AUTO BE, OR NOT TO BE

The controversy over the Automobile Amendment Act wages merrily on, as our correspondence columns abundantly show.

It is pleasing to find public opinion thus so strongly agitated, for it is only in this way a sound verdict will be obtained, acceptable as decisive by the pros and cons alike.

From most of the resolutions sent us for publication, it is evident a good deal of misunderstanding still prevails with regard to the nature of the measure recently receiving the assent of His Honor the Lieutenant Governor.

It will thus be obvious those members of the Legislature who voted for the measure did nothing more than give the people an opportunity to declare their opinions.

The Government has an open mind on the subject, and will bow to the decision of the majority as declared at the school meetings.

Under these circumstances it is hardly fair on the part of some of the organizers of protest meetings to condemn those who have put it within the power of the people to decide the matter for themselves.

ity and nothing more. Instead of condemning those who thus trust the people, the protestors should pass votes of confidence in them, for they will assuredly find that it is those who thus trust the people to decide for themselves who have the best interests of the Island at heart.

We have been pleased to place our columns at the disposal of the controversialists, and to find they have been so fully taken advantage of. Our columns are still open for the discussion, and will continue to be so till the school meetings are held.

NOTES

By the contract entered into between the Dominion Government and the Universal Radio Syndicate, controlling the Poulsen system of wireless telegraphy, an era of cheap ocean messages commences.

Dr. Von Gans, a German financier is organizing an undertaking to construct a dirigible to cross from Europe to America. The airship is already under construction and will be ready in the middle of August.

With reference to our remarks about the causes leading to the differentiation between Eastern and Western Canada, and the part the C. P. R. has played in the matter, Mr. E. Garth White, who has charge of the Natural Resources Department of the C. P. R., has given out the following:

One of the most generous as well as classy vaudeville programs ever offered in this city will be the B. F. Keith's Union Square Theatre, New York, attraction for the week of May 12th.

SONS OF TEMPERANCE

Sir,—I read an article in The Guardian of the 6th inst., signed, "Son of Temperance," complaining about the vote taken at the last meeting of the Grand Division against the running of autos on the Island.

Division, and the Government would have been thanked for them. I am, sir, etc., A MEMBER OF THE G. D.

INTERVIEW WITH LONDON VISITOR

(Continued from page nine) about Canada to many millions of English-speaking people in all parts of the world.

"I am delighted with everything I have seen and heard about the Island, and especially about your wonderful Fox Industry. People when they read what I will write on the subject will be sure to be a little incredulous about it, for I myself would not have believed the wonderful tales unless I had come here and verified them for myself.

"I have been agreeably surprised at the hardworking, law-abiding community you have here, and have made special note of the fact that you have lately need for even half a dozen policemen in the whole Island.

"Oh, yes, I am personally acquainted with Mr. Malcolm Bulloch, the editor of The Graphic, and shall be delighted to convey your compliments to him. He will be pleased to know I have met you I am sure, and to recall old days when you were on the press in Aberdeen together.

"In bidding farewell, Mr. Scheff expressed his very great gratitude to Mr. McCready, who had been of such assistance to him in his search after facts.
