STRUCK BY CAR—Yesterday afternoon at 5.15 a little girl on Kent Street was struck by a car going south on Queen Street and turning east on Kent. The driver took the child to a doctor, who stated that the child was more frightened than hurt.

COMPLIMENTARY BANQUET—An enjoyable event was held in the League of the Cross band room Wednesday evening when the members were tendered a complimentary banquet by the officers of the Society. Rev. P. McMahon, D.D., Spiritual Director of the Society, presided and on his right was Rev. P. Hogan, who organized the band thirty five years ago, and on his left Mr. W. J. Brawders, the present leader of the band. Among the invited guests were Mr. Jos. Francis and Mr. Eddie Hornby. A jolly singsong was led by Mr. W. J. Brown during the courses of the meal. The chairman called upon the following speakers: Messrs. Joseph Francis, W. J. Brawders, Rev. P. Hogan, W. J. Brown, John Connolly, Chas. J. Mitchell, H. Flett, Edward Chaisson, Leo Doucette, Edward Hornby and Walter Perry.

NEW YORK, N. Y., May 22.—Col. Charles Arthur Carlisle, millionaire automobile manufacturer of South Bend, was detained with fifteen of his family servants aboard the French liner Paris, on its arrival from Europe today, when Customs authorities alleged that at least \$3,000 worth of personal effects, principally clothing, had not been declared.

STEWART—At the home of Mrs. N. W. MacKinnon, Southport, Lot 46, on May 21, 1930, to Mr. and Mrs. Ira Stewart, Brudenell, a daughter.

Miss Irene Wisner and Miss Eileen McIntyre, Charlottetown, spent the week end in Scotchfort, the guests of Mrs. Elmer McDonald.

Mr. and Mrs. J. P. Bradley, of Charlottetown and Mr. G. Dunn, Kellys Cross motored to Souris Tuesday and spent a very pleasant day visiting friends.

R-100 Will Likely Arrive May 31 st.

(Canadian Press) LONDON, May 22.—The Air Ministry announced today that the forthcoming flight of the dirigible R-100 to Canada would be timed so the airship will not arrive in the Dominion until the close of the Canadian Parliamentary session at the end of the month. The Canadian Department of National Defense so requested in order that Ministers and others might be able to receive the dirigible on its arrival in Montreal. The British Secretary of State for Air cable agreement to the proposal.

Giant Merger Of English Firms

(By George Hambleton, Canadian Press) LONDON, May 22.—Two separate amalgamations involving some of the greatest firms engaged in the heavy trades in the country were announced today. The Government was encouraged at this further progress towards rationalisation of industry in the interests of great efficiency and consequently lesser unemployment. The two largest steel organizations in the country were united when the John Brown Company and Thomas Firths were amalgamated with joint capital of \$35,000,000. The great coal and steel companies joined with a number of lesser concerns in Lancashire with capital on the new basis approaching \$30,000,000.

The leading firms in this merger were the Pearson and Knowles Company, Wigan Coal and Iron Company and Partington Steel and Iron Co.

—SERIOUSLY ILL—The Guardian regrets to report the serious illness of Mr. John Pond, Summerside, editor of the Journal. Mr. Pond's daughter, Mrs. Robert (Dolly) Fee, North Battleford, Sask., is on her way home. A slight improvement was reported in Mr. Pond's condition last night.

—DUE TO ARRIVE about June 20th, steamer "Heien" direct from Wales with genuine Welsh Anthracite coal, nut and stove sizes. This coal has no superior for clean burning and heat. Reserve your orders and take delivery from the ship. Jos. Read & Co., Ltd. 504-5-23-41-23rd-30th-6th 13th

Island Man Loses Life In Auto Accident

An automobile operated by Charles Schultz, of Lewiston, Maine, who makes his home at 67 Washington St., Boston, Mass., it is alleged struck and killed Hubert Lanigan 57, of 33 Sammett St., Everett, Mass., Monday evening, while he was walking across Broadway, near Lafayette St. Schultz was arrested on a charge of manslaughter to be arraigned in the Maiden Court. Lanigan, who was walking with his fifteen year old son John, when struck by the car, was taken to the hospital and was pronounced dead on arrival. The police report states Schultz passed on the left of a trolley car from which the victim had just alighted. Mr. Lanigan was the son of the late Capt. James Lanigan, of Souris West, P. E. I., and resided in Everett, for the past 33 years. He leaves to mourn a wife and six children in Everett, Mass.—Cont

IN MEMORIAM

In loving memory of our darling daughter Bertha May Hicken, who died May 26th, 1929.

This lovely but so young and fair, Called hence to early doom. Just came to show how sweet this flower In Paradise could bloom.

E'er sin could harm or sorrow fade, Death came with friendly care, This opening but to Heaven conveyed And bade her blossom there. Inserted by Parents and Grandparents. 3938-11.

N. D. MacLean UNDERTAKER EMBALMER Charlottetown & North Wilshire Phone 149

Appointed Atty. Gen.

Mr. Thane Campbell, of Summerside, was appointed Attorney General yesterday.

Mr. Campbell was a student in the Prince of Wales College from 1910 to 1913, in Dalhousie from 1913 to 1915, receiving his B. A. degree from that institution. He was Professor of Latin and Greek in a college in St. Catherine's, Ont., for one year. In 1918 he received his M. A. degree from Dalhousie.

Mr. Campbell was in the 9th Siege Battery, Saint John, during the war. He was selected as Rhodes Scholar from Prince Edward Island in 1920 and spent three years in Oxford University, taking his B. A. degree in 1922. In 1923 he began the study of law in the office of Hon. A. C. Saunders. In 1924 he went back to Oxford where he took his M. A. degree. In 1927 he was admitted to the bar and in that year became a law partner of Mr. Saunders.

Inquest

Continued from Page 1

small wounds in the back. The two went together, and the Spaniard chased them. Witness could not swear as to where Anti got the gun. Anti had stated, however, that he had secured one. The latter had then gone aboard with the other fellow, and the Spaniard made at him with a marlin pin. Then he said quite simply "I shot him. What else could I do? He came at me?"

The Spaniard, according to Anti, was coming towards him when he shot him. According to Mr. Scully, who was with Captain Johnson, there was no witnesses to the shooting. It was ten minutes before they found the body. Anti admitted to the policeman, who arrested him, that he had thrown the gun over the wharf. The prisoners were suspected on account of the previous squabble. The witness had spoken to some of the fellows who were in the hold, he said. The other man said nothing except that there had been a fist fight. Anti was anxious to know whether Roderiques was dead or unconscious. When told by the jailer that he was dead he seemed a little disturbed. He did not say how many times he had fired.

The preliminary hearing may possibly take place today in Georgetown. It is the opinion of the Attorney-General, Mr. Thane Campbell that it will not be a case of extradition.

FUMIGATION Not so many years ago, it was generally believed that whatever it was that caused the communicable diseases was blown around in the air. For this reason, when such diseases occurred, a great deal of attention was given to the air of the rooms which were occupied by persons suffering from communicable diseases. Rooms were treated by burning sulphur, by evaporating or spraying formaldehyde or other disinfectants. The idea behind such procedures was the need to sterilize the air.

We know now that malaria and yellow fever are not air-borne diseases. They are caused by the bite of certain types of mosquitoes which have previously fed on persons suffering from these diseases.

We also know that the germs causing the common communicable diseases die very quickly outside the human body. Their chance of temporary survival is fairly good if they are deposited in milk or other foods where they can remain moist. We do not include tuberculosis or smallpox in this statement for reasons of the discussion of which is not permitted by the space at our disposal.

We know that in case of practically all the diseases, excluding those spread by water, milk and foods, the communicable diseases are spread from person to person directly and not through inanimate objects. The germs of disease are carried by the droplets expelled by coughing, sneezing, spitting and loud talking. The spread of infection is accounted for by the taking in of these droplets by a second person.

Communicable diseases cannot be controlled by fumigation, by the sterilization of the air, and of inanimate things. If a communicable disease occurs in a school room, the proper method of control is to attempt to find the individual responsible for the spread of the germs. The cause is always a person, not some school desk or blackboard. It is a waste of time and money to fumigate the room. It is money and time well spent to have the children examined in order to find the source of the infection.

During the course of a communicable disease, all body discharges should be carefully collected and disinfected, because these fresh discharges contain the germs in large numbers and are so dangerous. The patient is isolated to prevent others from coming in contact with his body discharges and secretions. If such care is taken, there is no danger. It is the care during the course of the disease, by such concurrent disinfection, that is important. When the patient recovers and the secretions of his body are free of germs, there is no danger either in him or his surroundings, and there is certainly no value in fumigation.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St. Toronto, will be answered personally by letter.

VEGETABLES WORTH TRYING

The real vegetable garden consists of very much more than a few rows of carrots, beets and beans. There is room here for just as much

Girl's Death May Never Be Solved

(Canadian Press) LONDON, Ont., May 22.—The mysterious death of Reta Gardner, 22 year old Baden, Ont., office clerk found dead as the result of strychnine poisoning in a Montreal hotel on May 13, probably will not be solved. The death this morning of George Redfern, 42 year old Kitchener, Ont., salesman less than two hours after his arrest in the Grigg House, a local hotel, practically dispelled all hopes. Police believed that Redfern's apprehension would throw some light on the case. Redfern was believed to have taken poison before his arrest.

various and interesting as we have in the growing of flowers. The Canadian climate almost everywhere lends itself admirably to the production of a great wealth of vegetables, and our seasons usually favor quick growth which is absolutely essential for the highest quality. Among the lesser known vegetables of the cabbage type we have red cabbage, chinese cabbage, broccoli, kale and Brussels Sprouts. Red Cabbage is far more desirable for pickles and salads than its white sister. Chinese Cabbage, a sort of a cross between lettuce and cabbage, has a very delicate flavour. Broccoli resembles cauliflower. Incidentally, the latter vegetable might be grown more universally in this country also as it is among our earliest classically all the diseases, excluding those spread by water, milk and foods, the communicable diseases are spread from person to person directly and not through inanimate objects. The germs of disease are carried by the droplets expelled by coughing, sneezing, spitting and loud talking. The spread of infection is accounted for by the taking in of these droplets by a second person.
