See how he procures money to purchase a news stand. At last the mother's innocence is proven and there is a happy re-union. O. L. Rose Valley. Human sympathy fails to give comfort in such a bereavement, but we know that your life's companion has gone to that promised land where he is free from all pain and trials of this world. The cause of numerous diseases, and disagreeable habits, heretofore ascribed as constitutional, have been traced directly to the teeth Blindness, drolling, frothing, loss of flesh, weak eyes, driving on one rein and pulling are very often due to diseased and irregular teeth. Rough edges and sharp corners of the teeth lacerate the mouth, and produce nervousness and irritability; uneven and elongated molars and incisors prevent the proper mastication of the food producing indigestion and general debility. Decayed molars cause necrosis of the bone abscesses nasal gleet, etc. These causes should be removed. Decayed teeth should be removed by extracting or trephaning, sharp corners and edges should be smoothed down, and elongated and uneven molars and incisors cut of. The common float, or file heretofore deemed sufficient to accomplish this, will not suffice but special instruments devised for the purchase are necessary.
