

WESTERN GUARDIAN

AGENTS—Mrs. John Fenn, 44 Water Street, Room 202-3 Summerside and Prince George

News, Subscriptions, Advertising should be left with Mrs. Fenn

The Guardian may be bought daily at any of the following stores in Summerside

The Guardian will be delivered daily to any home in Summerside by carrier free of charge

—In a column reserved for news of local interest, but advertising of a newsy nature may be inserted in a small word strictly payable in advance

—MALTED MILK 40c AND 75c at Taylor Drug Co., Kensington.

—VISITING IN TORONTO—Mr. John C. Jack of Summerside is visiting in Montreal and Toronto this week.

—RETURNED TO HALIFAX—Mr. Nat White who has been visiting his mother, Mrs. O. deW. White, Summerside, left on Monday on return to Halifax, N.S.

—JURY ARRIVED—Shipment of Men and Young Men's Suits and Ties for Spring, Fall and Sea time will be in at Maurice Mill, Clonfert, Summerside, 7-10-3-10-15.

—WEDDING BELLS—A quiet wedding was solemnized at 6.30 a.m. on Monday in the Presbyterian Church, Summerside, when Miss Helen Winifred, youngest daughter of Mr. and Mrs. Fred W. Peters became the bride of Mr. Amos Henry Hubley, son of Mr. and Mrs. Rupert H. Hubley of Belfast, P. E. I. Rev. William Verbeke performed the ceremony in the presence of the bride's immediate family. Miss Peters wore a lovely gown of mulberry velvet with a matching velvet turban and accessories. Her flowers were a bouquet of Rosedale roses. Immediately after the ceremony the bride and groom left for a short honeymoon to Halifax and other Maritime points, the bride wearing a blue sheer dress and Hudson coat. Upon their return Mr. and Mrs. Hubley will reside on Kirk Street. Mr. Hubley is manager of the Perfection Dairy at Summerside and has made many friends since his appointment. His bride was the popular and efficient secretary at the Prince County Hospital, and is one of Summerside's most popular young ladies. The Guardian joins in happy felicitations.

—KIANZIE medium gloss waterproof enamel in modern colors for metal, wood, D.S. or fibro-board, can be cleaned with a damp cloth; only 80c pint at Brace's. L-821-3-15-21.

—PURE (4 lb. cut) Orange or White Shellac. On new hardwood use two coats, the first thinned with alcohol; and both and finish with Brace's floor wax. L-821-3-15-21.

—NORTH SHORE JUNIOR HOCKEY FINALS. Kensington rink Wednesday, March 16th, 1938, at 8 P. M. Spring Valley vs. Kensington Seams. 3rd game of the best of 3 game series for Junior trophy. Admission 15c and 25c. L-824-3-15-21.

—CONGRATULATIONS—Congratulations are being received by Mr. E. S. F. Jardine, manager of the Canadian Bank of Commerce, Summerside, and Mrs. Jardine, on the arrival of a little daughter yesterday. Congratulations are also in order to Mr. Adrien F. Arsenault, E. C. and Mrs. Arsenault on the arrival of a daughter on Sunday morning at their home in Summerside.

—Mrs. Robert Dewar and little daughter Diane, of Summerside, are spending a few days at Mrs. Dewar's home in Preetown. S

Commoners

(Continued from page 1)

German soldier or aeroplane that crosses the Czech border will have the whole might of this country against it.

—R. S. Hootchy, Conservative, urged the Prime Minister to reiterate that if France becomes involved in a European quarrel "which involved her being attacked we shall go to the aid of France with our armed forces at once."

—That would be a great safeguard for European peace, he declared. The Government should go to its full air strength to parry with Germany at whatever cost, even if it involved industrial conscription.

—The reply to be declared within a reasonably short time by this country, exclaimed Winston Churchill, Conservative, "must be clear, precise, so that it can be understood by the people of all countries, all parties."

—Our country has an obligation to give a perfectly plain statement of what it will not do in certain contingencies.

Why, Mr. Churchill demanded, should we assume that the times are on our side? It is to convince me that if the evil forces now at work are suffered to feed upon their successes and their victims, our task will be easier.

—Europe is confronted with a program of aggression, nicely calculated and timed, and unfolding stage by stage. There is only one way to meet it, and that is to bring to other countries who unfortunately are concerned—either to submit like Austria or to take effective measures to ward off danger," Mr. Churchill said.

—The Prime Minister's speech in the House of Commons today was a masterpiece of statesmanship, Mr. Sir Henry Page-Croft, Conservative, expressed the profound hope and conviction of the House of Commons that it will win the Spanish civil war, loudly protested.

In the resulting general disturbance Lady Astor called "Salvation Army" across the floor to George Griffith the Labor.

A Labor backbencher indignantly objects to what he called as aspersions on the religious belief of a colleague.

—The Prime Minister himself warmly interjected: "It is not the first time that has been said. So far, I have taken it as a compliment, but I am not taking it on the quiet much more."

—Mr. Chamberlain observed that he alone could have swerved the course of events during the weekend. He said Germany's action in Austria constituted a "genuine shock" to countries interested in the preservation of European peace and hinted it may have erased all hope of a separate Anglo-German agreement.

—It follows that what has passed the House of Commons will not fall to prejudice the hope of his Majesty's Government of removing misunderstandings between nations and promoting international cooperation," he declared.

—Mr. Chamberlain went directly to the house from an audience and luncheon with King George, and earlier presided at a two-hour cabinet meeting.

—The Prime Minister's declaration, implying a sharp step-up in the £1,500,000,000 rearmament program, was repeated in the House of Lords by Foreign Secretary Viscount Halifax.

Summerside Council To Press For Collection Of Unpaid Light Accounts

At the regular monthly meeting of the Summerside Town Council held last night in the Council Room, Mayor Campbell presiding, a resolution was passed authorizing the electric light committee to engage Mr. Hugh Morrison to collect past due light accounts, and also to authorize the committee to disconnect all parties whose accounts they consider uncollectable.

Mayor Campbell speaking on this matter said that the situation was intolerable. He said that he had been told by the Mayor of Summerside when the town took over the electric light plant and one of the arguments used against the town ownership of the light plant was that delinquent ratepayers would trade on the good will of the Council. He considered that drastic measures would have to be taken in the matter as it was very unjust and unfair to the citizen who does pay.

These things have to be viewed in the light of assembled citizenship and not as to the individual case. Mayor Campbell said that the figures submitted by Mr. Durant, town clerk, for arrears in light bills had taken a big jump within the last five years. In 1933 the arrears were \$11,500 and 1937 amounted to \$14,576. In 1931 they were \$2,960. Mr. Durant said some effort had been made in previous years to collect back accounts and

that the clerk was authorized to discontinue accounts running over two months, but the matter was not pressed. There was a decided step taken in 1936 to collect back accounts and \$800 was collected in cash and arrangements made for payments each month of arrears, until paid off.

Another matter discussed was that of employment for non-residents. Councillor MacKay moved the following resolution: "That the Summerside Town Council give official notice through the press that it will be impossible for any parties moving into Summerside to receive work from the town within the next two years as there will be no possibility of work for them (the town) as the Board of Health as to the incorporation Act of the town does not permit of any relief being administered by the Town Council. Moved by Councillor MacKay and seconded by Councillor MacNeill and passed unanimously.

Mayor Campbell stated that with respect to the septic tanks for disposal of the town sewage that he had received communications from competent engineers and the undertaking would be quite feasible, but the whole thing would depend on the Board of Health as to the analysis of the water in the harbor. The usual bills and reports were received and passed.

Otherwise the whole resources of Spain—manpower, economic wealth, strategic positions, islands and colonies—will pass to Germany and Italy and will be used to reinforce the structure of their war machines.

"Let us resolve to support France in respect to Czechoslovakia. Let us draw closer to the United States and not leave Russia out of account. Let us remember the vital importance of friendship with Poland. Let us base our policy firmly on the principles of the League and let us do our part of the league and all truly peace-loving powers."

Britain has suffered a series of humiliating diplomatic defeats since 1931, declared Lieut.-Commander R. P. Fletcher, Labor.

He asked plaintively where were friends upon whom she could rely. Intervening, Beverley Baxter, Canadian-born Conservative, said she spoke for Canada who is grateful to this country and this government for having preserved the peace of Europe so long and for having tried to put forward a foreign policy which was Christian and forbearing, and which apparently has failed.

Commander Fletcher replied he assumed the friendship of the Dominions.

Vivian Adams, Conservative, recalling the Prime Minister had described Britain's power as "terrifying" said:

Winding up debate for Labor, A. V. Alexander, former First Lord of the Admiralty, said he was content to speak for Canada who is grateful to this country and this government for having preserved the peace of Europe so long and for having tried to put forward a foreign policy which was Christian and forbearing, and which apparently has failed.

But "we are not prepared to ask for an unlimited program of armament, backed by unlimited military training, for the purpose of a major war in Europe in circumstances which are as yet undefined."

Mr. Alexander urged the cabinet to summon the League Council which was the only way to prevent the next move by Hitler against the peace and liberty of other states in Europe.

Representative Dies (Dem-Texas) declared the "inevitability" of the worst European war in history since the formation of the United States to increase its naval strength.

"Dies was able to do what he did," Dies said, "because he was backed by a strong, well-equipped army."

Foes of the naval bill expressed conviction the increased naval strength would be used by Hitler to expand his foreign empire.

"America has plenty of problems to occupy us right here at home," said representative Brewster (Rep-Main). "Let us not meddle again to our own disadvantage with any European mess."

value of the islands is too slight for that.

Yet there is a distinct diplomatic message for Tokyo—and for Berlin and Rome for that matter—to read into these friendly conversations.

It is the same hint that underlies the presence of American war craft at the present time in history of Britain's new naval base at Singapore.

That implication means that common democratic ideals and common interests in many parts of a changing world may mean common reaction if the necessity arises to defend those ideals and interests.

The question who owns them is solemnly debated in Washington and London, and Tokyo cocks an attentive ear. Downing Street and the State Department exchange communications about them.

The beginning of all this is obvious and understandable. It began months before Japan's new inroads into China increased the tension over the Far Eastern situation. It had to do, on the surface at least, only with American air pioneering across the Pacific.

American military opinion seems agreed that those pin-points in the Pacific are of dubious war value to anybody.

Yet there is a tumult of speculation as to the purposes behind the London-Washington conversations concerning ownership. Some persons believe they see signs of a "virtuous" if unqualified, Anglo-American naval understanding.

However, most onlookers here agree that Senate isolationists who may challenge any London-Washington agreement for joint control or use of the islands will not get far in seeking to show it is a part of a naval accord. The military

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach, and gets out of you. Harmful poisons go into the body, and you feel sour, sunk and the world looks pink.

A marvelous movement does "always get on the liver as well. It takes those good, old Carter's Little Liver Pills to get the bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Satisfactorily refuse anything else, 25c.

C.P.R. PLACES ORDERS FOR NEW STOCK

2800 Freight Cars And 35 Locomotives To Be Constructed.

MONTREAL, March 14—Orders for 2800 freight cars and 35 locomotives were announced today by Canadian Pacific Railway after a meeting of directors. No estimate of the cost was given for the orders, announced as follows:

Canada Car and Foundry Limited—1,000 box cars and 200 flat-cars, 200 stone cars and 200 flat-cars.

Eastern Car Company of New Glasgow, N.S.—50 concentrate cars, National Steel Car Company of Montreal—950 box cars, 200 hopper cars and 100 gondolas.

Canadian Pacific Railway shops—50 overhead tank refrigerator cars, 500 box cars, 100 flat-cars, 100 gondolas, 100 hopper cars, 100 gondolas.

Montreal Locomotive Works—10 Hudson type locomotives, 25 4-6-2 type locomotives.

The announcement also said it was expected orders for 10 locomotives, mountain type, would be placed shortly.

Orders for 1937 totaled \$145,085,558 compared with \$138,562,763 in the previous year. Working expenses increased from \$115,251,652 in 1936 to \$125,000,000 in 1937. Net earnings for 1937 were \$23,742,247, an increase of \$41,136 compared with \$23,311,111 in 1936.

Net earnings for 1937 were \$23,742,247, an increase of \$41,136 compared with \$23,311,111 in 1936. Net earnings for 1937 were \$23,742,247, an increase of \$41,136 compared with \$23,311,111 in 1936.

Ocean and coastal steamship services, after provision of \$3,894,489 for depreciation, brought income of \$2,458,832, compared with \$1,408,193 in 1936, when depreciation charges were \$3,667,151.

Net earnings from hotel, communications and miscellaneous properties for 1937 were \$1,267,598, compared with \$1,456,649 the previous year, when depreciation was \$620,094.

Loss for 1937 on lines abandoned and on property retired and not replaced was \$2,595,392.

Hitler Coup Is Basis Of Debate

WASHINGTON, March 14—(AP)—Adolph Hitler's seizure of Austria was the basis for arguments both for and against the United States administration's billion-dollar naval expansion program in the House of Representatives today.

Representative Dies (Dem-Texas) declared the "inevitability" of the worst European war in history since the formation of the United States to increase its naval strength.

"Dies was able to do what he did," Dies said, "because he was backed by a strong, well-equipped army."

Foes of the naval bill expressed conviction the increased naval strength would be used by Hitler to expand his foreign empire.

"America has plenty of problems to occupy us right here at home," said representative Brewster (Rep-Main). "Let us not meddle again to our own disadvantage with any European mess."

value of the islands is too slight for that.

School-curriculum Discussion

By J. C. Lewis

(Continued from page 4)

to commit the infallibility of his Deily to any dictum of his; in the second place, no one can destroy Euclid, nor as I know, does anyone wish to. All that needs to be done, in fairness to Euclid and to ourselves, is to keep him where his usefulness is shown and to keep him out of places where he does not function.

There is not a mathematician who does not know that Euclid's geometry is a masterpiece of Euclidean geometry, the epoch-making discovery of relativity which never has been accomplished. Yet Euclid is a valuable study of which our children must know something.

The language of algebra is more exact than our English language. It is more exact because it deals with things rather than with ideas. Often the case in our language, with fragments of the imagination. Besides, it is more concise. Most people today cannot read or write mathematical language. The modern world depends solely upon the application of the sciences about which this language deals.

Without mathematics there would be no airplanes, bridges, telephones, automobiles, radios, nor a thousand other things.

Here is a translation of ordinary language into common mathematical language.

The length of a rectangle is 10 feet. The breadth is 8 feet. The area is 80 square feet.

With the mathematical language there are no considerable fragments of time and space. Of course, in those algebraic symbols no actual objects nor referents in the outside world are included, and before that point, the simple language cannot do anything it must represent some action or relation. If you have a room 10 feet long and 8 feet wide, the 1 (10 feet) x 8 (8 feet) will give you a result of 80 square feet. But you cannot work the formula by multiplying the length in feet by the breadth in yards or inches. You must be careful to use the same units.

If you should neglect all this important matter, you will bring forth mathematical monsters and qualify yourself as a statistician for political, economic and other review. Net earnings for 1937 were \$23,742,247, an increase of \$41,136 compared with \$23,311,111 in 1936.

WEAK KILNEYS Cause Back-Ache

Do You Recognize These Symptoms? HEADACHES, BACK-PAINS, RHEUMATISM

PRAISE FOR DR. HAMILTON'S PILLS

"I can speak with wonderful confidence about the power of Dr. Hamilton's Pills," writes Mrs. Sangster. "I am now sixty years old, but for some time past have been in poor health suffering from a nervous condition and kidney trouble. Violent headaches made life a torture. Weakness in my back also afflicted me. I became so nervous and weak I could scarcely work. My appetite was poor and I grew nervous and sleepless. When in pitifully low health I used Dr. Hamilton's Pills and was completely restored to happy, vigorous health again."

DR. HAMILTON'S PILLS ARE GOOD FOR BACK-ACHE

you care to go but you will never come to the end. By and by, the little piece of wood will have become so small as to be imperceptible to the naked eye but always there, and it is there that the pain remains. The students pucker their brows and ponder on the great mystery while the professors smile their weary, omniscient smiles. Finally they take a long breath and say: "You see the problem is unsolvable for division you cannot reach the end of infinity." Probably not, though personally, since I have no referent for the word "infinitely" I have not the slightest idea of its meaning. But, a moment ago, the professors were talking of the impossibility of coming to the end of a two-foot stick by division AND THAT PROBLEM IS NOT UNSOLVABLE. For, when we, aided by mathematics and physics, come to that point, one million or ten millions times below that speck which marks the limit of the strongest microscope, we reach the last atom and find that the substance the substance has changed. There is no longer any wood.

The story of Achilles and the tortoise affords a good example of the superiority of the ancient mathematicians dealing with the ancient philosophers. Those men, despite the absurdities into which their reasoning often led them, were intellectual giants. Yet you cannot find in any ancient record, a refutation of Zeno's statement that Achilles could not catch the tortoise. Aristotle left it severely alone and the problem runs rates of motion which the ancient Greeks did not possess.

There are two ways by which, using mathematics, we can solve the problem. We could use graphs in which we show by drawing a line the rate at which the tortoise moves, and another showing the rate of Achilles. Where the lines meet is the point at which the tortoise is overtaken. It makes no difference how fast or how slowly they travel, as long as the tortoise moves and the Achilles runs faster. The angle of the meeting lines will change according to the variance in the rates of speed but the lines will always meet.

Now, I think we can let algebra tell us the result of the race. R x X equals the distance the tortoise runs. Then 5R x (X-25) equals distance run by Achilles. We can solve for X, for instance, 2R x X equals 5R x (X-25) or 2X equals 5(X-25) or 2X equals 5X-125 or 3X equals 125 or X equals 41 2/3 seconds.

Then 5R x (X-25) equals distance run by Achilles. We can solve for X, for instance, 2R x X equals 5R x (X-25) or 2X equals 5(X-25) or 2X equals 5X-125 or 3X equals 125 or X equals 41 2/3 seconds.

Then 5R x (X-25) equals distance run by Achilles. We can solve for X, for instance, 2R x X equals 5R x (X-25) or 2X equals 5(X-25) or 2X equals 5X-125 or 3X equals 125 or X equals 41 2/3 seconds.

Then 5R x (X-25) equals distance run by Achilles. We can solve for X, for instance, 2R x X equals 5R x (X-25) or 2X equals 5(X-25) or 2X equals 5X-125 or 3X equals 125 or X equals 41 2/3 seconds.

Then 5R x (X-25) equals distance run by Achilles. We can solve for X, for instance, 2R x X equals 5R x (X-25) or 2X equals 5(X-25) or
