A 12% Income

You can multiply by two, the Income

Your widow and children would ordinarily receive from their insurance money through the very liberal provisions of the Imperial Double Income Policy.

This doubled income would continue from the date of your death until your youngest child became 21 years of age. Then the full face value of the Policy would be paid to your heirs in cash.

If an ordinary policy for say \$10,000 became a claim the income from the money, if invested at even 8% would be only \$800 a year. Under a \$10,000 Double Income Policy, however, the Imperial Life would guarantee to pay \$1,200 a year and this income would be paid until your youngest child became of age, and then the full \$10,000 would be paid in cash.

If you survive the policy it will provide a very welcome cash fund or a desirable income for your own later years.

If you have young children you cannot do better for them or for yourself than to look into this very unusual type of policy without delay.
