GOOD EXHIBITION WEATHER CONTINUES

Programs Going On Without A Hitch. Grandstands And Exhibition Building Thronged With Interested Spectators Yesterday.

Yesterday large crowds attended the Exhibition. The automobile parking space was well filled with cars from near and far carrying with them farmers, racing fans, owners of competing horses, owners of livestock and all other classes of visitors.

The day's program was full of interest to both young and old. The midway with its booths, merry-go-round, and side shows was the centre of a large crowd of pleasure seekers. In the Exhibition Building, the Ladies are busy upstairs catering to the hungry visitors. Near at hand are to be seen the painting and drawing exhibits. These are of a high class. Over in one corner is to be seen a display of hand moulding. These pieces are the work of Mrs. McCoubrey of Summerside, and are made from a combination of different clays found on P. E. I. They are certainly beautiful and a credit to the artist who made them. The Ladies' Handiwork Exhibits are also to be seen upstairs and do much to make the gallery more beautiful. The Boy Scouts have a rest booth in the building and also an information bureau situated in a tent below the grandstands. Mr. Menton Whitlock has a splendid display of art pictures in the upper part of the building.

Sheep

Among the principal exhibitors in sheep were the following, of Leicestrs: S. S. Stewart & Son, Dunstaffnage, Mt. Mellick Farm, Pownal; of Shropshires—Geo. M. Boswell and Mrs. Boswell, Frenchfort; in Oxford Downs—A. H. Boswell & Son, Marshfield, Attigon Sellar, Winsloe, Mrs. G. M. Boswell, George L. Boswell, Frenchfort; of Southdowns—Oliver Saunders, Winsloe Road; of Long Wool Grades—S. Stewart & Sons, Mt. Mellick Farm, E. Boswell, Marshfield; of Short Wool Grades—A. H. Boswell & Son, E. Boswell, G. L. Boswell, Oliver Saunders, and Mrs. G. M. Boswell.

Beef Cattle

Judging of beef cattle was concluded Wednesday by Mr. J. M. Gardhouse. J. C. Irving of Vernon in Shorthorns, won first for three year old bull, and upwards; second for dual purpose bull, any age; first for bull, senior calf; first, second, and third for aged cow in milk or calf; first for three year old cow; first, second and third for female, dual purpose, any age; second for two year old heifer; first for yearling heifer; first for heifer, senior calf; first and second for heifer, junior calf; first for champion bull; first for herd, consisting of 1 bull and 4 females, 2 years old and upwards; first for dual purpose herd, and first for breeders' young herd; and the following prizes awarded by the Dominion Shorthorn Association: First for three calves bred by exhibitor; first and second for animals, any age, progeny of one cow; first for animals of either sex, get of one sire.

Mt. Mellick Farm won first for bull, dual purpose, any age.

H. Tweedy, Earnscliffe won first for two year old and one year old bulls, second and third for yearling heifer; second for senior heifer calf; second for breeders' young herd; and the following prizes awarded by the Shorthorn Association: Animals, any age, either sex, progeny of one cow; animals either sex, get of one sire.

A. H. Boswell and Son's won first for two year old heifer, and first for Champion female.

In Herefords, Saunders and Saunderson won fifteen first prizes, six seconds and five thirds.

Frank Tremere of Hampshire won two seconds.

PARIS GIVES NO HINT AS TO STAND

Reciprocity Tariff Scheme Proposed; Countered by American Plan — Both Sides Claim Unfair Treatment.

WASHINGTON, Sept. 29. —Delay until next week at the request of the French government of publication of the Franco-American tariff correspondence announced today at State Department, created an impression in Washington that a definite decision by the Paris government was to be expected probably by Saturday on its policy as to commercial duty negotiations with the United States.

There was no advance intimation as to what reply is to be expected on the reiterated United States proposal for a treaty based on the most-favored-nation treatment with the French suggestion for a reciprocity tariff agreement was countered.

Presumably the French request for delay in publication was made to permit the Paris cabinet to consider the question. In that connection the Paris government is known to have called for information from its representatives as to instances of United States tariff discriminations, particularly as to the special treatment accorded by the United States to Cuban goods. The American tariff commission has submitted a preliminary report to the president dealing with French discriminations against United States goods for a long period of years.

TEEMING MARKETS OF ORIENT BECKON TO CANADIAN TRADE

Justice MacDonald Of B. C. Supreme Court Prophecies Six H undred Million People In Orient A Hun dred Years Hence.

VICTORIA, B. C., Sept. 29. —The future of the coast ports lies in the teeming markets of the Orient, according to Justice M. A. Macdonald, of the British Columbia Court of Appeal, in an address before the Foreign Trade Council here recently. He said:

"Today attention is directed to the Pacific Ocean, not only as a great highway of commerce, but also as the centre of diplomatic problems which business men and traders can not ignore, inherent in its strategic position as the gateway to the Orient," he said.

Visualizing the Orient a hundred years hence, Justice MacDonald foresaw a vast nation of diversified wealth and of abounding modernized activities, a nation probably 600,000,000 people, using motor trucks and western means of transportation, mining the great coal areas and with the development of iron, and tin resources forming the tries. "Does that suggest trade smokestacks for many varied indus-possibilities to you?" he asked. "There are many signs of an awakening in China," he pointed out. "Already there are quite a number of modern cities and towns lighted by electricity, using the telephone and policed by a well-trained constabulary."

Justice Macdonald referred to Japan as the Great Britain of the East, and said: "We have much to gain in the way of profitable intercourse with Japan that we should entertain no misconceptions about the characteristics of our Japanese neighbors." He admitted that there was a difficult question on the horizon, the question of immigration, and he admitted further that there was an economic prejudice on the Pacific Coast against the Oriental, but he hoped that any racial prejudices that might exist might soon pass away.

Committee Members Leaving For 'peg October 4th

(Special to the Guardian)

TORONTO, Ont., Sept. 29. —Toronto and Western Ontario members of the National Conservative Convention Committee are leaving the city for Winnipeg October 4th, instead of 5th, as originally planned. The full committee under the chairmanship of Hon. Hugh Guthrie meets in Winnipeg on the morning of October 7th to consider a number of matters preparatory to the opening of the convention proper. At the latter Mr. Guthrie is expected to act as temporary chairman. He will forego that honor when the delegates at large elect the permanent English and French speaking chairman.

As a consequence of this change in the departure day, an important meeting at Conservative headquarters here, and which was called for Tuesday next, has been advanced to Monday afternoon. The main topic for discussion will be the Ontario delegation's participation on the various committees of the convention. While this, of course, will be subject to ratification by the delegates as a whole, it is felt that there should be some knowledge as to the matters likely to be dealt with by the committees so that names of people known to be familiar with them may be considered. The meeting will include members of the Ontario association executive, executives of the eight districts of the province, executives of the Conservative Association in the principal cities, and the Ontario members of the convention committee.

At provincial headquarters the latest estimate of Ontario's attendance at the convention is 888, consisting of 500 riding delagates and alternates, 82 delegates at large, 30 members of parliament and defeated federal candidates, 18 members of the convention committee and ex-officio journalist delegates, 13 senators, 15 privy councillors, 200 people going on special invitations including a number of the wives of delegates and alternates.

DREDGE LOST ON WAY TO HUDSON BAY

(Canadian Press)

OTTAWA, Sept. 29. —Word has been received at the Department of Railways and Canals of the loss of the dipper dredge Kennequahair which was proceeding to Fort Churchill, the terminus on Hudson Bay of the Hudson Bay railway. The dredge ran into a northwest gale on the Atlantic off the Labrador coast at a point about 280 miles south of Hudson Straits. Owing to the pounding which it was subjected to the Kennequahair sprang a leak and foundered on the morning of September 27th. The attending crew was taken off safely and there was no loss of life.

OTTAWA, Ont., Sept. 29. —The dredge towed by the seagoing tug Ocean Eagle, left Sydney, N. S., on the 19th of this month to proceed to Fort Churchill for work in the harbor. With her was a dump scow towed by the tug Stanno and a hopper barge propeller under its own steam. The department was in touch with the party every day by wireless, and everything went well until the 26th when the storm was encountered. All the other vessels are safe and they are proceeding to Port Burwell at the eastern end of Hudson Straits which they will probably reach tomorrow.

St. Louis Swept By Tornado; 28 Killed

(Canadian Press)

ST. LOUIS, Mo., Sept. 29.—At least 28 persons were killed and several hundred were injured when a tornado swept through portions of St. Louis and its Illinois and Missouri suburbs this afternoon. The property damage was huge.

Million Houses Have Been Erected In England

LONDON, Sept. 29. —"More and more Great Britain is becoming a nation of house owners," declared Sir Howard Kingsley Wood, Parliamentary Secretary to the Ministry of Health, in opening the thousandth house in Bilston, Staffordshire, recently erected in connection with the government's financial encouragement of house building by the granting of subsidies. He said it was not an extravagant statement to say that 1,000,000 houses had been erected in England and Wales since the armistice. He claimed that this was a world record and that it was the greatest social contribution made by this country since the war.

Raw Fur Industry Worth Fifteen Millions

(Special to the Guardian)

TORONTO, Sept. 29.— Canada has 2,268 fur farms, with a value of $13,000,000 in animals, lands and buildings. The raw fur industry is worth $15,000,000.

Queen Has Set A Dance Record

(Special to the Guardian)

BALMORAL CASTLE, Scotland. Sept. 29. —Queen Mary has set a dance record for queens. At the Gillies ball given here last night by the King and Queen to three hundred tenants, employes of the royal estates in Scotland, the Queen danced twelve of the fourteen reels, polkas and circassian circles. She danced with gardeners, footmen chefs, and guests. Those present included the Prince of Wales, the Duke and Duchess of York, Prince Arthur of Connaught and the Princesses of Connaught.

Biggest Footed Man

(By British United Press)

LONDON, Sept. 29.—The man with the largest feet in Great Britain has been discovered.

During Carnival week in Spennymoor, (Yorkshire), a boot firm exhibited in their windows a pair of boots, size 18, weighing 7 lbs. 6 oz., and stated that they would be presented to anyone whom they would fit.

These boots have been exhibited up and down the country for 16 years without finding a claimant, but at Spennymoor a claimant was forthcoming in Thomas Roper, a bricklayer, aged 35.

Roper, whose height is 6 ft. 9 ins. on trying on the boots, declared they were a bit tight for him.

Mussolini's Baby Becomes Fascist

ROME, Sept. 29. — Mussolini's two-day-old son already has joined the ranks of his father's fascisti. A membership card in "billila," the organization of the Fascist children was forwarded to the infant today.

Ruth Equals 1921 Record

(Canadian Press)

NEW YORK, Sept. 29.—Babe Ruth equalled his 1921 record of 59 home runs in a season by hitting his second circuit drive of the day in the fifth inning of the Yankee game with the Senators. He hit homer number 58 in the first inning Ruth's mighty wallop, which tied his former standard came with the bases loaded off Hopkins. The crowd staged a great demonstration as Ruth trotted around the bases and he was visibly elated. The ball soared half way up in the right field bleachers.

Successful Air Mail Voyage

(Special to the Guardian)

QUEBEC, Sept. 29. — The Canadian airways machine operated by Captain Mulcahy made another successful air mail voyage from Montreal to Rimouski this afternoon. The hydroplane left the metropolis with western mails at one o'clock and this evening the mail bags were boarded on board the Empress of Scotland at Father Point.

The same hydroplane will return on Sunday with mail taken from a Canadian Pacific steamship liner at Rimouski to make connections in Montreal with western trains. The experiments made this fall under the direction of Captain Harry Quigley and the direct supervision of Tanner Green, superintendent of the Quebec division, have proved so advantageous that it is expected that the service will be operated during the remainder of the season and resumed next spring.

Canada's Oldest Parliamentarian

(Special to the Guardian)

ST. HYACHINTHE, Que., Sept. 29. —Today the Honorable George Casimir Dessaulles, the oldest parliamentarian in Canada, and no doubt in the whole world, celebrates his hundredth birthday. His native town, as is very fitting and proper, is enfete for this unique occasion. There have been Canadian senators far younger than Senator Dessaulles, but who, decrepit with age, performed their important, if not arduous sensational duties mostly in absentia. But this vigorous and vivacious centenarian is in full possession of all his faculties and well deserved his sensational stipend. He occupied his seat in the red chamber last session during all the rigors of winter and will do so the coming season unless his health, which has never failed him for 100 years, goes back on him now

Williams And Wilson Having Battle For Runs

NEW YORK, Sept. 29.—While the sensational home run streak of Ruth and Gehrig in the American League has been holding the main spotlight in the majors, the dash in the National between Cy Williams of the Phillies, and Hack Wilson, of the Cubs, has developed into a closer sprint. Williams turned out his 30th at Philadelphia today against the Giants, to become one up on Wilson.

The Ruth-Gehrig issue was lulled by an open date for the Yanks today.

"Tiger" Celebrated 86th Birthday

PARIS, Sept. 29.—Cold ham and pickles were the gastronomic feat of George Clemenceau in celebration of his 86th birthday yesterday. Going to bed at 9 p. m. instead of his usual time of 8 p. m. proved the extent of his carousing.

"I feel as young as I ever did," the war Premier told the correspondents, then good naturedly assuming the snarling attitude which gained for him the title "The Tiger" he continued. "you Americans had me dying and dead last July and August." He extended both legs under the horseshoe shaped desk at which he was sitting and then snapped them together, asking, "Do I look as if I had one foot in the grave.

"The room was filled with flowers sent by numerous friends of "The Tiger." There he dined in company with his brother, Albert and an intimate friend, Ernest Pistrio, of Corsica.

Clemenceau was born in Vender on the night of September 28-29, 1841.

28 Americans Are Under Arrest

CONSTANTINOPLE, Sept. 29. — Twenty-eight employees of the American Near East Relief in Russian Armenia have been arrested by the Soviet authorities, say advices received at the offices of the organization here today.

A majority of those imprisoned were teachers in American orphanages and schools, the advices said.

No reason for the arrests was given by the Soviet authorities except that they were acting under orders from Moscow.

The Soviet action was declared in American circles to be a flagrant violation of the provisions of the mandate under which the Near East Relief is working in Soviet Russia and the officers of the Relief are preparing a protest in order to obtain the release of their personnel.

Broadcasting Of Prize Fights

NEW YORK, Sept. 29.—Although he thinks radio broadcasting of Dempsey-Tunney fight at Chicago reduced the receipts, Tex Rickard said today that broadcasting of big fights ought to continue to satisfy a demand of millions of fans.

"I want to give fights to the people over the air," Rickard said, "but it will be necessary to evolve a workable scheme so that all the fans will NOT stay at home and listen in, especially if radio television is introduced on a wholesale basis."

The promoter said broadcasting authorities estimated one hundred million persons throughout the world attended the fight "by air."

LOBSTER CATCH FAIR TO GOOD THIS WEEK

SHEDIAC, Sept. 29.—The lobster catch along the Northumberland Strait shore in the vicinity of Cape Bauld and Little Cape is reported this week as fair to good, and fair between Shediac and Cape Bauld. Leger Brothers, of Little Cape, recently caught $1,325 worth of lobsters in one week.

Shipments of live lobsters are being made daily from Point du Chene by the Paturel Fisheries and United States buyers, most of the live fish going by express to the Boston market.

Rolliciking Comedy Delights Large Audience

"THE COME BACK" PROVES A SPLENDID SUCCESS AS PRESENTED BY MAE EDWARDS COMPANY LAST NIGHT.

Charlottetown audiences were last night treated to the fourth of the Mae Edwards Co's presentations "The Come Back". As a comedy this play was a masterpiece and the large crowd was kept on the verge of laughter throughout the entire play. The characters in the show took their parts as only well trained, experienced and talented players can. The story concerns a hotel at which the guests are all supposed to be fairly wealthy, but most of whom are crooks trying to see what they can make while pretending to be wealthy and mingling with wealthy people. In this particular case the majority were crooks and the pickings consequently very poor. The climax is reached when the really bad "crook" of the bunch is checkmated by the others and has to "beat it." Dame Fortune smiles upon the rest and they come to realize that the "straight and narrow" may be the best path after all.

The vaudeville and Novelty Orchestra selections were of the usual high order and came in for a large share in the applause.

This same performance will be repeated as a matinee this afternoon and in the evening at 8.30 o'clock the feature attraction "Play Things" will be presented.

Canadians Were Admitted To Membership

(Special to the Guardian)

BUFFALO, N. Y., Sept. 29. —Canadian restaurant operators were admitted to membership in the National Restaurant Association by vote of members in convention here yesterday. It was also voted to move the national headquarters from Kansas City, where it has been nine years, to Chicago.

Sir George Foster Recalls His Early Days On Farm

EDMONTON, Sept. 29.—"When Sir George Foster was in Lethbridge the other day he was taken out to see a reaper-thresher at work," says the Edmonton Journal. "It recalled to him what immense changes had occurred during his life in farming facilities. 60 years ago he had sown oats by hand on his father's farm in New Brunswick betwen the stumps and had cut them with a sickle and threshed them with a flail. It is a far cry from those days. We are apt to forget how comparativly recent have been the developments that have made possible such a grain production as we now obtain in Canada year after year. Sir George's reminiscence of his youth serves as a reminder of how very different life is in Canada nowadays from what it was when the dominion came into existence."

First Of New Fleet Launched

(Special to the Guardian)

TORONTO, Ont., Sept. 29. —The first of the new fleet of cargo steamers, five in number, that are being built for the Canadian Pacific Steamships Limited, was launched yesterday from the yards of Danny Bros, of Dunbarton, Scotland. She is the S. S. Beaverton of 12,500 dreadnaught tonnage, and will travel from Montreal in summer and St. John, N. B., in the winter to London and Antwerp. The boat was christened by Mrs. E. Peacock.

P. O. Is Blamed

(Special to the Guardian)

LONDON, Sept. 29. — The post office is believed to have made a bad policy move in refusing the Western Union permission to extend its Atlantic cables from England to France except on prohibitive financial terms. Sir Robert Donald says British policy has hitherto been to provide the fullest facilities for cables, and this policy should not have been changed without reference to the Imperial communication committee, because it takes away some of the importance of England as the chief world centre for cable communication.

Canada is interested in the question because anything which facilities Atlantic cable communication with France is of benefit to Canada.

Prospects Bright

NEW YORK, Sept. 29.—The prospect of a meeting between the two champions of British Golf, Mlle. Simone Thion De La Chaume and Miss Joyce Wethered, was on the rise today as the 18 year old French girl prepared to sail for England to defend the title she holds jointly with Roger Wethered as mixed foursome champion. Miss Wethered will pair with Cyril Tolley in the championship.

Mlle. Chaume has foregone a chance to compete in the Canadian women's championship by her decision to return to England Saturday.

Chain Of Steel Masts

(By British United Press)

LONDON, Sept. 29.—Great Britain is about to see a beginning made with the construction of the greatest public utility service which has been conceived so far in the present century—the standardization, interconnection, and development of the electricity supply of the country.

It is nearly eight months since parliamentary authority was given for the vast undertaking, but already schemes for the provision of a cheap and abundant supply of electricity have been evolved.

At present London is served from 70 power stations, but 40 of these will be dispensed with. Later the number will be reduced to 10, which, it is understood, will supply not only London but the whole area between Peterborough and Southampton.

London will have underground mains, but it will be surrounded by a ring of towers, carrying off current at 132,000 volts, compared with the present maximum of 66,000 volts. The expenditure on masts, lines and transformers will be fully $35,000,000.

The station at Chiswick will be the best kind ever built. The site selected is Duke's Meadows, and the 45 acres available will be large enough for a station of at least 325,000 kilowatts installed capacity and will provide space for the storage of about 130,000 tons of coal, or more than two months' supply under full-load working conditions.

When the great projects in hand are carried out the countryside will be linked up by a chain of latticed steel tower masts, 16 ft. square at the base and about 80 feet high, carrying the main high-tension lines from selected capital power stations.

TRACED OIL ON SURFACE OF SEA.

ST. JOHN'S Nfld., Sept. 29. — Traces of oil on the surface of the ocean were the signs that led Captain Ben Tavenor of the steamer Kyle, to discover and salvage the remnants of the ill-fated monoplane Old Glory which he landed here today. Setting out on his search when the Kyle was commissioned by the agents of William Randolph Hearst, to search for the Old Glory and her occupants, Bertaud, Hill and Payne, Captain Tavenor decided that his first objective would be the spot where the distress calls were broadcast, believing that if the plane crashed or made a forced landing on the water the gasoline and oil would remain for many days to mark the approximate spot.

He soon found the trail of oil and gasoline that showed the drift of the wreckage and following this direction he came upon the wing and part of the landing gear on September 12th, three days after starting out on the search.

The wreckage consists of 34 feet of battered wing containing three gas tanks, all of which contained gas when picked up fuel gauges, feed pipes and speaking tubes, also one wheel and part of the landing gear.

TORONTO, Sept. 30. —Maritime, fresh southwesterly winds, mostly fair and warm.

Maximum and minimum temperatures:

Toronto, clear	70—54
