...There passed peacefully away at Souris River, on Friday, March 5th, Mrs. Thomas Haley, in the 70th year of her age. The deceased had been in failing health for a long time, and the end came not unexpectedly. Fortified by the last rites of the holy Catholic Church, on March 5th she peacefully breathed her last. Besides a large circle of friends, she leaves to mourn a sorrowing husband and daughter; also two brothers and two sisters with whom all sympathize in their sore bereavement. The funeral on Sunday evening, March 7th, was largely attended to St. Mary's Church, where the service was performed by the pastor, Rev. R. B. Macdonald, and the remains laid to rest in the adjoining cemetery, there to await the final call on the Resurrection Day. May she rest in peace. The pall bearers were: Charles D. McKinnon, John Tynan, Thos. Shea, William Whelan, Cornelius O'Donnell and Peter Lyons.

PROVINCIAL LEGISLATURE

(Continued From Page One.)

three dollars at one dollar and ninety three cents. The geography we pay eighty cents for they get for fifty five cents. For better binding instead of the wire the cost would be half a cent to two or three cents more per book. He believed the Old Country books we formerly had were better in make up as well as literary and educational value than anything we have had since. The Ontario contract had the disadvantage of being only for two or three years. When a new series is contracted for, to be supplied for perhaps twenty years thereafter they could be produced at less cost because of the longer contract. He would not advise to take up the Ontario series which is going out, but the change should have been made years ago. Even at the rates quoted now the publishers were able to sell wholesale at a discount of twenty five per cent. The geography only costs the publisher twenty one and one quarter, while we pay eighty cents. How is it that in New Brunswick in one year they have made a reduction of forty per cent? In Toronto where books and supplies are furnished free it costs less than twenty five cents per pupil per annum. Our books are no more modern than those of Ontario. New Brunswick got a reduction because the Government tried. Here the Government had not tried. We pay eight thousand dollars for text books which in Toronto would cost but one thousand nine hundred and thirty five dollars. Our loss on books and supplies as compared with Toronto is thirteen thousand dollars in a single year. We are spending in school books and supplies three times as much as we ought. This largely accounted for the falling off in school attendance. We should begin what they tried in the west, making books and supplies free. The cost, or want of books kept the poorer children away from school. He believed we had lost a dollar per head her pupil,—eighteen thousand dollars last year, nineteen thousand dollars in 1907. It was not good to thus rob the poor, although some might think so. This matter was brought to the Government's notice three years ago. Two years ago they made a solemn promise to do something, but nothing is yet done. The old Government of New Brunswick stood by the school ring and they were swept away. If the Government here does the same thing they must take the consequences.

HON JOSEPH READ said it was most unfortunate that the late Conservative Government had fastened this monopoly on the Province. He believed the commission would soon get us a reduction of fifty per cent in books. The Government had done just what Ontario did—appointed a commission. Much of the Opposition leader's talk was to the galleries, mere election talk and quite unnecessary. The item was then passed.

On the item thirty five thousand five hundred dollars for maintenance of the Hospital for the Insane, Mr. Mathieson enquired how many tons of coal were required during the year.

HON. MR. CUMMISKEY said about twelve hundred tons on an everage, all supplied by tender.

On the item thirty one thousand dollars for interest to banks, on loans debentures &c the Opposition contended that this sum would be insufficient. Last year the estimate was thirty two thousand dollars and over thirty eight thousand actually paid. Premier Haszard and Hon Joseph Read spoke of the debt being funded at four per cent, which would make some saving. The item was stood over.

On the item of six hundred dollars for prevention of tuberculosis, Mr. Mathieson thought the amount too small to be applied to advantage. It might be well to apply it to the schools where so many teachers had died of the disease.

PREMIER HASZARD thought the Inspector's report in that regard it did not reflect much credit on the Inspector. If conditions were unhealthy he should bring such matters to the Superintendent or the Board of Education. He would be glad to spend six thousand dollars if necessary and they had the money, but the representations made to him were that six hundred dollars would be sufficient for present purposes. It was twice the three hundred voted last year, which was not used. The Government had been asked to consider the question of a hospital or sanitorium for consumptives. It was doubtful whether that was the best thing to do.

DR. WARBURTON said that was two hundred dollars for each county. Prince County was already organized The Government grant would be in aid of subscriptions, to be used in disseminating literature. It was thought better that Queen and Kings should be organized together.

HON JOSEPH READ thought the matter of great importance. It was alarming to learn of so many teachers dying of consumption. He hoped to hear from the President of the Prince County Anti-Tuberculosis Society. (Mr. Wyatt)

MR. WYATT, argued that if the schools were in an unsanitary condition the Government was responsible They had power in such cases to withhold the grant. He regretted that no instruction was given in the schools on the subject, as had been asked by the Teachers Convention. In Prince County the society had distributed literature among the pupils, to be taken home to their parents. They had also delivered lectures in various localities which had produced excellent results. He asked whether the two hundred would be given to the Society to be expended in their discretion, or under the direction of the Government.

DR. WARBURTON said the society would expend it and report to the Government. He spoke of the difficulties in the way of medical inspection of schools. If more than one or two cases develop in a school there was great danger.

MR. WYATT remarked on the danger of infection from children using a common drinking cup in school.

MR. DOBIE thought the lectures on tuberculosis would do good. Both teachers and children sometimes had to go long distances to school, got wet in storms, and in a school with but one stove did not get properly dried. They had to work or study day and night and their health did not receive proper care. These conditions were calaulated to develop incipient consumption.

MR. PALMER contended that the schools in this Province were as good and well-ventilated as in any other Province. He objected to wholesale charges made against the schools. There were many deaths from consumption here as in other Provinces. It did not follow that the schools were at fault. He heartily commended the grant.

MR. MATHIESON thought that the Inspectors ought to be commended rather than blamed for reporting as they had done. The three Inspectors' reports agreed. The Board of Education should at once take up the question, call the Inspectors together and find out the exact facts. Literature often failed to reach those whose needs are the greatest.

HON. B. GALLANT thought the Provincial Board of Health might inquire into the matter and report. Then the Government would have something to deal with—a report from competent medical men.

MR. COX said the people would be willing to pay to stamp out this disease. Why not build a sanitarium or some site selected by the doctors? We had to think of those already in the first stage of the disease, as well as of prevention. He hoped to have this matter brought before the people.

EVENING SESSION.

The sitting was resumed at eight-thirty-five o'clock.

On the vote of three thousand dollars for paupers Mr. Mathieson objected to the money being placed in the hands of members. Two years ago a change was promised.

THE PREMIER said very little was placed in the hands of members. He sometimes thought it would be better to place it in the hands of one responsible person. It took one third of his time to attend to the executive grant.

MR. MATHIESON said he found that in their District one hundred and eighteen dollars and fifty cents was placed in the hands of Hon. Mr. Cummiskey and Mr. Palmer. He thought it undesirable to wholly with draw the grant. Some who were now assisted would become wholly dependant paupers.

MR. A. J. McDONALD thought a full report should be made of all receiving assistance as was formerly done.

MR. DOBIE, Hon. Joseph Read, Mr. M. Kennedy, Hon. J. H. Cummiskey, Mr. Laird, Mr. Arsenault, Mr. J. Kennedy, Hon. B. Gallant and Mr. Mathieson, continued the discussion.

A number of items of departmental salaries and contingencies passed rapidly without discussion. It was nearly ten o'clock when the estimates for Public Works were reached. Mr. Dobie objected to three hundred dollars for travelling expenses of the Commissioner. Mr. Prowse and Mr. Mathieson coneinued the criticism.

HON. MR. CUMMISKEY endeavored to show that his travelling expenses in eight years had been one thousand dollars less than was paid the last Conservative Commissioner during a like period. There are, he said three thousand six hundred miles of public roads in the Province.

MR. MATHIESON challenged the statement that travelling expenses are less. The engineer also gets three hundred for travel making six hundred dollars. He charged that the Commissioner did not travel or expend this money in travel, or in looking after public works as he should do.

A long discussion took place in regard to the Rockey Point Ferry, and the item was allowed to stand. Mr. Arsenault and Mr. Dobey claimed that there ought to be a better ferry at Ellis River. Hon. Mr. Read and Hon. Mr. Richards admitted the importance of this ferry and promised to give it consideration.

On the vote of twenty eight thousand dollars for roads, six thousand dollars more than last year's estimates, Mr. Mathieson inquired how much of this had been spent.

HON. MR. CUMMISKEY said it would take months to prepare the answer asked for. The expeoditures over what was voted was covered by Governor's warrant.

MR. McLEAN warmly asserted that much of the money was wasted. The people did not get value for it. There was no use in voting money if the Commissioner expended just what he pleased. The discussion was continued by Messrs Arsenault, J. Kennedy, Laird, McLean, Read, Prowse, J. A. McDonald, Dobie, McInnis and others till midnight.

At 2.50 a. m. the House adjourned till 10 o'clock.

There's a Granger Remedy for almost every disease from which a horse can suffer. Not merely a cheap mixture that does the animal more harm than good, but a first-class veterinary remedy the result of actual experience by professional horsemen.

Spring Ailments

Pimples, boils, eczema and other eruptions, loss of appetite, that tired feeling, fits of biliousness, indigestion and headache, are some of them.

They are all radically and permanently cured by Hood's Sarsaparilla.

This great medicine thoroughly cleanses the blood and restores healthy functional activity to the whole system. It makes people well.

"I have used two bottles of Hood's Sarsaparilla this spring and have got a great deal of relief out of them. I have been troubled with biliousness, but Hood's has completely cured me." D. J. CARDOCHE, 342 Antoine Street, Montreal, Que. Get

Hood's Sarsaparilla

Sold everywhere 100 doses one dollar.

"Black Prince" Hose are especially designed to withstand the hardest of wear.

Empire Liniment Co, Ltd, Bridgetown, N. S.

Gentlemen,

This is to certify that I have used Empire Liniment with splendid results on my cow which was badly hooked, the liniment cleansing and healing the wounds in a wonderful manner.

For use in the stable I believe it has no equal.

Yours very truly, DAN McDONALD

Port Mulgrave, N. S. November 8th, 1908.

KAISER SCEPTICAL OF DIVINER'S ROD

BERLIN, March 23.—The kaiser was present recently at a public meeting of the Council of German Agriculturists held in the hall of the Prussian upper house. His majesty attended in order to hear an address from a certain Herr von Ulsar, who has already attained fame as the possession of a divining rod, which is an infallible finder of water. For years Herr von Ulsar has been engaged in his native Mecklenburg discovering water sources by means of his divining rod. Scientific circles of course ridiculed his absurd pretensions, but Ulsar perserved, and last year started for German Southwest Africa, where the want of water it a most serious hindrance to the development of the country.

In the presence of the Kaiser and the colonial minister, Herr Dernburg, he married his experiences and afforded his majesty and the Council of German Agriculturists an hour of enjoyment. Herr von Ulsar asserted that 90 per cent. of the borings made at the instigation of his rod were successful, He even declared that this marvelous rod of his detected the presence of water under granite rocks. Proceeding, he extracted from his pocket and flourishing it before the audience exclaming: "Behold the cornus deliciti!"

There was constant laughter as Herr von Ulsar went on to recite a number of doggerel verses which he had composed in honor of his rod. He solemnly declared that his gifts had been bestowed on him by God, and it was his duty to place them at the disposal of the Fatherland.

SLAND PEOPLED ENTIRELY BY WIDOWS

NORWAY, March 23—Off the coast of Norway is a small island called Aarlud, which for nearly two years boasted the peculiar distinction of being peopled exclusively by widows. The circumstances under which this state of affairs was brought about are no less curious than distressing. One spring in the early "nineties" a man arrived on the island from augesund, on the mainland, with his wife and family, to participate in the egg gathering. While testing his ropes on a cliff, preparatory to commencing his search, he happened to make a false step forward over the cliff. He was instantly killed.

As there had not been a death on the island since eleven years before, when a boy was killed by a boulder from the same cliff falling on him, the occurrence naturally cast a gloom over the small community established there. This consisted of some thirty fishermen with their families. As a mark of sympathy and respect, all the men determined to attend the funeral of the unfortunate, which was to take place at the cemetery at Haugesund, on the mainland. During the proceedings at the burial ground a tremendous gale arose, and when the men returned to their smack the storm was at its height.

After carefully considering the situation, the thirty fishermen determined to sail for Aarlud, and, having taken advantage of the opportunity to replenish their household supplies, the boat was rather heavily laden. The progress through the angry sea was most anxiously watched by the people on the mainland, who, when the boat had gone the distance of about a mile and a half from the coast, saw that the vessel was in great distress. Efforts were at once made to go to its assistance, but the heavy sea beat back every boat that was launched. A few moments afterward the unfortunate smack plunged forward into the trough of the foaming waves and forever disappeared from mortal view. Every one of its thirty occupants was drowned, and on the following morning their bodies were found along the beach. News of the disaster was as speedily as possible conveyed to the island. Every wife in the place had by the dreadful event been made a widow, and out of thirty as many as twenty-eight were left without any means of support.—London Spare Moments.

MAURTANIA NOW HOLDS ALL ATLANTIC RECORDS

NEW YORK, March 23—The Cunard liner Mauretania's latest cross-Atlantic voyage has been one sequence of records. In 24 hours she steamed 671 knots at an average speed of 26.21 knots per hour. This is a world's record for ocean steaming. The best day's westward run previously accomplished by any ocean steamship was that made by the Lusitania when she steamed 650 knots at an average of 25.66 knots per hour. The Mauretania next set up another Atlantic record from Daunt's Rock, Queenstown, the official starting place, to Sandy Hook, the official finish on the other side of the Atlantic. Despite the fact that she had to face a westerly gale and heavy seas nearing the end of her run to New York, it is officially stated that she accomplished the passage in 4 days 17 hours 6 minutes. This is on the long winter course, and the time of her sister, but slightly smaller ship the Lusitania in her latest passage works out at 25.55 knots, or closely approaching 30 statute miles per hour. She burned 1,000 tons of coal per day. The Mauretania was held so closely to her course that she covered exactly the computed distance of the long trip, 2,890 miles. The Mauretania now holds all the eastern and western records for the highest daily runs, fastest passage over the long course, and highest speed, and has fairly won her title as "Queen of the Atlantic." Captain Pritchard states that he would not be surprised if the Mauretania, without the slightest risk, traveled 700 miles some day. It is conceded at New York that the Mauretania has won her title to supremacy, and that in future she will have no more excitement except that of breaking her own records.

The most striking part of it is that this amazing fanatic has a very large number of adherents, who devoutly believe in this superstition, and in German Southwest Africa he seems to have made a convert of the governor and the principal officials. Judging, however by the kaiser's demeanor yesterday, his majesty does not believe in Herr von Ulsar's divining rod.

CURES CATARRH

Stomach dosing was found ineffective, and the principle of inhalation was finally perfected. Even the Romans and Ancient Greeks used it, but not in the scientific manner that the physician prescribes today. The most wonderful results have been secured with a new treatment known as "Catarrhozone," which sends germ-destroying vapors direct into the air passages of the nose, throat, bronchial tubes and lungs.

RICH PURE ESSENCES ARE BREATHED RIGHT ON THE SPOTS THAT ARE SICK. CURE FOLLOWS.

Catarrhozone proves especially good in those chronic cases where mucus drops down the throat, sickens the stomach, and pollutes the breath. When the nostrils are stuffed, only a few breaths through the inhaler are needed to clear the passages, and where there is coughing and sore bronchial tubes, the soothing, healing properties of Catarrhozone act almost as magic.

Once you stop taking medicine into the stomach and get the healing oils and pure balsams of Catarrhozone at work you can be sure of quick and lasting cure for nose colds, catarrh, weak lungs, bronchitis, and speaker's sore throat.

CATARRHOZONE.

Beware of imitations. Three sizes, 25c, 50c, and $1, the latter being guaranteed. Sold by all dealers in medicine, or by mail from the Catarrhozone Co., Kingston, Ont.

"So Nervous—I Would Start at Least Sound."

Miss Minnie Reid, of Teeswater, Ont., says: "I caught a cold, but very foolishly let it go on without taking much notice of it, thinking that it would soon pass off again. Instead of this it fastened upon me, until I became downright ill, and when the cold did get better it left me in a terribly weak condition and a martyr to Catarrh."

"My health was quite broken up, nor did I make any improvement. I was tired all the time, lost my appetite entirely, while the pain in my head was at times intolerable. I got so nervous that I would start at the slightest sound, until life did not seem worth living under such conditions."

"I had almost despaired of getting rid of the trouble, when a friend advised the use of PSYCHINE."

"I took several doses of PSYCHINE and the result was marvellous. The continual feeling of heaviness which had been a burden to me for so many months, and made me so wretched, was removed as by magic. My appetite returned and I was able to enjoy my food again, and my system was thoroughly built up."

"I cannot express what your medicine did for me. From being a sick, broken-down, shattered woman, it made me strong and well. The nervousness has gone and I have had no return."

If you are run down Psychine will "pick you up" in good time. An unfailing remedy for Throat, Chest, Lung and Stomach Troubles. Sold by all druggists and stores at 50c. and $1 bottle.
