Titled British Women Suspected Of Drug Traffic

LONDON, Oct. 10.—Six women prominent in British society, wealthy, glamorous and splendidly gowned, are being watched day and night by Scotland Yard as the alleged chief agents of a drug ring supplying Mayfair with thousands of dollars worth of narcotics.
 So far the women have thwarted efforts of the police to get the conclusive evidence demanded by the English courts.
 The six women entertain and move freely in the titled circles of London's west end.
 Suspect number one, it was learned recently, is a woman with a big house in the west end, where she entertains lavishly. The police have considerable evidence against her.
 Number two is a confirmed drug addict now living abroad. She makes frequent visits to London, however, where she is alleged to give parties for young people and supply them with heroin.
 The third agent long has been under suspicion and is understood to have been a friend of the late Billie Carleton, the dancer, who died from narcotics several years ago. She is very wealthy, one of the best dressed women in London.
 Scotland Yard believes the home of number four is the meeting place for drug addicts of all descriptions.
 Number five is young and pretty and has many wealthy friends.
 The last of the group divides her time between London and the continent.
 Turkey is said to be the chief source of the narcotics, which are brought across the Syrian desert to the small port of El Kantara, on the Suez Canal.
 The investigation, which has been going on for some time, grew out of the trials and convictions of Brenda Dean Paul and her friend, Mrs. Anthea Rosemary Carew.
 The "countess" is believed to be the London agent of an international drug ring, the alleged head of which is Desire Hartert, alias Ritan, who was caught red-handed in Paris recently, according to reports to Scotland Yard.
 Sensational arrests are declared imminent.
 One of those under observation is the younger son of a peer who owns his own airplane and is said to have made several unreported landings in England, after flights to the continent, before checking in a Hendon airport.
 Many of the persons are believed to be addicts as well as smugglers.

Earth's Core Not Liquid, Nippon Scientist Finds

WASHINGTON, Oct. 11.—If new discoveries reported by Dr. Akitsune Imamura, Japanese scientist, are substantiated, Captain N. H. Heck of the U. S. Coast Survey said today, they will establish the earth is solid as a billiard ball and does not have a liquid core.
 Dr. Imamura, as quoted in Tokyo dispatches, said his study of transmission of earthquake waves through the earth showed its interior is not liquid but two and one half times "harder" than steel.
 If Dr. Imamura's discoveries are borne out it helps clear up a sort of scientific paradox, Capt. Heck said. There was reason to believe the earth's core must be solid, but past studies of earthquake waves indicated it was liquid.
 Scientists believed the core was liquid because one type of earthquake waves known as "S" waves which will not pass through liquids apparently did not pass through the core. Dr. Imamura now reports he has found that "S" waves do pass through it.
 The earth's core is about 4,000 miles thick, half the total thickness of the earth, and is believed to be composed of iron and nickel. It is under tremendous pressure, which at the centre of the earth would amount to about 44,100,000 pounds to the square inch.
 The earth originally was a liquid mass, scientists believe, composed of both iron and silicates. These two substances would not mix, so as the earth hardened the iron was concentrated in the core, and the silicates formed the outside crust of rock.
 The Dominion Bureau of Statistics index number of wholesale prices on the base 1926-100, rose fractionally from 66.8 in August to 66.9 in September, 111 quotations were higher, 90 were lower, while 301 remained unchanged.
 Vegetable Products dropped from 55.1 to 53.5, lower quotations for barley, corn, oats, wheat, flour, bran and shorts exerting a greater influence on the index than gains in flax glutin meal, and coffee. Animals and Their Products advanced from 59.9 to 60.7, gains for cured meats, calves, hogs, hides, butter, cheese, lard and eggs more than offsetting reductions for canned salmon, steers, lambs and shoes.
 Fibres, Textiles and Textile Products rose from 69.3 to 70.0, due chiefly to higher quotations for raw cotton, silk, wool and cotton fabrics. Wood, Wood Products and Paper advanced from 71.1 to 71.5, gains for pine lumber and cedar singles outweighing losses for spruce lumber, and for unbleached sulphite and groundwood pulp.
 Iron and its products changed from 86.1 to 85.9, influenced largely by easier quotations for steel sheets, steel tank plates, and scrap iron. Non-Ferrous Metals moved up from 57.3 to 58.9, advances for antimony, copper, lead, tin and zinc influencing the index more than reductions for aluminum and silver.
 Non-metallic minerals and their products were 86.1 in September as compared with 85.0 in August. Higher price obtained from imported anthracite and domestic coal.
 Chemicals and Allied products changed fractionally from 82.9 to 82.8 due in part to price recessions for carbon black.

\$100 a Month... for You!
 Every month of every year a cheque in the mail for a definite, non-fluctuating amount.
 A certain income as long as you live, free from risk of investment loss and unaffected by business or other conditions over which you have no control.
 A guaranteed, continuous income, banishing all thought of future care... all worry, all fear, all chance of being in the dependent class, the lot of so many in later life.
 The Confederation Life plan is the safest, surest plan for building a permanent income. You, too, can face the future with confidence if you decide now not to leave the matter to chance, but to avail yourself of the certainty provided by a monthly cheque for \$100. Mail the coupon NOW for full information about this plan. It is yours for the asking, without any obligation on your part.

Confederation Life Association
 Toronto, Canada
 Without obligation, send me full information of your plan to provide me with a guaranteed income of "\$100 a Month."
 Name (Mr., Mrs. or Miss) _____

Most Highly Educated Has Largest Family
Betrayed By The Phonograph
 The civil court of Dijon, France recently established a precedent by admitting as evidence the articulate testimony of a phonograph, brought into court by a policeman. The defendant appealed and until his appeal is settled a case on the docket of the Civil Tribunal of the Seine will remain in subjudice.
 This is the case of Costa vs. Cravero, which is exciting much interest in the Paris press than the Dijon case did, on account of the personalities of the plaintiff and the defendant and their business standing.
 "M. Costa," one paper says, "is of so benign a countenance and has so confiding a character that no superficial observer would discern in him the astute business man that he has proved himself to be. He likes to believe that those with whom he deals are as honorable as he is."
 This being the case he raised no difficulty when recently M. Cravero, a retailer purchased from him \$400 worth of hosiery on credit and left no material evidence of the transaction.
 As his repeated bills to his customer received no attention, he invited M. Cravero to luncheon at his home and led the conversation around to the hosiery purchase. M. Cravero laughed and said:
 "Of course, I remember the affair. I owe you \$400. But I'd like to see you collect it, as there is no record of the transaction with which I am identified."
 "Are you quite sure?" asked his host.
 "I am sure," said the guest as he took his leave.
 After his departure M. Costa crossed the room to his phonograph and lifted out a record, which had faithfully registered the conversation. He took it to his lawyer, who at once brought suit, offering the record as evidence. The case was about to be dismissed as the type of evidence offered is not provided for in the civil code, when the president remembered the Dijon case and postponed his decision until the appeal of that case should be determined.
 Minard's new metal cap is handy.

Index Numbers To Wholesale Prices

The Dominion Bureau of Statistics index number of wholesale prices on the base 1926-100, rose fractionally from 66.8 in August to 66.9 in September, 111 quotations were higher, 90 were lower, while 301 remained unchanged.
 Vegetable Products dropped from 55.1 to 53.5, lower quotations for barley, corn, oats, wheat, flour, bran and shorts exerting a greater influence on the index than gains in flax glutin meal, and coffee. Animals and Their Products advanced from 59.9 to 60.7, gains for cured meats, calves, hogs, hides, butter, cheese, lard and eggs more than offsetting reductions for canned salmon, steers, lambs and shoes.
 Fibres, Textiles and Textile Products rose from 69.3 to 70.0, due chiefly to higher quotations for raw cotton, silk, wool and cotton fabrics. Wood, Wood Products and Paper advanced from 71.1 to 71.5, gains for pine lumber and cedar singles outweighing losses for spruce lumber, and for unbleached sulphite and groundwood pulp.
 Iron and its products changed from 86.1 to 85.9, influenced largely by easier quotations for steel sheets, steel tank plates, and scrap iron. Non-Ferrous Metals moved up from 57.3 to 58.9, advances for antimony, copper, lead, tin and zinc influencing the index more than reductions for aluminum and silver.
 Non-metallic minerals and their products were 86.1 in September as compared with 85.0 in August. Higher price obtained from imported anthracite and domestic coal.
 Chemicals and Allied products changed fractionally from 82.9 to 82.8 due in part to price recessions for carbon black.

Jewels Stolen By Trusted Servant

A "trusted servant" of Lady Diana Worthington, of Hyde Park terrace, W. London, was sentenced to three months' hard labor at Marylebone police court for stealing jewelry belonging to Lady Diana.
 She is Catherine Mary Macaulay, aged 44.
 Her husband, Duncan Macaulay, aged 52, a chauffeur, was also sentenced to three months for being concerned with the theft.
 Lady Diana said the woman had been in her employment as a maid for a number of years and had gained her implicit confidence and trust. She had no suspicion of her until the police told her that Duncan Macaulay had been arrested while attempting to pawn two rings which his wife admitted stealing.
 A detective said the man had been in and out of work for some time, and there was no doubt that Lady Diana's jewellery had been disappearing since 1929. Full confession had been made, but there was little chance of recovering a considerable part of the jewellery. Only about \$60 about (\$240) worth had been recovered.

Shortage Of Doctors Teachers In Russia

MOSCOW, Oct. 8.—Soviet Russia is faced with a serious shortage of physicians, scientists, also teachers and authors because the Communist youth would rather be an engineer than a professional man.
 A spirited campaign to overcome this prejudice has been inaugurated by the Government, it was learned yesterday, after an official survey disclosed that virtually all students in the schools prefer jobs at which they can work with their hands.
 So far in need of more doctors and teachers, the Soviet authorities are assuring Russian youth that it is "respectable to be intellectual." The odium which attached to the so-called intelligentsia, they are told, no longer is tenable.
 Whether the new generation will permit itself to be convinced remains to be seen. The boys and girls of the new Russia have grown up in an era when intellectuals were hunted, derided and publicly humiliated. The very word "intelligentsia" has come to mean something affiliated with counter-revolution.
 The one exception in the mind of the Russian youth has been the engineer. Though he might be classed as an intellectual, he is at least close to industry, and concerned with stern realities rather than "soft ideas." Thus, it has happened that the engineering schools have been crowded while the medical, pedagogical and purely scientific institutions have not.

Abbey Ghost

Renewed attention has been called to one of the many eerie tales which are told of Westminster Abbey in correspondence in spiritualist journals.
 The story runs that an earth-bound monk is supposed to materialize from time to time and walk along the cloisters, occasionally addressing persons, but always vanishing upon the least noise or any other shock.
 The last recorded manifestation of this haunting took place in 1916. The latest phenomenon is described as a "tall, lean, cowed figure, which walked along the cloister gallery." It paused to address two visitors and an American tourist, and described itself as a monk who had been killed in the Chapel of the Pyx by robbers during the reign of Henry the Eighth.
 There is no historical record of any such robbery, nor would robbers ordinarily have used a lance, the weapon to which the monk is stated to have referred. On the other hand, the same story has been told again and again throughout the centuries.
 One interesting feature of the haunting is said to be that the figure walks with the feet about an inch off the ground, indicating that the earthbound spirit still trod the same way as it had trodden in life before the years wore down the pavement.
 This characteristic is attributed to the spectre of Archbishop Laud, in St. John's College, Oxford, and to a thousand other well-known "ghosts."

Watch Your Feet

Frank Borzage avers women reveal emotions by the position of feet and legs, as follows:
 Poise, weight on one foot, other at ease. Love, the girl who rises on her toes likes to be kissed. Anger, the girl who keeps the ball of one foot off the ground is subject to outbursts of temper. Shyness, one foot wound around the calf of the other. Confidence, crossing the legs is a sure sign. Covetousness, disclosed by gold diggers who put the toe of one slipper under the arch of the other. Defiance, stretching one foot out when seated, with knees nearly straight.

DOG IS LITERALLY AN "ICE CREAM HOUND"

EVANSVILLE, Ind., Oct. 10.—An "ice cream" hound is owned here by Mr. and Mrs. Ben Mullen.
 Buddy's ancestral record shows him to be of the bull terrier breed, however. Mullen, who has owned the dog four years, gave it ice cream two years ago and has continued the practice.
 Buddy takes his confection in the cone, or on a plate, and becomes impatient if it appears the day will pass without getting his dessert.

Don't buy lamps blindly!

CHEAP nameless lamps will often use three times as much electric current as EDISON MAZDA Lamps. So "look to the name" and be sure of getting all the light you pay for.
