BRACE, MacKAY & CO. LIMITED SUMMERSIDE

3 Handy Pack P.K. for 5¢

Long lasting

DELICIOUS flavors—freshen the mouth and sweeten the breath. The very act of chewing relieves nervousness and calms and soothes the over-wrought.

Long lasting pleasure—long lasting benefit. A great deal of benefit for 5c.

WRIGLEY'S CHEWING GUM

IMPERIAL SUNSHINE

Puppy Foxes, raised in pens, get very little sunshine and, in order to offset this, it is necessary that sunshine in artificial form be given them.

Fox Pups fed generously with IMPERIAL BISCUITS or PUPPY FOOD never develop rickets but show a steady growth and progress without any setbacks.

Order through leading distributors or direct from factory.

-PRETTY WEDDING—In the United Church at Lot 14 on Tuesday, June 23rd, Miss Olga, daughter of Mr. and Mrs. Lester McLean, was united in marriage to Maynard McArthur, son of Mr. and Mrs. Artemas McArthur. Both bride and groom belong to Arlington. Rev. Mr. Altken of Lot 16 performed the ceremony. The church, which was filled with friends was prettily decorated with an arch of flowers and wedding bells. Here and there were lovely potted plants. Mr. Carl McLean, brother of the bride, and Mr. Clarence Phillips ushered the guests to their seats. The bride, who was given in marriage by her father looked charming in a wedding dress of white crepe de chine, with a long flowing veil. She carried a lovely bouquet of pink roses. Her bridesmaid was her sister, Miss Helen, who wore a dress of pale pink crepe de chine with large picture hat. Her bouquet was of roses. The groom was supported by his cousin, Leigh Maynard. Mrs. Hatfield Maynard played the wedding march and during the signing of the register the choir sang very effectively "The Voice That Breathed or Eden." Immediately after the ceremony a reception was held at the home of the bride for the immediate relatives and friends of the bride and groom. Out of town guests were Mr. and Mrs. Willard Phillips, Mr. and Mrs. Percy McRae, Mr. and Mrs. Hazen Phillips, and Mrs. M. L. Frank McKenzie and Master Ross McKenzie of Summerside. Mr. and Mrs. McArthur will reside in Arlington where they have a host of friends who wish them every prosperity.—S.

Crop Report

Below will be found a brief synopsis of telegraphic reports received at the Head Office of the Bank of Montreal from its Branches. The Branch Managers have complete and intimated knowledge of each local situation and are in close touch with crop conditions in all sections of the district mentioned.

GENERAL

Recent rains in the Prairie Provinces further moisture is required in Southern Alberta and most of Saskatchewan and in Manitoba. Damage from drought and winds has been serious over large areas of the three Provinces, and prospects generally are much below the average. East of the Great Lakes crop conditions generally continue highly satisfactory. In Quebec crops continue to make good progress and weather conditions are favourable. In Ontario all crops are making excellent progress. Fall wheat is headed out and filling well, and spring grains are showing rapid growth. In the Maritime Provinces conditions have been conducive to good growth, but in some districts in Nova Scotia more warm, dry weather would be helpful. In British Columbia heavy rains have been general, and have been beneficial to nearly all crops, with the exception of strawberries and cherries, which have suffered much damage. Details follow:

PRAIRIE PROVINCES

Alberta Northeastern Area—Moisture conditions have been improved by general rains and growth has been good. Wheat is eight to ten inches high and 20 per cent is in shot blade. Alberta Southeastern Area—Crops have benefited by recent rains; wheat is six inches in height. Alberta Western Area—Crops have made good recovery since the general rains of the past week. Early sown wheat is in shot blade; straw will be short. Later sown grain is in good condition. Pastures have much improved. Saskatchewan Northern Area—There is ample moisture in the Prince Albert and Battleford districts; plants are stooling well, are of good colour, and average ten to fifteen inches in height. Saskatchewan Northern and Central Districts—Moisture is still lacking and prospects are very poor. Saskatchewan Southern Area—Showers have been received during the past week but rain has not been general. Strong winds have caused further damage. There has been some re-seeding of coarse grains in blown-out areas. Growth is patchy and uneven. Pastures are short, and the feed situation is serious. Manitoba Eastern Area—Crops generally in good condition with little yet. Wheat is from 10 to 15 inches in height, mostly in shot blade. Manitoba Western and Central Areas—Crops have been damaged from winds and drought and growth is backward. Conditions in these districts are generally unfavourable. Pastures are poor, with prospects of a light hay crop.

PROVINCE OF QUEBEC

Hay promises to be a heavy crop of good quality. Potatoes and other root crops are doing well. All cereal crops are progressing favourably. Tobacco is being planted under favourable conditions. Pastures are in excellent conditions.

McCOLL-FRONTENAC

PROVINCE OF ONTARIO

The first cutting of alfalfa has commenced and the crop is heavy. Grass pasture is in excellent condition. Early canning peas are heavy and in blow. Corn is showing satisfactory growth. Early potatoes are promising, and root crops generally are making good progress. Strawberries and other small fruits, with the exception of cherries (which are light), are an average crop. Prospects are favourable for a good grape crop. Damage by cutworms necessitated considerable replanting of tobacco plants, which has now been completed, and growth is satisfactory.

MARITIME PROVINCES

Pastures are in excellent shape. Prospects are for a good average crop of hay. Potatoes are making satisfactory progress. Apple trees blossomed well and, given favourable weather, the crop should be good.

PROVINCE OF BRITISH COLUMBIA

Field crops are in good condition and satisfactory yields of grain and hay are anticipated. Tomatoes are doing well; potatoes and onions are very promising. Fruit trees are in good condition, the estimated yield of apples is 80 per cent of average, peaches 75 per cent, apricots 100 per cent, pears 85 per cent, plums and prunes 95 per cent. Feed for livestock is now plentiful.

JUDGE FOXES BY FACTS

It is not always safe to judge by appearances, especially when buying silver foxes. At least that is the essential conclusion to be deduced from the recommendation in this respect contained in the report of the Dominion Experimental Fox Station at Summerside, P.E.I., just issued. It states: "It has been the general practice of fox breeders in buying breeding stock to make their purchases from the appearance of the foxes without a full study of their ancestry. It is our conclusion that this is not a reliable method by which to select silver foxes for breeding stock. The Department of Agriculture, the Canadian National Live Stock Records, and the Canadian National Silver Fox Breeders' Association have, at great expense, built up a system of registration of the pedigrees of the silver foxes of Canada. The results that we have obtained would indicate that the substitution of the foundation stock from which the offspring were produced would be a better guide in purchasing silver foxes than the appearance of the foxes, desirable as that may be."

..NEW ZEALAND INSTITUTE—

The women of New Zealand Institute met in the school house on June 24th. There were five members present. The minutes of last meeting were read and adopted. It was decided to have the school cleaned before the new teacher took charge. A letter from the Red Cross was read by the Secretary and the members decided to let the teacher collect funds, the same as last year. It was decided that Mrs. Peter Conway and Mrs. James Villard attend the Convention in Charlottetown. The meeting adjourned. Next meeting will be held in the school on July 22nd.

Rheumatism So Bad Could Hardly Walk

Mrs. Wm. Kniesz, R.R. No. 5, Guelph, Ont., writes: "For years I suffered with rheumatism, and my hands and feet used to swell so, at times, I could hardly walk, and could not sleep or rest for the pain. I used different kinds of medicine, but got nothing to do me any good until a friend told me to take Burdock Blood Bitters. Now I have no more pains and the rheumatism is all gone."
