

of the completion of the national monument on Catton hill at Edinburg, irreverently called and pointed out to the tourist as Auld Reekie's Folly." This notion of national monument to commemorate the slain at Waterloo on the model of the Parthenon at Athens, was first spoken of at a meeting of the Highland Society in 1810. It was estimated to cost \$20,000 but the total sum raised was \$70,000.

Two Extreme Cases of Itching Piles

That Were Positively and Thoroughly Cured by Dr. Chase's Ointment—The Only Actual Cure For Every Form of Piles.

Mr. F. Stokes, 116 Dunlop street, Barrie, Ont., writes:—"I was troubled with blind, itching piles for years, and could get nothing to stop the constant itching. I was always in pain until a friend of mine told me of the wonderful cures Dr. Chase's Ointment had made among his acquaintances. I only used one box, and am entirely cured. In gratitude for this marvellous cure, and for the benefit of others suffering as I did, I send you this record of my case." Mr. Amos P. Fisher of Somerset King's Co., N.S., a commercial traveller, well-known throughout the Province, writes:—"It is great pleasure to inform you that I have been cured of itching piles by using Dr. Chase's Ointment. I was bothered with the above malady for twelve years, and suffered extreme agony at times. Thanks to Dr. Chase's Ointment, I am completely cured, and would recommend it with fullest confidence to all suffering the torture of this terrible disease." Agents wanted for Dr. Chase's last and complete Receipt Book.

THE MORNING GUARDIAN,

FRIDAY, JUNE 21, 1901.

THE CITY LIGHTING.

The action of the City Council in calling for tenders for the City lighting and then refusing to accept the Full Company's tender affords sufficient evidence of their determination that the Royal Electric Company shall have the contract, or be in another way the beneficiaries of a deal. The difference between the two tenders, one at \$95 per lamp and the other at \$89.50 per lamp is \$25.50 per lamp. For the 80 lamps required the difference would be \$2,040 a year. This sum the majority of the Council would if they dared, we presume, take out of the City treasury and transfer to the coffers of their favorite Company.

Be it observed that there is and can be no honest or justifiable pretext for this preference for the Royal Company. The street lights furnished by the Royal for years past have not been good; they have not been passable, even. Much of the night time large sections of the City have been left without light, and at all times those who are abroad in the streets have become accustomed to expect the lights which were burning to disappear before one could walk the space of a block. The system has been absolutely the worst of which we have any knowledge. These conditions compel us to believe that the motive which would take thousands of dollars out of the City treasury to hand over to the Royal Company is a dishonest motive.

Rather than do an honest and straightforward act by accepting the lower tender, the majority of the Council choose to entertain a proposal, not invited, and which had no right at all to be considered in deciding between the tenders—a proposition to lease the Royal Company's plant for a term of five or ten years, for the sum of \$2,500 a year. The City would have also to operate the plant and keep it in repair. Capitalised at four per cent. the rental would be equivalent to a purchase at \$62,500. And yet if the City owned the plant in question and were to seek to dispose of it who is there that believes it would realise one third of that sum? The question of depreciation need not be here considered, for the cost of repairs and necessary renewals in an old and practically worn-out plant would be more than the depreciation of a new plant.

This alternate proposition of leasing the Royal plant at the rental named is one that cannot for a moment be entertained on honest business principles at the present juncture. We confess to astonishment that any Councillor with a clean reputation should for a moment entertain it. Moreover the fact of the proposition being submitted to the Council gives rise at once to a suspicion of collusion between the agent of the Royal and his co-workers at the Council Board. It looks like a provision made in advance to defeat the lower tender expected to be put in by the Full Company. We may expect the agent of a company to make the best terms he can, and if only fair means are used no

Lumbago

is Rheumatism of the back. The cause is Uric Acid in the blood. If the kidneys did their work there would be no Uric Acid and no Lumbago. Make the kidneys do their work. The sure, positive and only cure for Lumbago is

Dodd's Kidney Pills

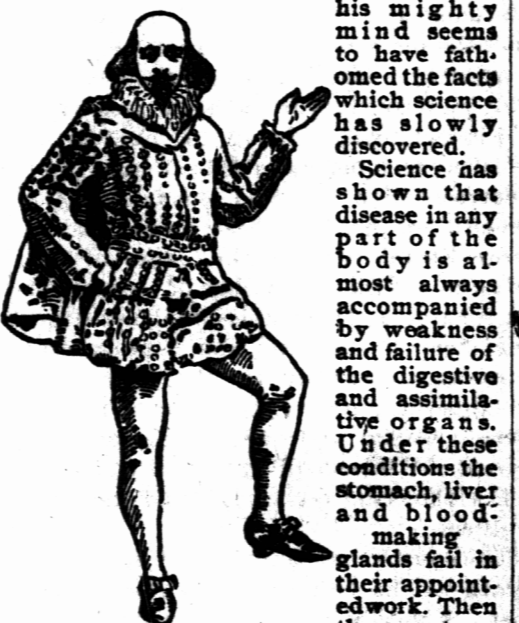

between the Royal and Councillors a conspiracy against the civic treasury in the mutual interest of the conspirators.

At present we have an expert for Halifax in our midst making an inspection of the plant which it is proposed to lease. The expert is brought hither by the action of the Council, no doubt in furtherance of the determination to get a pretext for rejecting the lower tender. We know nothing of the character or ability of the expert who has been imported for the occasion, but we are informed that some time ago Mr. Waddell and a City Councillor well-known as a promoter of the Royal interest in the Council had a meeting with the "expert" in question in Halifax, and talked over electric light matters. We do know that there is absolutely no justification for bringing him here. In these days there are experts and experts, from some of whom at least precisely the opinions and testimony that are wanted can be had. And we know in this instance just what opinions and testimony are wanted by those who have sent for the expert!

The expert has received written instructions, we are told, from a Councillor who has hitherto shown great zeal in behalf of the Royal Electric Company. Bye and bye we shall have his report, and in due course another resolution will be submitted to the Council, perhaps prefaced by the usual number of "whereases," the real object of which will be to cover up the transfer of some thousands of the taxpayers' money to the Royal Electric without much regard to the value received. If our citizen taxpayers like that sort of thing—well, that must be the sort of thing they like.

"May good digestion wait on appetite and health on both."

That sentence from Shakespeare is a genuine benediction of the body. In this as in so many other things the intuition of his mighty mind seems to have fathomed the facts which science has slowly discovered.

Science has shown that disease in any part of the body is almost always accompanied by weakness and failure of the digestive and assimilative organs. Under these conditions the stomach, liver and blood-making glands fail in their appointed work. Then the symptoms of disease appear, often in organs apparently remote from the real cause. Vitality is lowered. There is a dull and sluggish feeling often accompanied by headache. The heart may seem affected. There may be lack of ambition and energy with mental irresolution. With such symptoms as these "delay is dangerous." Such a condition affords the favorite starting point for consumption. It is useless to "doctor" for the symptoms. The remedy that reaches the case must reach the cause of disease. The greatest medicine for all diseases of the stomach and other digestive and nutritive organs is Dr. Pierce's Golden Medical Discovery. It restores the appetite, re-establishes a sound digestion, purges out the bilious poisons which infect the blood, carries off waste and builds up sound and healthy tissues. The "Discovery" is not a stimulant. It contains no alcohol or whisky. No other medicine has so great a record of cures, therefore accept no substitute.
Dr. Pierce's Pellets cure constipation.
