FRUIT FAVORED

Fruit is needed all the year round, the nutritionists insist. There is no reason why, just because summer is over, there should be cutting down or cutting out of those fruits and fruit juices which have become such an important actor in the diet of Canadians. If you "eat out", the experts on foods suggest that you keep a small quantity of fresh fruit or fruit juices at home, even if that is only a room. It will be refreshing as well as healthful, taken before starting out for work in the morning.
