars per week is offered at the beginning. See classified column on first page. T. A. Peters, of the Fruit Division, Ottawa, was among the passengers returning on the Northumberland last evening. Misses Nina and Emma Keenan, City, went to Summerside yesterday afternoon where they will spend a few days visiting friends. Fred and Mrs. Fisher, Sackville, N. B., arrived in the city last evening. While here they will be the guests of Sir Louis and Lady Davies. Norman R. Brown, the ice-cream vendor, City, is suffering from a severe attack of typhoid. He is in a hospital undergoing treatment and was quite ill last night. W. S. Lea, Engineer, Montreal, who has been visiting at his former home in Victoria for the past week, leaves this morning on return. He was at the Queen. Mrs. Maurice Gallant, Rustico, Mrs. Antonio Painchaud, Amherst, M. I., and Mrs. J. Blaquiere, La Verriere, M. I., left yesterday afternoon on the eastern train en route to the Magdalen Islands. Charles Tompkins, the popular acting manager of the Bank of New Brunswick here, who has been relieving Mr. Pethick during his absence on a vacation, leaves this morning on return to St. John. Mr. Tompkins was at the Queen. Dr. J. S. H. Leard, Mrs. Leard and child, Rev. C. Charles Gray, and Miss I. H. Barnshaw, Boston, were in the city yesterday and left during the day for Hampton where, for the next three weeks, they will be the guests of Mrs. M. Smith, Hampton Beach. J. A. Thomas, a successful motor man on the Boston Elevated Railway; a son of the late Samuel Thomas, Augustine Cove, was in the city yesterday. Mr. Thomas has been visiting his aged mother as well as at his wife's home in Stanchel and other friends. Those registered at the Queen Hotel yesterday were—C. E. Pratt, St. Peter's; G. and Mrs. Parkinson, Montague; J. L. Craswell, Halifax; M. Lalonde, Mt. Stewart; A. B. McLeod, Cornwall; J. M. McKenzie, Hartsville; J. E. Lamer, T. Wentworth, Montreal; H. Heshin, St. Louis; P. W. Morris, City; Thos. C. Savage, A. H. Dixon; T. C. Savage, Montreal; H. Heshin, St. Louis; W. Morris, City; A. H. Dixon, W. L. Lea, Montreal; W. W. Owen, Jr., Mt. Vernon, N. Y.; Mrs. H. A. Dingwell and daughter, Cambridge; F. A. McRidley, St. John; Mrs. Wetherell, Sydney; W. L. Robinson, W. H. Lebon, Boston.

At an early hour yesterday morning one of the large trees in Queen Square, just opposite C. W. Patterson's, was blown down. The tree was particularly large one and had stood the guests and tempests of many years. The wind yesterday morning was very heavy, especially so about two a. m. Yesterday men were engaged in removing the tree and repairing the damage it had caused to posts, wires and wire fences around plots in the garden. An old citizen states that this tree and the other Balm-o-Gilead near by were planted over fifty years ago by Coles and Whelan, two of the Island's best known and most powerful legislators of the early days. The tree blown down was that planted by Hon. Mr. Coles. Its partner is said to suffer from weak condition and liable to suffer the fate of its sister tree at the hands of the first sale of a similar force to yesterday mornings' which may occur.

Recall "93?" Hair Tonic and Dandruff Cure is one of the best preparations of its kind on earth. It cures dandruff, strengthens and beautifies the hair, prevents baldness and improves the scalp. Price 50c. and on a country road was brought here in a bottle. We are sole agents here a justice of the piece who had drif. fined him before.

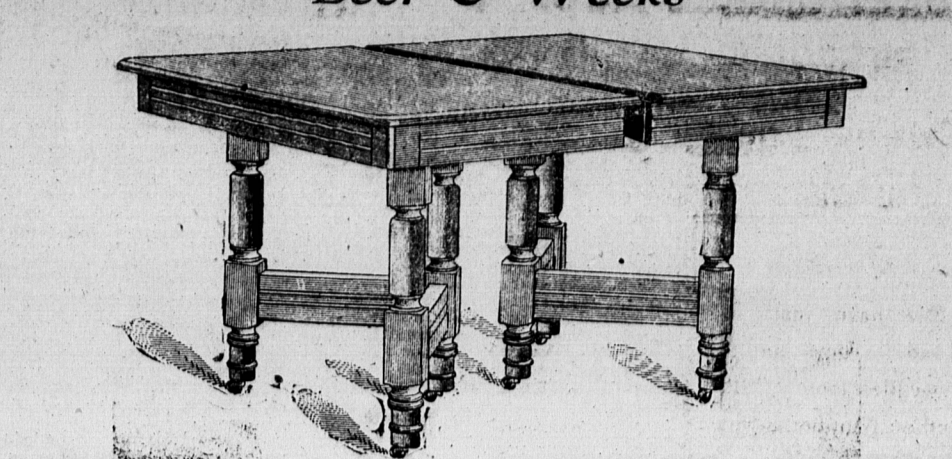

Go to Huntain, Bell & Co., for coal.—6-2644. The business whose type-writing needs are the most exacting, is the business that is not met by it, absolutely. It is more than you expect in a typewriter. United Typewriter Co., Halifax, N. S. 8-164831. NO GOOD. A motorist who had been searching for a country road was brought here in a bottle. We are sole agents here a justice of the piece who had drif. fined him before.

Wild Canada prospecting trip to Seymour Inlet, an arm of the Pacific, over two hundred miles north of this city, which runs inland a distance of 35 miles. They have known or some time of an immense dyke of magnetic iron ore which extends down the inlet and is owned by Colin Jackson, and their plan was to discover the extension of the dyke, providing it crossed the inlet. The fact that they caught the extension and were able to trace it for a distance of one and a half miles, proves the correctness of their theory. The ore samples which they brought back are sold magnetic iron of extremely high grade, and the quality is identical with the iron ore mined on Texada Island, which is used in the steel works at Everett and Seattle. The lead, according to Mr. Martin, is 100 feet wide on an average, throughout the entire length of the five claims they staked. Some idea of its thickness is gained by the knowledge that it crosses the inlet beneath forty fathoms of water. The ore can be mined easily and the expense of loading it into vessels and bringing it to Vancouver will be nominal. The above is taken from a recent Vancouver paper. The Mr. Martin referred to was formerly of Banquet Pt. Rd., and is a brother of Dr. J. F. Martin, B. I. don. He left this province in 1898 and has not revisited his former home since then. His many friends in this province will heartily congratulate him on his success in the far west.

It is simply impossible for this space-saving IDEAL Folding Bed to close accidentally. It is self-balancing in any position. Works with springs, not weights, and is so light and perfectly balanced that a child can operate it. All metal—therefore vermin-proof. No parts to work loose, wear out or break. Bedding kept in perfect order, always open to air. Canopy permits artistic draping—open or closed it is a handsome piece of furniture. Be sure and ask for the IDEAL Folding Bed, and see that it bears our trade mark. Ask for name of dealer nearest you. Write for Free Folder No. F136

We are showing a fine line of Extension Tables

When you want a SATISFACTORY extension table—one which stands firm upon its feet—slides open and closes easily—one which is strong well finished and beautiful to look upon—See our line.

We show some eighteen or twenty styles—all good—in ash, surface oak, solid oak and quarter sawed oak mounted on legs and on pedestals.

\$6.00 Buys This 5 leg Table This special value extension table is made of hardwood, finished in dark golden oak. When open it extends 6 feet; when closed it measures 42x42 inches. Supported by 5 legs, is strongly constructed and works smoothly and easily. With 3 extra leaves and castors. This table will compare with usual \$8 values. Mail orders filled same day as received. Money back if dissatisfied.

Beer & Weeks FURNITURE CARPETS LINENS

"You have been out with that machine again, have you?" demanded the justice. "Frightening horses again, eh? Why don't you get a flying machine if you want to beat time and be eccentric?" "It would be no good," wearily replied the prisoner. "You would arrest me for frightening the birds." —Royal Magazine.

HOT WEATHER HINTS.

If extreme cold is bad, extreme heat also works as great ill to the flock and every provision possible should be made to counteract it and keep the fowls clean and comfortable. How about protection against the sun? It is simple; I have seen a flock of hens happen, there are no pants like a flock of sheep penned up waiting to be sheared. They will not continue laying long under those conditions. Shade should be provided by trees in your park if a park is used. If, sometimes, eggs that were spoiled, no and no vines have been planted to cover the fences and thus furnish shade, it is well to erect some kind of a barrier which will help some. Wild cucumber vines, or the seeds rather, should be sowed in the late fall all along the outside and about six inches from the park fence. They will come up the next spring and by the middle of June will cover the whole fence, adding much to the appearance and giving lots of shade for the flock, the water should be changed at least twice a day. If you don't think chickens appreciate a cold drink on a hot day just leave a supply of warm water beside the cold and see which they will drink; they will leave the warm for the cold every time. Another thing I have noticed; neglect to keep your layers supplied with cold water and see how quickly the quality of your eggs depreciates. I have seen eggs that were spoiled when laid, because they came from an over-heated hen, and I want to say right here that the keeping of an egg should begin before it is laid; that proper care of the hen is necessary if an egg is to be kept any length of time. This is more particularly true of the large poultry farms, where so many hens are kept together. When there is a large run for a small flock each hen has more chance to get what she needs of proper food, drink and comfortable surroundings. During the hot months more attention should be paid to cleanliness than at any other time of the year. With the rapid incubation of insect pests the houses should be sprayed at least every week with some lice killer. Another thing, as the lice that are on the hens themselves can't be reached by spraying the roosts, and as it is vexatious to catch and treat every one, a good remedy is to take four parts gasoline and one part crude carbolic acid and, just before roosting time, take a whitewash brush and paint the roosts with this solution, carrying the fumes of the carbolic acid, gets up under the feathers and wings if the roosting birds and finishes up the job. I am somewhat of a "crank" on fighting the chicken vermin, but it is because I am convinced there is more loss caused by these pests than is usually dreamed of. The lice problem sometimes becomes so acute, in fact, that

the flock should be shut out from the roosts entirely and roosting places made out of doors. Speaking of egg quality, it is quite a common habit to leave eggs in the nests over night or even for a day or more. This is a very great mistake. The eggs should be gathered this hot weather as soon as possible after being laid and put in as cool a place as is available. All the eggs are not spoiled after reaching cold storage. Our pure food laws are becoming more and more stringent and the time is rapidly approaching when it will be impossible as testers will be used that will show up the bad ones almost as fast as they can be counted. While it is not always possible to tell an egg that is not wholly bad, it is just as easy to hunt the eggs every day as it is to leave them in the nests and develop a lot of extra broodiness among the layers, necessitating breaking them up and the consequent loss of eggs, for the early removal of the eggs from the hen's sight is the best preventive of broodiness.—Wm. J. Cooper.

RUE EDOUARD VII., PARIS. In a few weeks' time the last houses in the way will have been pulled down for the new Rue Edouard VII., which is to start from the Boulevard des Capucines, and, by making a bend at a right angle, to open into the Rue de Caumartin. The boulevard end of the new street has been cleared for some weeks past, and foundations are being laid. According to the promises of the architects, the Rue Edouard VII. is to be something new in Paris, and will become the centre of the Parisian West-End, which, as in the case of all European capitals, steadily moves more and more westward. The street, to begin with, will be entirely private property. The pavement of the footpaths is to be of marble, "as in Venice." At the end is to be a garden, and in the midst of it a statue of the King Edward. Who the sculptor of this monument will be is not stated. Glass roofs will jut over the pavement, shielding foot passengers from rain or sun, along the whole length of the street. The newest kind of international hotels, two or three in number, will be built, with doors on the Rue Edouard VII., and the shops will be the best in Paris. The ambition of the Edward VII. street of Paris evidently is to cut out the Rue de la Paix. It will be open to traffic in two years' time or less. Finally, the most remarkable feature of the Rue Edouard VII. will be that, being a private road, it will be "entirely and strictly" policed by private "policemen." These about twenty in number, will be it seems, all brought over from London. Presumably they will be retired constables, and will occupy about the same position here as stalwart and magnificent commissioners do in London. Twenty pleasant posts, with, it may be supposed, fine uniforms, will therefore soon be offered to London policemen who think they might like to settle on the boulevards. They must, however, be warned that they will be expected to "speak English, Italian and German perfectly"—rather a large order, perhaps, for a retired constable. They will also have to know "French enough to make themselves understood." Apparently no more French than is required now.

CALEDONIA CLUB GAMES YESTERDAY (Continued from page 1.) SACK RACE Wm. McLean, M. F. McKinnon, D. J. Mathieson. TWO MILE BICYCLE J. Blanchard, W. Mullins. HOP STEP AND JUMP N. Nicholson, W. J. Donovan, D. Martin. MILE RUN (AMATEUR HANDICAP) H. Harly, A. McGee. 120 YDS DASH W. J. Donovan, J. Duffy, W. Williams. BOYS RACE 150 YDS W. Williams, L. Worth, W. Nicholson. FIVE MILE BICYCLE N. Winchester, W. Mullins. The exhibition of dancing given by young Scotch lassies was of such exceptional merit as to call forth many commendations and hearty applause after each performance. Miss Lita Macdonald and Miss Marion Byrne danced the Ghiclic Callum and other Highland Fling and visitors expressed their surprise at the ease and gracefulness with which the young performers executed the many difficult movements. Of Miss Louisa McKay, daughter of A. N. McKay, City, Miss Gladys McCormack, daughter of Inspector McCormack, and Helen McMillan, daughter of L. B. McMillan, the same was true and the little ones are to be decidedly congratulated for their share in the day's program. The 4th Regiment Band and the 78th Highlanders Pipe Band enlivened the proceedings with national airs throughout the afternoon.
