The strike has spread over the entire Liege basin and has tied-up most of the collieries and the big industry. In the centre of Belgium many industrial proprietors seem to approve of the strike and sympathize with the men.

In the collieries of the South East the Flemish workmen have been boycotted by the Walloons, and hundreds of them have already left the Province. The street car employees have struck at La Louviere, and the Municipal employees at Seraing, Liege to night has the appearance of a besieged city.

Lancers met and dispersed a column of miners from the neighboring collieries trying to enter the city. In Brussels a mob tonight made a rapid tour of the city, wrecking street cars, smashing windows, and doing all manner of damage.

The children were well cared for, and were in no sense ill-treated by the soldiers, who rather petted them, but they did not relish the forced separation from their parents and homes. The officers in charge of the troops used every method known to them to persuade the soldiers to put the children ashore.

CHILDREN FOR PAY

In other places, where they have been forced to disband they have looted and murdered and caused a reign of terror, but the line of the National garrison in developing a slave trade in men. These men were being taken back to their province, and when the steamboat Chuyven was ready to leave it was found that about three hundred children, nearly all girls, had been stowed away to be sold as slaves.

The children were well cared for, and were in no sense ill-treated by the soldiers, who rather petted them, but they did not relish the forced separation from their parents and homes. The officers in charge of the troops used every method known to them to persuade the soldiers to put the children ashore.

The soldiers were obdurate. They declared that as soldiers who had won the country from the Manchus they were entitled to some reward, and as money was not available in abundance they were prepared to take the next best thing. They could see no reason why they should give up the children, and what commenced as a gentle argument quickly developed into a threatening mutiny, and all foreigners on board the steamboat were ordered ashore.

A PRETTY ROMANCE.

BOSTON, June 3.—A romance which began when Miss Marguerite M. Pell, an attractive Woburn girl, rescued Clarence C. Burgess, an attendant at the Medford State Hospital, from drowning, has ended in a wedding. The couple were married by the Rev. R. W. Magoun in the Trinity parish house in Woburn, and far forty-eight hours they managed to keep the fact of their marriage secret.

Two months ago both were out boating. Burgess capsized his canoe and his cries for help were heard by Miss Pell. She paddled up close to the man in the water, and standing in her canoe, dived overboard and saved Burgess.

The couple met several times afterward and friendship ripened into love. The couple decided to elude their friends and hit upon the plan of a secret marriage.

On Friday of last week, Dr. Frel Young, Minister of Public Education, of the Province of British Columbia, Dr. Alexander Robertson, formerly of Dalhousie University, Halifax, and now Superintendent of Education in British Columbia, and S. C. Scott, formerly Editor of the St. John Standard, New Brunswick and now Editor The News Advertiser, Vancouver, visited Boston. They were acting as the commission on behalf of the new university to be erected by the Province of British Columbia and which has been liberally endowed by the government.

They visited the various points of interest, being the guests of James Henderson and Frank Ross of the firm of Henderson & Ross. On Friday they were tendered a dinner by Henderson & Ross at the Boston City Club, which was attended by a number of Boston business men. Among those at the luncheon were Richard Johnson, an attorney formerly of Charlottetown and now of Boston.

LADIES FOR THE WEED.

TORONTO, June 3.—Are women allowed to smoke in local hotels? A much mooted question in the United States is beginning to arise in Toronto also. According to one hotel authority in one of the larger concerns there are no more restrictions against the opposite sex.

"If they wish to indulge in this habit they have no means of preventing them," he said, "except in those apartments, such as the prohibited to men also. We have no more objection to the women smoking than the men."

Other hotels on the other hand, according to what can be learned would be highly indignant at such a department from the laws and customs of convention.

NEW SUBWAYS.

NEW YORK, June 3.—The dual transit system, dividing more than \$300,000,000 worth of new subways and elevated routes between the Interborough and Brooklyn Rapid Transit companies was endorsed in the report of the Transit Committee as presented to the Board of Estimate in a special meeting.

This report has been in preparation several months and is the outcome of negotiations and trading of the last two years, it provides for 486 miles of new rapid transit routes, covering every section of the metropolis and also the term for operation of all the lines.

Mayor Gaynor, Comptroller Prendergast and other members of the Board of Estimate, excepting John P. Mitchell, President of the Board of Aldermen, declared they were prepared to endorse the report. But as Mr. Mitchell objected and filed a minority report, it was decided to take the vote at a special meeting today.

SEIZED 300 GIRLS. NANKING, June 4.—Three hundred young girls were kidnapped last week by disbanded soldiers and were being taken away on board a river steambot to be sold into slavery when officers intervened and, with the aid of a park of field artillery and on the promise to pay compensation, the girls were rescued.

The disbanded soldier is the most difficult person with whom the military authorities of China have to deal at present. Recruited from the riff-raff of the country—these soldiers know no discipline but the right of might, and nothing terrorizes them into a semblance of submission but the executioner's sword.

They defy officers, threaten revolt upon the slightest pretext, and so overawe the authorities that they obtain concessions a hundredfold more substantial than any accorded to the regular soldier.

Thousands of them in various places have declined to be disbanded. In some cities they have fought to retain their hold over the people, from whom they have exacted much illegitimate toll, and at Foochow and Canton held the countryside in terror while they wrestled with the legitimate forces for supremacy.

A MILLION FOR SYDNEY SHIP BUILDING.

SYDNEY, June 4.—The plebiscite on the six million dollar shipbuilding and dry dock proposition of the British-Canadian company, of which Sir Henry Pellatt is the president, and A. C. Ross, the secretary, carried without undue excitement today by a vote of about six to one.

A small vote was polled, the totals being 1,940 to 172, likely due to the customary apathy which is no political issue is involved. This represents about a third of the voting majority of the city on plebiscite submissions, but there is no doubt of a favorable sentiment towards the one million dollar bonus proposed. Mr. Ross was naturally elated, although the result was not expected. Mayor Gunn, who takes a warm interest in the project, says that he is satisfied with the vote and expects before long to hear riveting machines humming their songs of more prosperity for Sydney.

The largest favorable vote was polled in ward five, which expects, on account of location, to benefit by the proposed industry to a greater extent than any other part of the city. The customs receipts for Sydney during May were \$27,000, as against about \$15,000 for the same month in 1911.

"I have always been of a bilious temperament, subject to malaria and up to one year ago a perfect slave to coffee. At times I would be covered with boils and full of malarial poison, was very nervous and had swimming in the head.

"I don't know how it happened, but I finally became convinced that my sickness was due to the use of coffee, and a little less than a year ago I stopped coffee and began drinking Postum.

"From that time I have not had a boil, net had malaria at all, have gained 15 pounds good solid weight and know beyond all doubt this is due to the use of Postum in place of coffee as I have taken no medicine at all.

"Postum has certainly made healthy, red blood for me in place of the blood that coffee drinking impoverished and made unhealthy." Name given by Canadian Postum Co., Windsor, Ont.

SHORT IN ACCOUNTS.

KINGSTON, Ont., June 4.—It is now admitted at the local branch of the Merchants Bank, that Harold G. Arthur, teller, who disappeared last Thursday night, has left some discrepancies in his accounts. Just how much he is short, will not be known for a time. Arthur took a train out of here early Friday morning, buying a ticket for Windsor, but it is said that he did not get that far.

GREAT BRITAIN CANNOT FIGHT.

LONDON, June 3.—Sir William Ramsay has drawn attention to the fact that in case of war Great Britain would soon be brought to an absolute standstill for want of ammunition. At the annual meeting of the British Science Guild he pointed out that there is in this country no supply of nitric acid, which is of absolute necessity for the manufacture of explosives.

Swift's Animal Fertilizers

Worn Out Land! Such an expression has no place in our economic vocabulary. Land does become unproductive, but it is due to human mis-management, and it may be made as productive and as fertile as virgin soil. Land is like a Bank account, you cannot continue to withdraw money without making deposits. You may take from the Bank interest, but there can be no interest principal. The farmer harvests his crops and takes from the soil both principal and interest. The interest is the crop, but the principal the soil's fertility—its life-knot by the chemical means of Phosphoric acid Nitrogen and Potash. These must be put back into the soil, and the easiest and most economical method is to use commercial Fertilizers in conjunction with Barn manure.
