Found New King Man of Opinion

LONDON, March 7-(C.P.)-Recalling King Edward's visit to South Africa as Prince of Wales, a writer in Overseas says: "In Rhodesia he was impressed by the beauty of the scenery and by the vast possibilities of agricultural and pastoral development, and filled with admiration for what a comparatively small population has already achieved." So he spoke at Salisbury and he added the hope that "all encouragement and assistance will be given to men and women from our overcrowded island to make their homes here in this young and healthy country with all its offers of wealth and happiness to those who are prepared to work."

Einstein Writes On Reality of Physics

(By Howard W. Blakeslee, Associated Press Science Editor) PHILADELPHIA, March 7-(A.P.)-Gravitation and electricity combine to form solid matter, Professor Albert Einstein declared tonight in an 11,000-word article designed to put "reality" into the great mysteries of the science of physics. "Free invention" of explanations of these mysteries, he held, is the only logical system to arrive at the long sought truths. His explanation of the origin of matter is a development of his theory of electrical bridges between shells of space announced about a year ago. Einstein traces man's attempts to solve the riddle of matter and gravitation since the Greeks.

As one expects, he sketches the troubles raised by quantum mechanics, the most brilliant of recent physical discoveries. Quantum mechanics show, and experiments have proven, that energy is not continuous, but somehow made of particles. But, Einstein says, no one has shown how energy is made of particles. For example when a hot iron cools, its heat is given off in particles, or steps, and no one knows what happens between these steps. He cites the Schrodinger mathematics as explaining that these steps do actually occur, by statistics which mean any idea of what the individual steps may be. "But now I ask," he writes, "is there really any physicist who believes that we shall never get any inside view of these important alterations in the single systems?"

"To believe this is logically possible without contradiction, but it is also very contrary to my scientific instinct that I cannot forego the search for a more complete conception. "There is no doubt that quantum mechanics has seized hold of a very beautiful element of truth- however I do not believe quantum mechanics will be the starting point in the search for this basic."

Einstein then proposes his explanation: He uses the relatively theory to account for the theory of corpuscles of matter, which he originally announced with Rosen of Princeton. The mathematical solutions, he says, show physical space as consisting of two identical shells connected by a bridge. This bridge is a corpuscle, a material particle, something made of electricity and gravitation. The mathematics he stated solves correctly for one "bridge" or single neutral particle, that is, with no electrical charge. But not yet for "several bridges," something necessary to account for the complexities of matter.

BROOKLYN SCHOOL Honor Roll for February: Grade X-1. Bessie Bears. Grade VIII - 1. Alexander Matheson; 2. William Matheson; 3. Arthur MacKinnon. Grade VII-1. Hartley MacKinnon; 2. Roy Bears; 3. Garth Bears. Grade V-1. Lloyd MacKinnon; 2. Basil MacKinnon; 3. Regina Bears. Grade IV-1. Sadie MacKinnon; 2. Shirley Bears. Grade III-1. Stanley MacKinnon; 2. Thelma Hume. Grade II-1. Reita Bears; 2. Jean Hume. Grade I-1. Walter Jardine. Perfect Attendance - William Matheson, Alexander Matheson, Hartley MacKinnon, Lloyd MacKinnon, Basil MacKinnon, Christopher Jardine, Regina, Bears, and Reita Bears.

Governor General, arrived here tonight to accompany Miss Diana Balfour of London, England, a friend of his family now staying at Government House here, to Ottawa.

Fertilizers

We are now in a position to make immediate delivery of SUPER - POTASH - AMMONIA - SODA and MIXED GOODS, also LIME, all of which we are selling at lowest prices. Why not haul your requirements now while there is good sleighing on the ice and roads. A. HORNE & CO. Charlottetown

Sport Fishing In Nat. Parks

OTTAWA, March 5-Excellent fishing is obtainable in the lakes and streams of most of Canada's National Parks, and the angler who casts his line in these waters will be amply rewarded with splendid specimens of a variety of game fish. Favourable fishing areas in the Parks are being extended through the efforts of the National Parks Service of the Department of the Interior in stocking lakes and streams with suitable varieties of game fish. The waters of Banff National Park provide some very fine fishing and many of the favoured spots are easily accessible by motor highway or trail. The principal species of sport fish are Great Lake (O. Nanyacush) trout, Dolly Varden trout, cutthroat trout, eastern brook trout, and Rocky Mountain whitefish. Great Lake trout, specimens of which run to fifty pounds, are found in this park only in Lake Minnewanka. Eastern brook trout have been planted in this lake. Upper Vermilion Lake, with four miles of the town of Banff, also provides excellent fishing. The upper reaches of the Pipestone River are noted for cutthroat and Dolly Varden trout, and a number of the small lakes and streams, along the Banff-Jasper highway, under construction, have been stocked with various species of game fish.

Many of the lakes and streams of Jasper National Park contain game fish among the indigenous species being rainbow trout, cutthroat trout, Dolly Varden trout, Great Lake trout, while Loch Leven, land-locked lake, has been in eastern brook trout. The best fishing waters are found in the town of Jasper are lakes Caledonia, Pyramid, Annette, and Edith. The larger lakes including Maligne, Medicine, and Amethyst also provide opportunities for good sport fishing. Speaking generally the best fishing season in the park below 4,000 feet elevation commences in normal years about the middle of June and extends to the latter part of September.

The species of sport fish found in the lakes and streams of Waterton Lakes National Park in southern Alberta are grayling, Great Lake trout, rainbow trout, Dolly Varden trout, cutthroat and pike. Considerable restocking of park waters has been carried on during the past few years and fair good catches made. In Cameron Lake, where trolling is a popular method of fishing for cutthroat trout, rainbow trout and eastern brook trout, some very good specimens were taken during the past season. This lake is generally considered the best of the fishery by fishing waters of the park boundary. The lake is only a short distance from the park townsite offers the angler first-class opportunities for good catches of steelhead and rainbow trout.

The waters of Prince Albert National Park in northern Saskatchewan are grayling, Great Lake trout, pike, pickerel and whitefish. Fishing for pike and pickerel is generally good during the entire season. The best time for good catches of Great Lake trout is usually between June 10 and the middle part of July. The most popular method of fishing in this park is from boats, very little angling being done from the banks or by wading.

Clear lake, situated near the southern boundary of Riding Mountain National Park in Manitoba, is spring-fed being about nine miles long and from one to two and a half miles in width. The lake contains several varieties of game fish, the most interesting species from the fisherman's viewpoint being northern pike. Whitefish and perch are also found in large numbers.

No licence is required for fishing in National Park waters, but application should be made to the Park Superintendent for copies of the regulations with respect to catches and seasons.

Seven Low Fare Cruises to B.W.I. During April & May

For those who have been unable to secure accommodation on "Lady" cruise liners of the Canadian National Steamships so far this year, sailing from Halifax via Boston to the various ports of the British West Indies, the company now announces that during the months of April and May special low steamship fares will be placed in effect for this spring period only, according to Victor E. Eke, Passenger Traffic Manager of the

INTERESTING VISITOR COMING-After the annual meeting of the League of Nations Union in London, who is touring Canada, sponsored by the Canadian League of Nations Society, will visit this city this week and will speak in St. Paul's Parish Hall, Wednesday evening. While here Miss Spaul will be the guest of Mrs. J. A. Matheson, regent of the I.O.D.E. in this city.

PRIVATE SANCTUARY AT SOUTHPORT VIOLATED-For the past two winters Earle G. Jenkins, Southport has been feeding black ducks on a small dam he built on a stream that rises near his buildings. This winter between 30 and 40 black ducks have been feeding regularly in the open water, and had become quite tame. Recently, however, he had become suspicious from the actions of the birds that something was amiss. Flocks would come in from Fullerton's Marsh and back in to the E. C. M. P. and when approaching the Sanctuary would become nervous and hurry away. Investigation disclosed a dead black duck in the dam. This bird was quite fat, and in splendid condition. Friday he brought the duck in to the E. C. M. P. and the Special Game Officer after a minute examination pronounced that the duck had died from gunshot wounds. Several no. 4 shot were extracted from the body. This bird had been shot in the near vicinity of the Sanctuary, if not on the Sanctuary itself, as the internal organs were full of blood and it must have died almost instantaneously. It took almost a week before the birds returned to normal. For the first few days they would alight on the water and then fly to the water in a very alert attitude. They were taking no chances. Mr. Jenkins has already fed a large amount of wheat and oats to these birds.

IN MEMORIAM

MR. JAS. A. MACDONALD It is with feelings of deep regret that we announce the death of Jas. A. MacDonald, which occurred at his home in Wessors Corner on Monday, Feb. 3, 1936. The deceased was a son of the late Mr. and Mrs. Jas. MacDonald, Webster's corner, and was born in 1861. Being possessed of a cheerful disposition, he made many friends, and he was always ready to assist a neighbour in time of sickness or need. The late Mr. MacDonald had enjoyed good health up to a few weeks previous to his death, but despite medical aid and kind and skilful nursing, he passed away on the above mentioned date. During his illness, he was frequently visited by his pastor, Rev. D. F. Croken, who administered the last rites of the Catholic Church.

There are left to mourn the loss of a kind and loving husband and father, his widow (formerly Emma Hughes), one son Aeneas at home, and three daughters, viz., Mrs. Mrs. John Martin, Lawrence, Mass.; Miss Minnie MacDonald, Brookline, Mass., to all of whom we extend sincere sympathy. The esteem in which the deceased was held was shown by the large number of people who attended his funeral on Wednesday morning, Feb. 5th to St. Patrick's Church, Fort Augustus, where a High Mass of Requiem was celebrated by the pastor, Rev. D. F. Croken, who also performed the services at the grave, and therein the mortal remains were laid to rest to await the resurrection. The pallbearers were Messrs. Joseph Beard, Alex. McEachern, Jas. Smith, Philip Smith, John Webster, Fred Curran, James Curran, and James Curran. Spiritual Bouquets and letters of sympathy give evidence of the high respect in which the deceased was held. May his soul rest in peace. (Patriot please copy)

Company. These reduced fares will apply in the service to Bermuda, the Leeward and Windward Islands, with the northbound trips terminating at Montreal. On this latter route, during the month of May, when sailings will be made via the 1,000-mile scenic St. Lawrence route, departures will take place from Montreal. The customary honeymoon concession of ten per cent off the steamship fare heretofore in effect during the spring, summer and fall months, will this season be limited to the months of April and May on the "Lady" liners of the company sailing from Halifax and Montreal via Boston.

"These sailings during April and May offer an opportunity for travel to those who have previously been unable to secure accommodation to the West Indies and provide the additional advantage of low fares which will be available during the balance of the year" says Mr. Eke. "In view of the comparatively even temperature of the West Indies throughout the year and the low fares during April and May, it is anticipated that these voyagers will attract a unusual number of passengers to the Caribbean colonies and mainland of South America, where the glories of nature and romantic life of the natives are always fascinating to the visitor."

DECEPTIVE What are those queer-looking statues over there? asked the visitor to the city. "Those aren't statues, said the Londoner. They are workmen busy on one of the new government jobs."

Labor Party And T.U.C. Oppose New Defence Program

(C. P. Cable) (By Guardian's Special Wire) LONDON, March 7-After long consultations the Labor party and the Trades Union Council today agreed to make a common fight against the new defence proposals of the government. In the House of Commons today Labor objected to the fact that Parliament and the country is apparently being asked to approve the sweeping measures without knowing the cost, but Prime Minister Baldwin promised to consider this matter.

Previously Chancellor of the Exchequer Neville Chamberlain had told interrogators it would be more appropriate to make a statement on the likely cost of the huge rearmament program when the budget is presented next month, adding it was impracticable to state even approximately at this time what the cost would be. Unofficial guesses range from \$1,500,000,000 to \$2,000,000,000, spread over a period of three years. Mr. Chamberlain did disclose that so far he has not decided how the money should be raised. Mr. Baldwin turned down a Labor suggestion that an Imperial Conference be called to study the program and especially the question of the "rearmament contributions" by the rest of the Empire to defence. He pointed out that full truth was maintained through the committee of Imperial defence.

Meanwhile the army estimates were produced, showing an increase of \$3,711,000 to a total of \$49,281,000. With the naval estimates yesterday the increase over last year is already \$15,611,000 and the Royal Air Force estimates, still to come, are likely to show even greater increases than the senior services.

When Parliament debates the rearmament plan next week Labor will present a motion of censure, calling for a policy of international understanding and general disarmament and economic cooperation. The motion condemns the policy which, it says, by intensifying the arms race "will inevitably lead to war," and it views with alarm proposals to reorganize industry on a war basis as creating a serious menace to organized labor and trade union standards. The government motion to be moved by Prime Minister Baldwin merely says, "The House approves the defence proposals of the government which are outlined in the white paper."

Like the naval estimates, today's increased army estimates do not include any provision for the increased defence promised in the white paper. The estimates generally were featured by the progress towards mechanization of forces and protection against attacks from the air. Infantry, cavalry, artillery, engineers and signals all are being kept up to date with developments abroad, and Alfred Duff Cooper, Minister for War, notes that the issue of new anti-tank guns and of a new light machine gun to replace the "obsolete" Lewis gun will begin this year. It is also remarked that recruiting is not satisfactory, although the type of men coming forward is improving, and the Minister says there is need of more than 36,000 recruits.

APPIN ROAD SCHOOL

Honor roll of Appin Road School for the month of February is as follows: Grade X (Sr.)-1, Annie Gordon. Grade X (Jr.)-1, Edna Farrar. Grade IX-1, Hazel Gillespie. Grade VII-1, Marion MacEachern; 2, Jeanette Gillespie. Grade VI (Sr.)-1, Mildred Cudmore. Grade VI (Jr.)-1, Morris Cudmore. Grade V-1, Florence Gordon; 2, Heath Gordon; 3, Willie Farrar. Grade IV (Sr.)-1, Louise Farrar. Grade IV (Jr.)-1, Bessie Gass; 2, Lillian Farrar; 3, Cecil Gass. Grade II (Sr.)-1, Malinda Gass; 2, Freeman Cudmore; 3, Sanford Gass. Grade II (Jr.)-1, Lloyd Farrar; 2, Orvin Carney; 3, Leon Corney. Grade I (Sr.)-1, Joyce Gass. Grade I (Jr.)-Absent. Most stars for Spelling in Grade II, Orvin Corney.

Most stars for Tables in Grade II, Malinda Gass. Monthly average, 90% or over, Malinda and Joyce Gass. Perfect attendance - Annie Gordon, Edna, Louise, and Lillian Farrar, Marion MacEachern, Jeanette Gillespie, Mildred and Freeman Cudmore, Bessie and Malinda Gass, Leon and Orvin Corney, Violet Gillespie-Teacher.

CAPTAIN DEWIS SPICER PASSES

(C. P. By Guardian's Special Wire) SPENCER'S ISLAND, N. S., March 6-One of the last of Nova Scotia's disappearing line of sailing skippers, Captain Dewis Spicer died at his home today, aged 80 years. He was one of a family of four who were all captains. Surviving him are his wife, a brother, Captain G. D. Spicer of Spencer's Island, two sons, Colonel Carl Spicer living here, and Philip Spicer of Vancouver, and three daughters, Mrs. George Gamblin and Miss Gertrude Spicer of Saint John and Mrs. McLellan of Spencer's Island.
