JURY FOUND AND EMPANELLED

In Thaw Case, Twelve Men Sworn Out of Four Hundred Examined; Trial Begins Monday.

NEW YORK, Jan. 10.—(Special)—The jury in the Thaw case were empanelled today and the trial will begin on Monday. In all five hundred men were summoned and nearly four hundred were examined. Nineteen were excused on peremp-

RESULTS OF MCGILL EXAMS.

The Standing of Students From this Province—All Have Made Most Creditable Marks—Their Names and Awards.

In the recent midsessional examinations at McGill the students from this Province have made a very creditable showing. The following is a list of their standing in the different years:—

In 3rd year Arts Gordon Ross of Bequec gets class 2nd in Moral Philosophy. In 2nd year Arts Owen Trainor of Charlottetown gets 1st class in Chemistry, 2nd class in Latin and 2nd class in Geometry. In 1st year Arts, Hugh Warburton of Charlottetown gets 1st class in English and History, leading his year in that subject, 2nd class in Latin, 3rd class in Greek, 2nd class in Physics 1st class in Trigonometry, and 1st class in Geometry.

Creaghan of Newcastle, N. B., who attended Prince of Wales College last year gets 2nd class in English and History, 1st class in Latin, 3rd class in French, 1st class in Physics, 1st class in Trigonometry, and 1st class in Geometry.

A. Dunbar of Alma, gets honors in 2nd year History. L. J. Houle, Charlottetown, J. S. McLeod, Charlottetown and F. B. McKay, Mt. Stewart, get honors in Practical Chemistry.

McKay and Houle get honors in 1st year Botany, J. S. McLeod passing in that subject.

In Applied Science W. M. Dennis, O'Leary, gets 2nd class in 3rd year Mathematics, 1st class in Surveying, class 2nd in Surveying School, class 2nd in Geology.

Layton Stewart, Summerside gets 2nd class in 3rd year Mathematics, 1st class in Metallurgy, 2nd class in Surveying, 2nd class in Surveying School, 1st class in Qualitative Analysis, 2nd class in Geology.

R. B. Stewart, Stratford gets 2nd in Surveying School, C. Dennis, O'Leary gets 1st class in Surveying, 1st class in Chemistry.

J. J. McDonald, Vernon River, gets 1st class in Surveying, and 1st class in Chemistry.

Walter Mathieson, Charlottetown gets 3rd class in 1st year Dynamics, 2nd class in 1st year Physics.

J. H. Hooper, Milton, gets 3rd class in Dynamics and 2nd class in Physics.

In Medicine—J. J. Gillis B. A., Miscouche, B. S. Smith, New Glasgow and G. M. Manning, get honors in 3rd year Bacteriology, J. A. McPhee, Charlottetown, R. S. P. Carruthers, Bequec, B. H. Compton, Alberton, P. L. Lavers, Georgetown, get honors in 2nd year Organic Chemistry, F. H. McKay, gets honors in 1st year Physics, J. J. McDonald and C. Dennis, get honors in 2nd year Science Physic. F. M. Auld, Covehead; J. W. Dorsey, city; G. C. Lawson, city, pass in third year Bacteriology. A. Dunbar, Alma, passes in Organic Chemistry, L. Houle, J. S. McLeod, L. W. McNutt, city, A. Webster, St. Peter's, pass

ANTI-FOREIGN RIOTS IN CHINA

Protestant Chapel and School Burned, and Magistrate's Office Burned, But Foreigners Said to Be in No Danger.

SHANGHAI, Jan. 10.—(Special)—Rioters at Kai Hsing Fu a town in the province of Che Kiang have burned the Protestant chapel and school there. The official residence of the local magistrate also was destroyed. Foreigners at Kai Hsing Fu are safe. There has been considerable unrest recently in this province, but the disorders have been directed principally against the dynasty. Further reports of the rioting at Kai Hsing Fu declare the movement there to be anti-foreign. The Catholic missionary station has asked M. Bevisik the French minister to China for protection and the minister will take up the matter with the foreign board today.

ENGLISHMEN MAY STAY HOME

LONDON, Jan. 9.—The Liverpool Daily Post-Mercury says the knowledge among British workmen that a prejudice against them exists in Canada will probably have a tendency to make them pause before transferring themselves and their families to a country in which they are looked upon with disfavor. In some cases the feeling may even operate to prevent them from emigrating at all.

FEW DESERTERS FROM VESSELS

MONTREAL, Jan. 9.—Recently completed figures show that desertions from vessels arriving at the port of Montreal are decreasing. During the season of navigation on the St. Lawrence five hundred and fifty seamen deserted from British ships making the port of Montreal, which number is considerably below the figures of last year. The reasons for the dropping off of men who desire a land job in preference to serving as able-bodied seamen are given as a more rigorous system of prosecution and the following up of deserters, and the lack of employment that existed during the late summer and early fall months, especially on big contracts, such as railway construction, etc.

BOARD OF TRADE COUNCIL MEET

A meeting of the Council of the Charlottetown Board of Trade was held yesterday to endeavor to have a properly qualified person appointed by the Dominion Government to inspect dressed hogs that are to be exported from this Province. In order to comply with the Dominion Government regulations all dressed hogs intended for export must be inspected and certified to by a Government inspector. It appears there is no inspector for this province and the market for hogs from here is restricted to Canada. Endeavors have been made to have this matter remedied but to no avail so far. The other provinces are provided with inspectors who inspect and stamp carcasses, which are then available for export to the British market. This privilege is not extended to Prince Edward Island and hogs from this Province are thus shut out from the British market, because none of the large exporters will be allowed to accept shipments from here unless they are stamped and marked by the duly qualified inspector's certificate. A telegram was sent yesterday afternoon by the Board of Trade urging the Minister of Agriculture to appoint an inspector.

KIN OF EARL GREY WAS SUICIDED

NEW YORK, Jan. 9.—A young man who registered at the Hermitage Hotel yesterday afternoon as H. Clay Duberley, Canada, committed suicide there tonight by swallowing some narcotic poison. He was found unconscious in his room and died while two physicians were working over him. Apparently Duberley was a distant cousin of Earl Grey. The daughter of a younger brother of the second earl married James Duberley of Gains Hall, Huntingdonshire. The Governor-General of Canada is the fourth earl and a grandson of the second earl. Duberley arrived at the Hermitage late yesterday with several pieces of baggage and asked to be assigned to a bright room. He was given room 306 on the second floor, and after the Japanese helboy had shown him upstairs he entered and locked the door behind him. Nothing was seen of him from that time, and tonight Charles Kelly, the manager, became suspicious that something had happened and sent a Japanese helboy to rap at Duberley's door. The boy reported that he could get no answer, so Kelly tried himself, but could get no response. Then he sent the engineer and the door was forced.

FAREWELL OF MR. ELLIS

The Popular Comedian Will Be at Fairyland Tonight. There has been a great line of moving pictures at "Fairyland" this week, "uniformly of excellence" being the motto. For tonight the bill is up to the high standard for which the popular recreation rendezvous is noted. The Clockmaker's Secret is an intensely interesting subject. The film is beautifully colored and reveals many wonderful scenes as it runs from the reel. The Little Hero describes exciting adventures and the Twin Brothers furnishes rich comedy that is bound to bring down the house. To-night Mr. Ellis the star comedian will again appear on his return from Summerside and will present a new program of jokes, parodies, etc. This will be the final appearance of Mr. Ellis, here. For next week the management has been fortunate in securing Hanson the famous magician who has played to crowded houses on the Mainland. He is certainly a marvel and his appearance will mark an era in vaudeville attraction in Charlottetown. He carries a great line of properties and his program will be a magnificent one. Look out for fuller particulars. A photo showing Mr. Hanson at work will be thrown on the screen to-night.

HAPPY ENDING TO OLD ROMANCE

LONDON, Jan. 9.—An old romance has just been brought to a happy issue by the marriage of the faithful lovers at the age of eighty-four, respectively. When Richard White, farmer, Glasbury, Breconshire, plighted his troth to Miss Lucy Bull, fifty years since, there was an insurmountable obstacle to their union. This was the fact that the young lady was a Roman Catholic. The couple parted, and some time later Mr. White married a widow. After forty-six years of married life, Mrs. White died, Miss Bull remained single, and when, after the death of Mrs. White the schoolmistress again met her former sweetheart, the old affection was revived. Miss Bull, now eighty-four, proposed once more, and was accepted, a dispensation for the marriage was obtained from the Pope, and the long-deferred wedding has at last taken place.

BIG SALMON LATELY CAUGHT

EDINBURGH, Jan. 9.—A dead salmon of extraordinary size was recently removed from the Tweed at Mertoun, near St. Boswell. The fish, which had apparently died from the effects of salmon disease now so prevalent in the river, was discovered by the water bailiffs, who before burying it had it weighed, when it was found to be just over sixty pounds. The next heaviest salmon taken from the Tweed, of which there is accurate information was one caught with rod and line by Mr. Pryor on the Floors Castle upper water, in 1886; it weighed fifty-seven pounds the morning after it was caught, and would perhaps have been little short of sixty pounds when first taken from the river. Another, weighing fifty-five pounds, was caught on the Mertoun in 1899; and Colonel Home had one of fifty-one and a half pounds at Birgham.

\$500 A MINUTE IF CURRENT FAILS

New York, Jan. 9.—Five hundred dollars a minute is what it will cost the New York Edison Company if it fails for more than three consecutive minutes to supply electric current to operate the pumps for the new high pressure fire mains that are to be put in operation some time next month. This is said to be the highest penalty ever imposed for failure to live up to a contract, but it is only half as high as the city authorities wanted to make it.

SATISFIED WITH JAPAN MISSION

Hon. Rodolphe Lemieux Says He believes it Will Prove a Complete Success.

OTTAWA, Jan. 10.—(Special)—I am entirely satisfied that my mission to Japan on behalf of the Canadian government has been a complete success. This statement was made to your correspondent this morning by Hon. R. Lemieux, Postmaster General of Canada, who is just back from Tokyo where he went from Canada to discuss the question of Japanese immigration.

REPORT BY REV. MR. MARSHALL

To The Temperance Federation Meeting Held in St. John—Some Extracts Referring to Working of Prohibition Act

ST. JOHN, N. B., Jan. 9.—A representative meeting of the New Brunswick Temperance Federation was held in the W. C. T. U. rooms yesterday afternoon, the president, J. Willard Smith, in the chair. Rev. N. McLaughlin conducted devotional exercises. Rev. Thomas Marshall then read report to the federation on the work of the government commission. In Charlottetown where the act has been longest in force the evidence leaves no possible doubt as to the great gain under prohibition. Trade was never better. Tourist travel has increased from year to year. The hotels are better and more satisfactory in character. The quiet and peace of the City has greatly improved, the money formerly going to the saloon now goes to the landlords for better houses and to the merchants for goods and provisions for the family. One of the members of the government said: "I don't know anything that has done so much good for Charlottetown as the prohibitory act. It has not injured trade but helped it." The only business shown by the evidence to be injured by the prohibitory act is that of the sale of intoxicating liquors. The position and character and number of the witnesses testifying to the value of prohibition must in itself carry great weight, the premier of the province, the mayor of the city, the superintendent of education, members of the government and legislature, the police magistrate, and police clerk, the chief of police the inspector, and a number of influential merchants and professional men of the city, all gave clear and explicit and emphatic testimony as to the great advantages of the law to P. E. I. The people who know the law, who live under it, are surely the best judges of its value. The premier said: "There is no doubt of its being away ahead of the Scott act and of any other law that I have known of, to prevent the sale of intoxicating liquors. As Attorney General of the province and having control and supervise the whole proceedings in the Island, I simply say the prohibitory act is a great success. Although not being a teetotaler myself I still think the law a great step in advance in preventing the sale of liquor. I have no doubt in the world it has tended to the decrease of crime, and it must be a man of common sense knows if you keep men sober you will not have as much crime. It has been proved here that it can be carried out and that the sale of liquor in a town of this size can be prevented and has been prevented. I think the same principle would apply to much larger towns than this."

CONSUMPTION IN IRELAND

DUBLIN, Jan. 9.—Dr. T. J. O'Mara lately made special inquiries as to the physical condition of Irish emigrants on their return from America. He finds pulmonary tuberculosis is very prevalent in many districts in that part of Ireland, and that its incidence is the greatest in those localities to which consumptive Irish-Americans return. It is introduced into houses which from their structure cannot be properly disinfected and in which isolation of infected cases is impossible. The result is that one member after another becomes infected, until frequently a whole family disappears. In Hare Island into which the disease was first introduced from America about fifteen years ago the white plague has played havoc. Dr. O'Mara gave many instances. In one family four members died in the same house in three years as the result of an Irish-American returning home with consumption.

THE WEATHER.

ONTARIO, Jan. 10. (Special)—Moderate winds, mostly northerly, fine and cool.

SUGGESTIVE MONUMENT FOR A TOWN

The police magistrate said: "The act is a success here. It is being very well enforced with the effect of a very noticeable decrease in drunkenness in this City, and this is what will appeal to the common sense of everybody. There has been a very marked change in the drinking habits. There is no doubt that the act has closed open saloons. In regard to this as a very effective measure."
