

Typist's Remarkable Reformation

MARRIAGE AS SEQUEL

"If I did not know from first-hand experience the wonderful effects of Kruschen Salts, I would not believe you to be the same young woman that stood before me in the dock three months ago accused of headaches."

"I am not, my lord. I have changed my name." (She smilingly shows her wedding ring).

"I congratulate you heartily."

"Thank you, my lord. And may I thank you, too, for that timely advice which I look back upon as the cause of all the happiness which has come to me lately. The little daily dose—it has worked wonders. I have forgotten what a headache feels like."

"And never again shall you remember. You have found good health for less than 1c a day. Stick to it!"

KRUSCHEN SALTS

relieve constipation and rheumatism

Kruschen is a combination of several mineral salts which your body must get in some way, to keep the blood pure, the inside clean, and the system generally toned up, but which you can get in Nature's own way without abundant exercise and fresh air. You should have these salts every day; hence the importance of the "little daily dose". Every drug counter sells them generally in 25c, 45c and 75c bottles. It's the little daily dose that does it.

Mother's Favorite For Coughs And Colds

It is hard to keep the children from taking cold. They get overheated, get their feet wet, and a dozen things the mother cannot prevent.

Mothers should never neglect the children's coughs and colds, but on the first sign get a remedy that will give relief, and for this purpose we would highly recommend Dr. Wood's Norway Pine Syrup.

It is so pleasant to the taste the youngsters take it without any fuss, and its promptness and effectiveness in loosening the phlegm and healing the bronchial tubes is such that the trouble is checked before anything serious may develop.

Mrs. J. STRALE, Solvay, B.C., writes: "For some years I have been using Dr. Wood's Norway Pine Syrup for myself and family of four children. I have used lots of other kinds of cough medicine, but I like Dr. Wood's best, as it acts much more quickly than any of the others."

VITILIGO—SCLERODERMIA—SMOOTH WHITE PATCHES OF SKIN

From time to time physicians came across cases of leucoderma (leuco—white and derma—the skin) in which white smooth patches of the natural skin color, in those who are fair this is not so serious but in those with a dark skin and in some people, the white skin stands out in a manner most embarrassing to the patient. The distinguishing symptom of scleroderma or vitiligo as it is frequently called is that the pigment or natural coloring of the skin looks as if it has been drawn away from the white spot and had heaped itself in the edges. The white spot is very smooth to the touch.

The cause of vitiligo is unknown; that it may be due to some children's infectious ailment such as scarlet fever or measles is sometimes suggested as it never appears before the age of ten. The spots are usually circular or oval, but may be irregular in shape and may appear anywhere on the skin except the palms of the hands and the soles of the feet.

I have never written about vitiligo before because skin specialists, not knowing the cause, have been unable to obtain results from treatment. Sir Malcolm Morris, the British skin authority, in his text-book states that leucoderma is likely due to some nervous disturbance as changes have been found in the nerves supplying the whitened patches of skin. However what may mean a cure for this unusual skin ailment is suggested by Dr. Nosh E. Aronstam, Detroit, in Medical World. Dr. Aronstam suggests that adrenal glands situated one above each kidney may be at fault and that just as extracts of the thyroid, the pancreas, the pituitary and other

glands are used to supply these juices in the body when needed, so in cases of vitiligo should extract of the adrenal gland be injected into the muscles—one injection daily for 10 days of an extract equal to 5 grammes of the adrenal cortex. The blood pressure should be watched as extract of the adrenal gland—adrenal in or epinephrine—helps maintain or increase blood pressure. The injections must be reduced to three a week if the blood pressure is greatly increased. Dr. Aronstam says that in his hands this method has helped a number of cases. I therefore pass the information to these patients who should consult their physicians about this hitherto incurable ailment.
